NEW ORDER OVERVIEW

Before jumping into the functionality within an Order, let's get an understanding of the layout.

Order Header

At the top of the Order page, you can find some details about your Order including the Order Number, Account Name, the Bill to Contact, the Booking Date, the Status, the Combined Retail Total and the Amount Due.

There is also the:

- **Status Bar (1)** that shows the progress of the Order
- **Quick Links (2)** to different information within the Order (Not available for all user profiles)
- **Tabs (3)** to click through to look at different information within the Order

Order Tabs

Details Tab: An overview of customer information, including Account & Contact info, Sales Rep, Order Status, etc.

Products Tab: Information regarding the Products on the order, the Tech Mapp Upload Review (if any), and Cancelled Products (if any)

Finance Tab: Information regarding Payments, Refunds, Business Adjustments, Financing, Discounts, and Journal Entries

Work Orders Tab: Information regarding the Work Orders related to the Order, including Tech Measure and Install Work Orders, as well as potential HOA, Lead Safe Work Practices, Paint/Stain, etc.

Purchase Orders Tab: Information regarding the Purchase Orders for this Order

Change Orders Tab: Information regarding any After-Close Change Orders that may have occurred after an order had been closed

Other Tab: Information regarding the Back Office Checks, Surveys, and the Order History

Order Statuses

There are many statuses within an Order. Each status helps to identify the progress of the Order within the process. For Orders, most status changes are automatically updated based on other steps taken in the process.

Below are the different Statuses an Order can move through.

- **On Hold:** The order is waiting for something before it can be moved forward. Do not manually change to this status. See section on Put Orders On Hold.
- **Activated:** Disregard this status.
- **Draft:** A contract has been uploaded in rForce, but something still needs to be completed before it can be “booked”
- **Tech Measure Needed:** When a Technical Measurement Appointment needs to be scheduled.
- **Tech Measure Scheduled:** When a Technical Measurement Appointment is scheduled.
- **Ready to Order:** The technical measurement has been completed, paperwork is turned in, and product needs to be ordered.
- **Order Released:** All Purchase Orders on the Order have been Released/Ordered.
- **Install Needed:** All Purchase Orders on the Order have been Confirmed (they have Ship Dates, Costs & Confirmation numbers entered in rForce. The order is now ready to be scheduled for an Installation date.
- **Install Scheduled:** Installation appointment has been scheduled.
- **Install Complete:** Install is complete and Order needs to be Revenue Recognized.
- **Job in Progress:** The Installation was not substantially completed for some reason and a return visit is needed.
- **Pending Cancellation:** The customer is considering cancelling. This status should be rarely used, but would need to be manually changed. Once an order is in Pending Cancellation, it can only move to a status of Cancelled from there.
- **Cancelled:** The order has been cancelled. Do not manually change to this status. See section on “Cancel an Order and Inventory Write-Offs”.
- **Closed:** This is the final status and signifies when revenue has been recognized.

CREATE AN ORDER

Learning Objectives

This section explains how to:

- Create an Order using the zip file
- Create an Order using the proj file

There are two ways to create an Order using files provided by a Sales Consultant. Using the zip (JSON) file is the preferred method, but you can also use the rbaproj (PROJ) file only if necessary. We will cover both options below.

When an appointment is assigned in Enabled+ or SalesGateway, the customer's information is automatically sent into rForce. This information includes the address of the Dwelling (Account), the customer's basic information (Contact), and the sales appointment information (Opportunity).

If an order has been resulted as a sale (Sold-Pending) by a Sales Consultant, a Draft order **MUST** be created. Even if an order cancels prior to creating the order, you must create the Draft and cancel it from there. **Do not change an Opportunity status to "Cancelled"**. If the sale was resulted incorrectly, a leader with E+ or SalesGateway access will have to change the result.

After the sale has occurred, the rSuite project file will be delivered electronically by the Sales Consultant. There are several things to confirm before moving forward:

- Confirm Opportunity status is either New or Sold-Pending
- Confirm correct Sales Consultant is on the Opportunity
- Verify the phone, email address, and address are correct & under the Contacts
- Confirm deposit has been received and information is correct
- Confirm contract is signed
- Confirm you have received eGreement and .zip file from Sales Consultant
- Confirm contract amount matches amount in rForce
- Confirm contract amount matches amount resulted in Enabled+
- Confirm Year Built is entered on the Salesforce Account

Additional items may be necessary depending on your location. See the *Booking Checklist Addendum* for guidance.

Create an Order with the Zip file

The next step will be locating the Account and Opportunity in rForce, and then uploading the .zip file within the Opportunity. You must verify that you are using the correct (most recent) Opportunity if there is more than one.

1. Retrieve the .zip rSuite file that was provided by the Sales Consultant and double click to open it.

2. At the top, click Extract All.

Orders: Create an Order

3. Select the best folder or drive in which to save the extracted .zip file. Use the Browse button to specify that location.
4. Click Extract.

5. A new folder is created containing two files (a pdf and a json file). These files need to be uploaded within the Opportunity.
6. Log into rForce and search for the customer using the Global Search. Best practice is to search by Account Name/Address.

NOTE: If you don't find the Opportunity with this information, try other homeowner information provided on the Contract.

7. Click on the Account Name. If not already populated, fill in the year the home was built in the Year Built field by double clicking or clicking the pencil. You can find the year built using Zillow or other online resource.

Details	Service Requests	Orders	Other						
▼ Dwelling Details <table> <tr> <td>Account Name</td> <td>55424, 6028 Fairfax Ave</td> </tr> <tr> <td>Dwelling Style</td> <td>House</td> </tr> <tr> <td>Year Built ⓘ</td> <td>1953</td> </tr> </table>				Account Name	55424, 6028 Fairfax Ave	Dwelling Style	House	Year Built ⓘ	1953
Account Name	55424, 6028 Fairfax Ave								
Dwelling Style	House								
Year Built ⓘ	1953								

NOTE: Doing this step prior to the Back Office Checks will automatically create a LSWP (Lead Safe Work Practice) Work Order if the year entered is pre-1978. If no date is entered in this field, a LSWP Work Order will be automatically created.

For the complete LSWP Compliance process, see the Addendum.

8. Navigate to Opportunities (either at the top or under the Details Tab of the Account) .

9. Click the Opportunity Name that is in a New or Sold Pending stage with a recent Close date. (Do NOT use an Opportunity that has a stage of Demo No Sale).

0067 - Savage, MN Tim Auge

Did you find these results useful? 👍 👎

Look for "New" or "Sold-Pending" stage. Check date to confirm you are drafting a current sale

Opportunity Name	Stage	Close Date	Account Name	Store Location	Owner Full Name

Create an Order with the Proj file

If you only receive a Proj file from the Sales Consultant (and not the .zip), you can move forward following these work-around steps.

1. Retrieve the rSuite rbaproj file that was provided by the Sales Consultant and save it to your computer.

2. Go to file you just saved on your computer, right-click on the file, and click Rename.

3. Replace the name file suffix “.rbaproj” with “.zip”

PorterRandall.zip

4. When prompted the below warning message, click Yes.

5. Right-click on the file and click Extract All.

6. Select the best folder or drive in which to save the extracted .proj file. Use the Browse button to specify that location.
7. Click Extract.
8. A new folder is created containing three files. These three files will be uploaded within the Opportunity.

9. Continue by going back up to Step 6 of the Creating an Order with ZIP Section above.

DRAFT STATUS & BACK OFFICE CHECKS

Learning Objectives

This section explains how to:

- Know what Draft means
- Assign an Order Owner
- Complete Back Office Checks and move Order to the next status

What Does Draft Mean?

When an Opportunity contains a sold Quote, an Order in Draft status will be created. In Draft status there is limited functionality available. You will need to complete Back Office checks to move the Order forward. The revenue associated with jobs in Draft status will not pull into any sales metrics or backlog calculations.

NOTE: A Tech Measure appointment can be assigned to an Opportunity before a Quote is marked as sold. See Schedule Tech Measure Work Order section for details.

NOTE: It is recommended that jobs only stay in Draft status for 7 days, then get Cancelled if there's no progress. However, if you cancel a Draft order, the whole process will have to start from the beginning, as there is no way to "un-cancel" a Draft.

Assign Order Ownership

When an Order is created, the default Order Owner will be the person who created the Draft Order. If needed, follow the steps below to change the Order Owner.

1. On the Order page, click the Change Owner symbol on the right of the Order Owner field.

2. Type a name into the field and click the person you want to change the Order Owner to from the list. Then click **Change Owner**. Partial names can be entered into the search.

The Order Owner should now be changed on the Order page.

Complete Back Office Checks

To move an Order out of Draft status, all Back Office Checks must be completed. Back Office Checks are required to ensure that certain processes are completed before moving forward with the project. The list of Back Office Checks may vary based on your store location. **You must make sure payment has been applied or financing has been secured before doing all Back Office checks.** To complete the Back Office Checks, follow the steps below.

1. On the Order page, click the Other section. Click **Update** by Back Office Checks.

Details Products Finance Work Orders Purchase Orders Change Orders **Other**

Back Office Checks (5) **Update**

Back Office Check Name	Completed	Signed Date
Contract Signed	☐	
Lien Rights Signed	☐	
Renovate Right Booklet	☐	
Rights of Cancellation	☐	
Deposit Received	☐	

[View All](#)

2. Check all of the boxes under Completed. The signed date is auto-populated to the date on the contract. Click **Save**.

Back Office Checks

Back Office Check Name	Completed	Signed Date
Contract Signed	☒	4/20/2023
Lien Rights Signed	☒	4/20/2023
Renovate Right Booklet	☒	4/20/2023
Rights of Cancellation	☒	4/20/2023
Deposit Received	☒	4/20/2023

Save [Cancel](#)

3. If all Checks cannot be completed immediately, repeat the previous steps until all the Back Office Checks are completed.
4. After completing all Back Office Checks, the Order status updates from Draft to Tech Measure Needed or Tech Measure Scheduled.

NOTE: Once Back Office Checks are complete, verify the Lead (LSWP) Work Order, HOA Work Order, and Paint/Stain Work Order were created, if applicable. If they automatically populated but are not needed, change the Work Order status to "Cancelled".

EDIT CONTACT INFORMATION

Learning Objectives

This section explains how to:

- Edit an Address
- Edit a Contact
- Add a New Contact
- Add and Remove a Spouse

Edit an Address

Editing the address in rForce is allowed to fix typos or errors in the address.

NOTE: Changing the address in rForce does not change it in Enabled+ or on the Contract in RSuite.

The screenshot displays the 'Account' details page for account 84096. The account name is '84096, 6842 W Windy Ridge Dr'. Below this, there are tabs for 'Details', 'Service Requests', 'Orders', and 'Other'. The 'Details' tab is active, showing various account information. At the bottom of the page, the 'Address Information' section is highlighted with a red box. It contains two fields: 'Address' and 'Billing Address', both of which are '6842 W Windy Ridge Dr, Herriman, Utah 84096-3516, United States'. Each field has a red edit icon (a pencil inside a square) to its right.

3. Save your changes.

Add a New Contact

1. From the Account, select the **New Contact** button on the top right corner.

2. Enter First Name, Last Name, Phone Numbers, Email, etc. Make sure to mark as Primary if you want their name to print on paperwork and invoices.
3. Click **Save**.

Add/Remove a Spouse

For a contact to show up on paperwork printed from rForce, they must be marked as a Spouse on the record. Add a contact as a spouse to have their name print on paperwork. Remove them as a spouse if you no longer want them on the paperwork.

1. From the Account, go to Contacts by clicking the quick link. Click the name of the Primary contact. Then click the pencil next to Spouse.

The screenshot shows the 'Contact Information' form. The 'Spouse' field is highlighted with a red box, and a yellow pencil icon next to it is also highlighted with a red box. The 'Edit Spouse' button is visible at the bottom right of the form.

2. Start typing the Contact name you want to add as the Spouse in the Search box. Choose the name from the drop down and click **Save**.

The screenshot shows the 'Spouse' search dropdown. The search box contains 'shelli-j'. The dropdown list shows two results for 'Shelli-Jo Thorpe' at '55024, 18890 Elgin Ave'. The 'New Contact' button is at the bottom.

To remove a spouse, click the edit pencil by the Spouse name and click the X by the name. Then click **Save**.

The screenshot shows the 'Contact Information' form. The 'Spouse' field is highlighted with a red box. The edit pencil icon and the 'X' button next to the spouse name 'Shelli-Jo Thorpe' are also highlighted with a red box. The 'Portal User created successfully!' message is visible at the bottom right.

NOTE: Contact Fetch with any issues changing a Contact.

PAYMENTS, REFUNDS & BUSINESS ADJUSTMENTS

Learning Objectives

This section explains how to:

- Edit the Payment Type
- Add Payments on an Order
- Issue Refunds on an Order
- Add Business Adjustments on an Order

After a Draft sale has been created, you will be able to add Payments to the Order.

Before entering the Payment information into rForce:

- Collect the payment – this may be done via the payment portal, Telecheck, the lockbox, or other methods set up by your location
- Update Payment or Financing information.

Edit the Payment Type

On the Order, under Finance Details, always confirm the Payment Type listed is correct. If it is not, you must update it any time it changes.

1. To edit the Payment Type, go to the Opportunity.

Details	Products	Finance	Work Orders	Purchase Orders	Change
Unique Identifier	00670042114				
Store Location	0067 - Savage, MN				
Account Name	55424, 6028 Fairfax Ave				
Bill To Contact	Anthony Mirelez				
Opportunity	Appt: EDINA, MARELEZ, +1(952) 237-7232				
Quote	2 dg's-1 pw				

2. Scroll to the Payment Type field and click the pencil.

Opportunity	
Appt: EDINA, MARELEZ, +1(952) 237-7232	
AW//	
Important Lead Notes	Payment Type Finance
Enabled Marketing Source	Television
	# of Series 1 Quoted

3. Choose the correct Payment Type and click Save.

Add a Payment

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

4. Click the **New Payment** shortcut at the top of the Order detail page. If any Payments have been entered for this Order, the information will be displayed in this section.

New Work Order	New Payment	Edit	On Hold	▼
----------------	-------------	------	---------	---

5. Complete the information on the New Payment page.
 - **Payment Amount (1):** Input the dollar total of the Payment amount.
 - **Non-Sufficient Funds (2):** The non-sufficient Funds checkbox can be manually checked in a non-sufficient notification from the financial institution or Andersen Corporate office is received, however this is not necessary. See Add a Business Adjustment section for processing Non-Sufficient Funds.

- **Payment Method (3):** Select the method of the payment from the dropdown.
 - Check deposits processed through the Tempus Payment Portal or sent to the Andersen Lockbox should be entered as “Check”. If you are re-running checks through the payment portal (which show as a Service Name of “PPD” on the Tempus report, use “ACH – Other”.
- **Check Number/CC (4):** Within this section you will enter in the check number or the last 4 digits of the customer’s credit card number.
- **Description (5):** Enter a short description when making corrections or enter “Paper check” if a check needed to be sent to lockbox.
- **Payment ID (6):** This is the system code from the payment portal for checks and credit cards, or the last 5 digits of the loan number for finance program payments.

NOTE: Do not enter in the full customer credit card number! This is non-compliant with the Payment Card Industry.

NOTE: For CORO locations, Cash is not an acceptable form of payment due to risks to the company.

6. Click **Save** when finished (7).

The screenshot shows a web form titled "New Payment: Deposit". It is divided into three main sections: Information, Payment Information, and System Information.

1. In the Information section, the "Payment ID" field is highlighted with a red box and the number 6.

2. In the Payment Information section, the "Payment Amount" field is highlighted with a red box and the number 1.

3. The "Payment Method" dropdown menu is highlighted with a red box and the number 3.

4. The "Check Number / CC" field is highlighted with a red box and the number 4.

5. The "Description" field is highlighted with a red box and the number 5.

6. The "Non-Sufficient Funds" checkbox is highlighted with a red box and the number 2.

7. The "Save" button in the System Information section is highlighted with a red box and the number 7.

7. Payments processed in the Tempus payment portal should be entered in rForce the following day. For example, a check or credit card payment processed on Monday should be entered in rForce on Tuesday.
8. Returning to the Order detail page, click on the Payments section shortcut to see a list of all Payments that have been added.
9. CORO Locations, in Invoice Notes, add “secured card on file” or “secured check on file”.

NOTE:

- Payments can be edited after they’ve been entered in rForce, if it’s within the same day. However, you cannot edit a payment someone else entered.
- If you can’t edit the payment, enter a negative payment to cancel out the one with the error and then enter a new payment with the correct information. DO NOT enter a refund unless a refund was actually given.
- Payments made through the rFinance platform should have a Payment Method of ACH – rFinance.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it’s helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter a payment:

Action Taken	Debit	Credit
Deposit Payment	Cash: 11300120	Consumer Deposits: 41700100
Final Payment	Cash: 11300120	Accounts Receivable: 12000100

Issue a Refund

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

To issue a refund, a Payment must have been previously received and entered into the system. If you are notified from General Accounting that a payment did not go through or there was a dispute (NSF), see below section on Business Adjustments for correct steps to process those.

CORO Locations – refer to the *Manual Check Refund Process Addendum* for steps on doing a manual check request.

1. Click on the Finance tab at near the top of the Order page.

The screenshot shows a horizontal navigation bar with several tabs: Details, Products, Finance, Work Orders, Purchase Orders, Change Orders, and Other. The 'Finance' tab is highlighted with a red rectangular box.

2. Click on **New** Refund.

The screenshot shows a header bar with a 'Refunds (0)' label on the left and a yellow 'New' button on the right. The 'New' button is highlighted with a red rectangular box.

3. Complete the information on the new Refund page.
 - **Amount (3):** Enter the amount to be refunded. *Do not use a negative number.*
 - **Refund Method (4):** Select the method that will be used to issue the refund.
 - Check refunds processed through the payment portal should be entered as “ACH – Other”.
 - Check refunds requested from Accounts Payable should be entered as “Check”.
 - **Description (5):** Add a brief description detailing the Refund reason. If a check was requested from Accounts Payable, a note should be added to the description saying “Paper check”.
 - **Refund ID (6):** This is the system code from the payment portal for checks and credit cards, or the last 5 digits of the loan number for finance program refunds.

The screenshot shows the 'New Refund' form with the following fields and annotations:

- Amount (3):** A text input field for the refund amount, highlighted with a red box and the number 3.
- Refund Method (4):** A dropdown menu for selecting the refund method, highlighted with a red box and the number 4.
- Description (5):** A text area for providing a description of the refund, highlighted with a red box and the number 5.
- Refund ID (6):** A text input field for the refund ID, highlighted with a red box and the number 6.
- Save (7):** A green button at the bottom right of the form, highlighted with a red box and the number 7.

Other visible fields include Refund Name, Order (02543867), Contact (Dannie Lee), Date (1/11/2023), and Store Location (0081 - Chicago South).

4. Click **Save** when finished (7).

5. On Order Detail page, verify the Refunds section is accurate.

Refunds (1) New		
Refund Name	Amount	Date
R-075308	\$141.67	1/11/2023
View All		

NOTE:

- Refunds can be edited after they've been entered in rForce, if it's within the same day. However, you cannot edit a refund someone else entered.
- If you can't edit the refund, enter a negative refund to cancel out the one with the error and then enter a new refund with the correct information. DO NOT enter a payment unless a payment was actually received.
- All credit card refunds should be associated with the specific original credit card. If that is not an option, you must do a Check Request.
- Refunds made through the rFinance platform should have a Refund Method of ACH – rFinance.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter a refund:

Action Taken	Debit	Credit
Refunding a Deposit	Consumer Deposits: 41700100	Cash: 11300120
Check Refund	Accounts Receivable: 12000100	Clearing: 41860000
Refunding a Final Payment	Accounts Receivable: 12000100	Cash: 11300120

Add a Business Adjustment

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

A Business Adjustment is used to tie specific financial transactions to the Order. The types of Business Adjustments are AR Write-Off, Install Adjustment, and Non-Sufficient Funds. See Types below for reasons why you'd use each type.

1. Click on the Finance tab near the top of the Order page.

2. Click on **New** Business Adjustment.

3. Complete the information on the New Business Adjustment page:
 - **Amount (1):** Enter the dollar amount of the Business Adjustment
 - **Type (2):** Choose the type of Business Adjustment
 - **AR Write-Off:** Should only be entered only if instructed by someone in Accounting. This will reduce the Amount Due, but not the Retail Total.
 - **Install adjustments:** Should only entered with approval from management. They may be used to reimburse customers for damages or in other situations determined by management. This will reduce the Amount Due, but not the Retail Total.
 - **Non-Sufficient Funds:** Should be entered if you have been notified by General Accounting that a customer's payment was an NSF or Chargeback. This is the only business adjustment type that will increase the Amount Due from the customer as if they hadn't made the payment.
 - **Date (3):** Enter the Date the Business Adjustment was created
 - **Description (4):** Add a brief description of the Business Adjustment
4. Click **Save** when finished.

A screenshot of the 'New Business Adjustment' form. The form is divided into two main sections: 'Information' and 'System Information'. In the 'Information' section, there are fields for 'Business Adjustment Name', 'Owner' (Seradette Mitchell), 'Order' (02576909), 'Contact' (Linda Kondrat), 'Amount' (labeled with a red box and '1'), 'Type' (dropdown menu, labeled with a red box and '2'), 'Date' (1/11/2023, labeled with a red box and '3'), and 'Description' (labeled with a red box and '4'). There is also a 'Management Approval' checkbox. The 'System Information' section includes a 'Store Location' dropdown (0080 - Chicago, IL) and a 'Sent to Bean Date' field. At the bottom of the form, there are three buttons: 'Cancel', 'Save & New', and 'Save'.

NOTE:

- Business Adjustments can be edited after they've been entered in rForce, if it's within the same day. However, you cannot edit a Business Adjustment someone else entered.
- If you can't edit the Business Adjustments, enter a negative Business Adjustment to cancel out the one with the error and then enter a new Business Adjustment with the correct information.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter business adjustments:

Action Taken	Debit	Credit
NSF - Deposit	Consumer Deposits: 41700100	Cash: 11300120
NSF - Final Payment	Accounts Receivable: 12000100	Cash: 1300120
AR Write-Off	AR - Allow for Doubtful Accts: 12900000	Accounts Receivable: 12000100
Install Adjustment	Retail Allowance Install Adj: 82200100	Consumer Deposits:41700100
Post-Recognized Install Adj	Retail Allowance Install Adj: 82200100	Accounts Receivable:12000100

ADD A FINANCE PROGRAM

Learning Objectives

This section explains how to:

- Add a Finance Program in rForce

Add a Finance Program

Follow the steps below to add a Finance Program to an Order.

1. On the Order Detail page, click on the Finance tab. Verify there are no existing Finance Programs associated with the Order.
2. Click on the **New** Order Financing button.

3. Within the New Order Financing Program page fill in the following fields:
 - **Order (1):** This field will automatically populate the associated Order number.
 - **Store Finance Program (2):** Use the search functionality to find the Finance Programs. Upon clicking the magnifying glass icon, a window will open. Search the Finance Programs available to your location and click on the name of the program to select it. The window will close, and the input field will display the selection.
 - **Amount Financed (3):** Input the dollar amount financed.
 - **Program Fees (4):** Program Fees are determined by the amount financed and populate automatically.
 - **Expiration Date (5):** Enter the expiration date of the Financing Program.
 - **Plan Number Verification (6):** Enter the last 5 numbers of the loan

A screenshot of the 'New Order Financing' form. The form has a title bar 'New Order Financing' and a section header 'Information'. It contains several input fields with red boxes and numbers indicating where to enter data:

- 1**: Order number field, containing '02576989'.
- 2**: Store Finance Program search field, containing 'Search Store Finance Programs...' and a magnifying glass icon.
- 3**: Amount Financed field.
- 4**: Program Fee field.
- 5**: Expiration Date field, with a calendar icon.
- 6**: Plan Number Verification field.

At the bottom of the form, there are three buttons: 'Cancel', 'Save & New', and 'Save'. The 'Save' button is highlighted in green and has a red box with the number **7** next to it.

4. Click the **Save** button (7): The Order Detail page will load. The newly added Finance Program will be displayed within the Financing section.

NOTES:

- The Store Finance Program, Amount Financed and Expiration Date must be updated if this information changes.
- If the correct finance program isn't listed in rForce, submit a Fetch ticket asking for the program to be added.

MANAGE ORDER DISCOUNTS

Learning Objectives

This section explains how to:

- Edit an existing Order Discount
- Create a new Order Discount
- Cancel an Order Discount

Edit an Existing Order Discount

Discounts are typically entered in rSuite during the quoting process and are populated as the Order is uploaded.

To edit a Discount, use the following steps:

1. Click on Order Discounts on the Financing tab. Click on the order discount number.

Order Discounts (4)			
Order Discount: Order Discount Number	Store Discount Name	Discount Amount	Status
OD-01763576	\$ off the Project	\$300.00	Applied

2. Click **Edit**.

The screenshot shows the 'Order Discount' details for OD-01763576. The 'Details' tab is active, showing fields for Order Discount Number, Order, Store Discount, Contact, Discount Amount, Per Unit Discount, and Discount Description. The 'Status' is 'Applied'. The 'Activity' tab is also visible on the right, showing 'Upcoming & Overdue' activities. The 'Edit' button in the top right corner is highlighted with a red box.

3. Enter the applicable information and click **Save**.

The screenshot shows the 'Edit OD-01763576' form. The form contains fields for Order Discount Number, Order, Store Discount, Contact, Discount Amount, Per Unit Discount, Discount Description, and System Information. The 'Save' button at the bottom right is highlighted with a red box.

Create a New Order Discount

1. Click on the Order Discounts shortcut or scroll down within the Order page.
2. Click **New** Order Discount.

3. Select the Store Discount (1) to apply. Use the search icon next to the field to lookup the available options.
4. Enter the Discount Amount (2) or the Per Unit Discount (3).
5. Click **Save** (4).

A screenshot of the 'New Order Discount' form. The form is titled 'New Order Discount' at the top. It is divided into three main sections: 'Information', 'Discount Details', and 'System Information'.
1. In the 'Information' section, the 'Store Discount' field is highlighted with a red box and the number '1'. It contains the text 'Search Store Discounts...' and a search icon.
2. In the 'Discount Details' section, the 'Discount Amount' field is highlighted with a red box and the number '2'. It contains the text '\$0.00'.
3. In the 'Discount Details' section, the 'Per Unit Discount' field is highlighted with a red box and the number '3'. It is currently empty.
4. At the bottom of the form, the 'Save' button is highlighted with a red box and the number '4'. There are also 'Cancel' and 'Save & New' buttons.
Other fields visible include 'Order Discount Number', 'Order' (with value 02576989), 'Contact' (with value Linda Kondrat), 'Status' (with value Applied), 'rSuite Id', and 'Store Location' (with value 0080 - Chicago, IL).

Cancel an Order Discount

1. Open the discount you want to cancel by clicking on the discount number.

The screenshot shows a software interface with a top navigation bar containing tabs: Details, Products, Finance (highlighted with a red box), Work Orders, Purchase Orders, Change Orders, and Other. Below the tabs are sections for Payments (0), Refunds (0), Business Adjustments (0), and Order Financing (1). The Order Financing section contains a table with columns: Order Financing: Order Financing Record #, Store Finance Program Name, and Plan Number. Below this is a section for Order Discounts (1) with a table containing columns: Order Discount: Order Discount Number, Store Discount Name, and Discount Amount. The first row in the Order Discounts table has the value 'OD-02239312' in the first column, which is highlighted with a red box. The second column contains 'Twin Cities Offer' and the third column contains '\$465.00'. A 'View All' link is visible at the bottom right of the table.

Order Financing: Order Financing Record #	Store Finance Program Name	Plan Number
OrderFinancing-765299	rFi - S100617 - 6m Def Interest, Def Pay, 17.99...	100617

Order Discount: Order Discount Number	Store Discount Name	Discount Amount
OD-02239312	Twin Cities Offer	\$465.00

2. Change the status of the discount from Applied to **Cancelled**.
3. Click **Save**.

The screenshot shows the 'Order Discount' details form for 'OD-02239312'. The form has a 'Related' tab and a 'Details' tab. The 'Details' tab is active. The form contains several fields: 'Order Discount Number' (OD-02239312), '*Order' (03425178), 'Store Discount' (Twin Cities Offer), and 'Contact' (Search Contacts...). Below these is a 'Discount Details' section with 'Discount Amount' (\$465.00) and 'Status' (Applied). The 'Status' dropdown menu is open, showing options: '--None--', '✓ Applied', and 'Cancelled'. The 'Cancelled' option is highlighted with a red box. Below this is a 'Discount Description' section with a text area and a note 'This field is calculated upon save'. At the bottom is a 'System Information' section with 'Created By' (Melissa McFarlane, 9/5/2023 7:48 AM), 'Last Modified By' (Melissa McFarlane, 9/5/2023 7:48 AM), 'rSuite Id', and 'Store Location' (Search Accounts...). At the bottom right of the form are 'Cancel' and 'Save' buttons, with the 'Save' button highlighted with a red box.

SCHEDULE TECH MEASURE WORK ORDERS

Learning Objectives

This section explains how to:

- Schedule a Tech Measure Work Order via the Order
- Schedule a Tech Measure Work Order via the FSL Calendar
- Un-schedule a Tech Measure Appointment

Automatic Work Order Creation

When the rForce Process Flow is followed, Work Orders are automatically created when the Order updates statuses.

When a Draft order is created, a Tech Measure Work Order should get automatically generated and can be viewed from both the Opportunity and the Order.

Schedule Tech Measure Work Orders from the Order

1. From the Order, select the Tech Measure Work Order under Work Orders.

Work Order Number ↑	Work Order Record Type	Status	Scheduled Start T...	Scheduled End Ti...	Primary Resource...	Total Labor Cost
04952165	Tech Measure	To be Scheduled				
04952185	LSWP	New				

If you are needing a work order that is not there, you can create one by clicking the New Work Order button near the top right of the screen. However, most Work Orders that need scheduling should auto-populate based on Salesforce status.

New Work Order

2. Under Chatter, choose **Time Slots**. Here, if needed, you can edit the number of resources, your appointment duration, date range, and change the territory.

NOTE: If multiple resources are being used, make sure one is marked as Primary.

Chatter Activity Files

Post Time Slots Book App... New Labor New Task More

03844591

Create new service appointments

Work Type: Install

Resources Needed: 1

Duration: 1

☐ Allow Multi-day

Earliest Start: Aug 22, 2022

Due date: Aug 26, 2022

Address: 1920 County Rd CW, Minneapolis, 55113

Territory: Twin Cities, MN (0077)

Get Time Slots

3. Click **Get Time Slots**. It will show the possible time slots available for the date range and resources you have chosen.
4. Choose a time, and then choose a resource if necessary. Click **Schedule**.
The green check mark verifies the appointment has been scheduled, but it's best to Refresh the screen and confirm.

5. Confirm the Tech Measure Work Order status has changed to Scheduled & Assigned and the proper date, time and Project Manager have populated.

id	Work Type Measure
	Status Scheduled & Assigned
	Primary Tech Measure Corey Spomer
	Scheduled Start Time ⓘ 4/7/2023 12:00 PM
	Scheduled End Time ⓘ 4/7/2023 1:30 PM

6. Edit the **Remote Measure** field to the correct response.
 - If it was a Remote Measure, choose "Remote Measure"
 - If it was not called in by the DC, choose "Not Called In"
 - If it was called in but could not be performed remotely, choose one of the other options, using "Remote Tech Unavailable" when applicable.

Scheduled Start Time ⓘ	9/2/2024 2:30 PM
Scheduled End Time ⓘ	9/2/2024 3:30 PM

Primary Tech Measure: A blank value to Joe

NOTE: You can choose to enter a date in the Confirmed Appt w/ Customer field if you want to note the day the homeowner confirmed the appointment.

Un-schedule a Tech Measure Appointment

To **UN-SCHEDULE** a Tech Measure appointment if needed:

1. Go to the FSL Calendar and find the appointment.
2. Right click with your mouse on the appointment and select "un-schedule." This removes the appointment from the calendar.

Tech Measure Scheduling Tips:

- Be aware of job size and geographical location when scheduling multiple appointments per day.
- Scheduling and how to pick resources is specific to each location and type of Work Order. Additional training may be needed at the local level.
- It's recommended to give the homeowner a reminder of all appointments. Confirm reminder process with local leadership.

Remote Measure Reporting

A Remote Measure occurs when the Sales Consultant calls a Measure Tech/IPM from the home and is able to perform the measurement appointment remotely. Follow the below step to make sure reporting for Remote Measure appointments is accurate.

When scheduling any Tech Measure Work Order, make sure you are making a selection under the **Remote Measure** section.

- If it was a Remote Measure, choose “Remote Measure”.
- If it was not called in by the DC, choose “Not Called In”
- If it was called in but could not be performed remotely, choose one of the other options, using “Remote Tech Unavailable” when applicable.

SEND AN EMAIL FROM RFORCE

Learning Objectives

This section explains how to:

- Send an email from rForce

You can send an email to a customer from rForce and it will keep record of the sent email on the order.

1. Click the email icon under the Activity section.

2. Type the contact into the To section and select the correct email address. Make sure the From section is correct.

3. Enter a Subject, type your message in the email body, then press **Send**.

The email record will show up under Activities. You can also save and use templates by clicking the Templates button.

NOTE: Email replies will send to the Outlook address that was noted in the From section, not back to rForce.

ATTACH IPM/TECH MEASURE PAPERWORK

Learning Objectives

This section explains how to:

- Receive IPM/Tech Measure Paperwork
- Upload IPM/Tech Measure Paperwork

After the Technical Measurement appointment, your IPMs/Measure Techs will email their completed Tech Mapp paperwork when it is ready to be ordered.

Receive IPM/Tech Measure Paperwork

Your store should have a shared group email address where the IPMs/Measure Techs can send their Tech Mapp paperwork to. They should submit the following paperwork:

- Tech Mapp Package (or individually, these documents: Installer Package, OMS, Materials Checklist, Installation Invoice, Buyer Acknowledgement)
- TechMapp Uploader zip folder

If applicable, you also need these documents:

- Addendum & Addendum Cost Responsibility, if any
- Bay form, if any
- Specialty Window information
- Entry door information

Upload Tech Measure/IPM Documents

1. If you have all of the necessary paperwork, find the order in rForce by searching for the address found on the paperwork. If the IPM/Measure Tech put notes in the email body, take the email body itself and "PRINT TO PDF". Save to your desktop and rename to IPM EMAIL COMMUNICATION.
2. Drag and drop or upload all the attachments to the Files section of the order, including the IPM EMAIL COMMUNICATION.

(If applicable for your store, check the Materials Checklist for any materials noted as CUSTOM and address the custom material needed to be ordered at this time).

NOTE: This is a good time to check and manage the other Work Orders that are open on the order. If there is HOA, Permits, Lead Testing (LSWP) that needs to be addressed, you can check those statuses to see if you can move forward.

COMPLETE TECH MEASURE WORK ORDER

Learning Objectives

This section explains how to:

- Complete a Tech Measure Work Order
- Add Tasks or Install Notes

Complete Tech Measure Work Order

1. Once everything is complete from the IPM/Tech Measure and you have all of the paperwork, click the Tech Measure Work Order number to open the Work Order.

3 items • Sorted by Work Order Number • Updated a few seconds ago

	Work Order Nu... ↑ ▾	Work Order Record T... ▾	Status
1	04978198	Tech Measure	Scheduled & Assigned
2	04985423	Permit	New
3	04985424	LSWP	New

2. Click the pencil to change the status to **Appt Complete/Closed**. Click **Save**.

Work Type	Measure	
Status	Scheduled & Assigned	

The status of the order should now be Ready to Order and will create an Installation Work Order.

3. Upload the Installer Package (or Tech Mapp Package) to the Install Work Order. You may also want to upload the IPM Email Communication, Materials Checklist, & Installation Invoice to the Install Work Order as well (Confirm with your Supervisor). This will allow visibility to the Installers if they are using FSL Mobile.
4. You will upload the TechMapp Uploader json file into the TechMapp Upload area and/or configure product manually. (See sections **Tech Mapp Uploader** and **Adding and Configuring Products**)

Add Tasks or Install Notes

After getting all documents uploaded and the Status changed to Ready to Order, it's important to either create a Task or add an Install Note to manage Orders as they flow through the Ready to Order status.

Here are some examples of wording to be used in your Tasks or Install Notes:

- NSPR SUBMITTED - Means you have sent the NSPR request to factory pending approval
- BAY FORM SUBMITTED - Means you sent the bay form from IPM to Bayworld for approval
- SPR REQUEST SUBMITTED - Means you sent the special product request for patio door custom to RBA for approval
- ORDER TO BE BUILT/CONFIGURED - Means that you still need to build/configure the units
- ORDER TO BE VERIFIED - Means that you want the order to be reviewed by another person before submitting
- ORDER TO BE RELEASED - Means order has been verified and is approved to be submitted to factory and you just need to release the PO

You can work with your Supervisor to get Reports/Dashboards you can use to monitor these jobs.

CONFIGURE & ADD PRODUCTS

Learning Objectives

This section explains how to:

- Manually Configure Existing Products on an Order
- Add New Products to an Order

Products should be configured when the Order status is Ready to Order. If possible, use the TechMapp Uploader to configure products (see Tech Mapp Uploader section below).

Manually Configure Existing Products on an Order

1. Select the Products quick link on the Order Details page. Click on the small arrow to the right of the Product to open the dropdown menu and then select **Edit**.

	Details	Products	Finance	Work Orders	Purchase Orders	Change Orders	Other
	Store Location...	**** Customer ...	1	\$0.00	\$0.00	\$0.00	
101	Gliding/Gildin...	1	\$3,872.00	\$3,872.00	\$0.00		
102	Gliding/Gildin...	1	\$3,872.00	\$3,872.00	\$0.00		

2. Add in the detailed Product information received from the IPM/Tech Measure appointment into the fields in the Window Configuration section.

Window Configuration

* Width Inches: 40

* Width Fraction: Even

* Height Inches: 50

* Height Fraction: Even

* Exterior Trim: None

* Checkrail Style: Modern

* Sill Angle: FS

* Sash Ratio: 1:1

Mfg Mull Sequence

* Exterior Color: Terratone

* Lifts Pulls: 1

* Locks Sash: 1

* Hardware Style: Standard

* Hardware Finish: Standard

* Screen Type: TruScene

Screen Size: -Select-

3. After the Product is configured, clicking **Save and Close** at the bottom of the page to bring you back to the Order. Clicking **Save & View** will save the unit, then clicking **Next** will bring you to the next unit to be configured.

Save and View Save and New Save and Clone Save and Close Cancel

4. If you need to edit something you've already saved, click the **Edit** button and follow steps above, changing what's needed and click **Save and Close**. You can do this up until the product has been ordered/released.

Add New Products to an Order

1. If a Product needs to be added to the Order, click on **Add Product** at the top of the Order Products section.

The screenshot shows the top navigation bar with tabs: Details, Products, Finance, Work Orders, Purchase Orders, Change Orders, and Other. Below the navigation bar, there is a section titled 'Products (4)' with a blue icon. To the right of this section, the 'Add Product' button is highlighted with a red rectangular box.

2. Click on the Product dropdown and begin typing the Product to be added. The smart lookup function will display Products as you type. Select the desired Product by clicking on it.

The screenshot shows a dropdown menu titled 'Main Section'. Under the 'Product' heading, there is a search input field containing 'double-hung'. Below the search field, two product options are listed: 'Double-Hung Window' and 'Double-Hung Window-DG'. The 'Double-Hung Window-DG' option is highlighted with a red rectangular box. Below the product list, there is a section titled 'Window Configuration'.

3. The Window Configuration page will open with the applicable fields displayed.

The screenshot shows the 'Window Configuration' page. It contains several fields for configuring the product:

- *Width Inches: 40
- *Width Fraction: Even
- *Height Inches: 50
- *Height Fraction: Even
- *Exterior Trim: None
- *Checkrail Style: Modern
- *Sill Angle: FS
- *Sash Ratio: 1:1
- Mfg Mull Sequence: (empty field)
- *Exterior Color: Terratone
- *Lifts Pulls: 1
- *Locks Sash: 1
- *Hardware Style: Standard
- *Hardware Finish: Standard
- *Screen Type: TruScene
- Screen Size: --Select--

4. Configure the new Product with all needed information and click one of the following when complete:

- **Save and Close** will save the unit and return user to the Order Details Page.
- **Save and New** will allow the user to add another Product.
- **Save and Clone** will duplicate the Product and all fields in a new Order Product page.
- **Close** will close the current Product page without saving any changes.

The screenshot shows the bottom of the Window Configuration page. It contains five buttons: 'Save and View', 'Save and New', 'Save and Clone', 'Save and Close', and 'Cancel'. Each button has a blue icon to its left.

NOTES:

- When adding miscellaneous product due to a Change Order of Addendum, use the product type of "Change Order" for your line item.
- For units with NSPRs, it is best to save the line item once before checking the NSPR box to ensure makeability is accurate

- Anytime you are wanting to cancel a line and add a new one at the same price, you must expand and add all sublines to the Unit Price. For example, unit 109a is actually \$9143 (\$7580+\$995+\$568).

Unit Id	Product	Purchase ...	Quantity	Unit Price	Total Retai...
109 a	Specialty Window		1	\$7,580.00	\$7,580.00
	Store Location ...		1	\$995.00	\$995.00
	Store Location ...		1	\$568.00	\$568.00
109 B	Fixed Window		1	\$3,359.00	\$3,359.00

Correct Process for Unmatched rSuite Charge (Misc. Line Item) Units:

- Cancel the “Unmatched rSuite/Store Location”/Miscellaneous line item, making note of the Unit Price assigned to the line item.
- Add a new product line item with the correct, recognizable Product.
*Reminder to enter the correct Unit ID on the new line item.
- Enter the Unit Price to the new line item that was on the original “Unmatched RSuite/Store Location”/Miscellaneous line item (that you cancelled).

After these steps are completed, it should look similar to this.

3. Under Details, type the information as noted below:

Project Type: Residential Replacement or Residential Remodeling

Key Reminders:

- Residential Replacement or Residential Remodeling = is utilized for billable orders and stock orders
- Service = is utilized for non-billable and billable service replacement reorders

Purchase Order: Must be your rForce Purchase Order info (Must be identical to what you see in rForce)

Key Reminder:

- This field has a character limit of 30. Kindly ensure your entry doesn't exceed this limit as it will trigger an error, and your order will be returned.

Customer PO: Must be your rForce Purchase Order info (Must be identical to what you see in rForce)

Key Reminder:

- This field has a character limit of 30. Kindly ensure your entry doesn't exceed this limit as it will trigger an error, and your order will be returned.

Customer Job Number : Is your Unique Identifier from the original sold order in rForce.

- If your sold order doesn't have this information than it was before its time, and you can leave it blank.

9. Once you have verified the information is correct, you may press Submit Order.

Actions Submit Order

NOTE: If the Submit button says Submit to Engineering, that means there was a non-standard item on the order that you made an Instructions to Manufacturer note about. Press that button and you will get back a quote to review from your Retail Experience Coordinator (REC) within a few days via email. Once you look that over and it looks correct, you must go back into IQ+ and submit the order.

*Check the Quote has hardware and any other parts and pieces that you may have had on the original order. Often these parts need to be added back into IQ+ before you press the final Submit Order button.

Tips:

Always type Room Location field (i.e. 105 kitchen)

Glass/Grill Spacer color – always stainless

Check with your location to see you want your doors to be unassembled

Always screen match exterior color

Instructions to manufacturer – choose and type note if there's anything NON-STANDARD

Attach "Abbreviated Quote Report – No Price" to rForce

Order Bay Windows

Bay windows are ordered through Bayworld.

Bay windows may come over from rSuite as unrecognizable Miscellaneous charges in rForce. The following steps must be taken to correct this, either at Booking or Configuring. You will not be able to create a PO for these Vendors until you do these steps.

1. Cancel the "Store Location"/Miscellaneous line item, making note of the Unit Price assigned to the line item.
2. Add a new product line item with the correct, recognizable Product (Use **Bay/Bow** for Bayworld products).
*Reminder to enter the correct Unit ID on the new line item.
3. Enter the Unit Price to the new line item that was on the original "Store Location"/Miscellaneous line item (that you cancelled).

After these steps are completed, it should look similar to this:

Details	Products	Finance	Work Orders	Purchase Orders	Change Orders	Other
Products (9)						
Unit Id	Product	Line Item ...	Purchase ...	Quantity	Unit Price	Total
100	Bay/Bow		AM1248900P	1	\$4,590.00	
100	Store Location ...	Remove Existin...		1	\$530.00	
100bowa	Fixed Window		AM1257328P	1	\$2,275.00	
100bowb	Casement Wind...		AM1257328P	1	\$2,484.00	
100bowc	Casement Wind...		AM1257328P	1	\$2,484.00	
100bowd	Casement Wind...		AM1257328P	1	\$2,484.00	
100bowe	Fixed Window		AM1257328P	1	\$2,275.00	
> 101	Gliding/Gliding-...		AM1257328P	1	\$4,686.00	
> 102	Gliding/Gliding-...		AM1257328P	1	\$4,686.00	
TechMapp Upload Review (0)						
Cancelled Products (1)						
Unit Id	Product	Purchase ...	Quantity	Unit Price	Total Retai...	Who
100	Store Location ...		1	\$4,590.00	\$4,590.00	

NOTE: No full unit should be added with a \$0 Unit price. This refers to the situation noted above, but also when adding units from a Change Order or Addendum.

In rForce, the windows in the bay frame should have the same Unit ID as the bay window, but add A, B, C, etc as needed. Example:

105	Bay/Bow	Bay/Bow Frame...	AT806020P
> 105BayA	Casement Wind...		AD809493P
105BayB	Picture Window...		AD809493P
> 105BayC	Casement Wind...		AD809493P

After you've completed the above steps in rForce, you will need to follow the below steps to order the Bay/Bow.

1. Complete the Bay World Order Form provided to you. If you need a form, contact Misty Smith (msmith@bayworldmfg.com).

You must **ALWAYS** fill out:

- Store Location Number
- Contact Name (the person emailing the order form)
- Customer Name
- Purchase Order Number (if it is needed for the invoice to be paid)
- Quantity
- Bay/Bow Width & Height
- Jamb Depth
- Wood Type
- Seat Design
- Seat Type if Seat Design is R-9 or R-21
- Edge Banding to be marked

Options each bay/bow automatically gets that does not need to be indicated:

- Renewal Interior Window Stops – Pre-Cut Stops with Miters
- Side Jamb Stops – 1/2" x 3/4" Shoe Mould
- Renewal Cable Supports
- Weatherization

2. Email the completed form to msmith@bayworldmfg.com.
3. You will get an Acknowledgement from Bay World. (If you have not received an Acknowledgement within two business days, check with msmith@bayworldmfg.com).

On the Acknowledgement:

- The INVOICE number is the order confirmation number. Reference this number when communicating questions to Bay World. You will enter this number as the Confirmation Number in rForce.
- The Pick-Up Date is the date it is ready to be picked up from Bay World by RbA. Work with your REC to determine estimated delivery date to your facility.
- Near the bottom, it lists EXACT WINDOW SIZES FOR YOUR BAY/BOW. This is the size you are to make the RbA windows so they will fit in the bay frame (Make Size).
- If it's a 1:1:1 ratio, all windows will be the same size. If center window is a different size, you will get two different sizes as shown in the example below. (In this example, the flankers should be ordered at 25 13/16 wide and the center window should be ordered at 40 1/16 wide):

EXACT WINDOW SIZES FOR YOUR BAY / BOW WINDOW	
2 Windows	25 13/16 X 45 3/8
1 Window	40 1/16 X 45 3/8

4. Once you get your Confirmation, make sure the information is correct and matches your Order Form. Then in rForce, you must enter the Total, an Estimated Ship Date, and the Confirmation Number (INVOICE Number from you Acknowledgement) so your PO will flip to **Confirmed** status.

NOTE: It is recommended you create your Renewal by Andersen window PO BEFORE you Confirm your Bay World PO to ensure the statuses stay correct on the rForce Order.

Order Provia Entry Doors

If your location sells Provia Entry Doors, they are ordered through a site from Provia's website called "EntryLink". Provia Entry Doors come over from rSuite as unrecognizable Miscellaneous charges in rForce. The following steps must be taken to correct this, either at Booking or Configuring. You will not be able to create a PO for these Vendors until you do these steps.

1. Cancel the "Store Location"/Miscellaneous line item, making note of the Unit Price assigned to the line item.
 2. Add a new product line item with the correct, recognizable Product (choose **Provia Entry Door**).
- *Reminder to enter the correct Unit ID on the new line item.
3. Enter the Unit Price to the new line item that was on the original "Store Location"/Miscellaneous line item (that you cancelled).

After these steps are completed, it should look similar to this:

Details Products Finance Work Orders Purchase Orders Change Orders Other								
Products (3)								
Unit Id	Product	Line Item ...	Purchase ...	Quantity	Unit Price	Total Retail...	Wh	
	Store Location ...	Paint/Stain		1	\$812.00	\$812.00		
	Store Location ...	Interior Trim De...		1	\$191.00	\$191.00		
101	ProVia Entry Do...		AD1887321P	1	\$42,918.00	\$42,918.00		
TechMapp Upload Review (0)								
Cancelled Products (1)								
Unit Id	Product	Purchase ...	Quantity	Unit Price	Total Retail...	Wholesale...	Total	
101	Store Location ...		1	\$42,918.00	\$42,918.00		\$0.0	

NOTES:

- No full unit should be added with a \$0 Unit price. This refers to the situation noted above, but also when adding units from a Change Order or Addendum.
- Provia storm doors and Provia entry doors should NOT have two separate line items if they are in the same opening. Your Sales teams should be made known of this, but if it happens, correct this when doing the above step by adding the storm door unit price and entry door unit price together and putting the total on one Provia Entry Door line.

After you've completed the above steps in rForce, you will need to follow the below steps to order the Provia Door.

1. Go to provia.com and click For the Pros -->For Current Provia Customers-->entryLINK.

2. Log in the entryLINK. See your Supervisor if you need access.
3. You can click Search All Orders if using a Quote that a Design Consultant has already started (or click Start New Order if you are building from scratch).

[Start New Order](#) | [Search All Orders](#) | [Open RMA's](#)
[Active Order Dashboard](#) | [Order Fulfillment Prediction Model](#)

4. You can search by quote/order number or Job Name (both found on the top of the Spec Sheet the Design Consultant should provide.

TECHMAPP UPLOADER

Learning Objectives

This section explains how to:

- Upload TechMapp Uploader File
- Add product from TechMapp Uploader

The TechMapp Uploader is a feature that makes a comparison between the original “sold.json” file that was uploaded to rForce at time of booking, and the “.measured.json” file that is generated by TechMapp upon the completion of the measure appointment. This step adds the IPM’s sizes into the line items.

NOTE: The Tech Mapp Uploader will not work on orders that had a Change Order after the original “sold.json” file was uploaded, if the proj file the IPM uses is different than the original.

NOTE: if the Tech Mapp Uploader has an error and doesn’t work, you can still manually enter the line item details as needed. (In this case, refer to the Adding and Configuring Product section above.)

Upload TechMapp Uploader File

1. Right click on the TechMapp Uploader Zip File previously downloaded and select “Extract All”.

2. Open the new folder and select the measured.json file.

3. Drag and Drop or Upload the TechMapp Uploader measured.json file into the TechMapp Upload area. Once you see the json file listed, click **Process**.

Under the Products tab, you will see the TechMapp Upload Review section. The units listed under this section are only units that had changes made from the IPM (other than size).

- You can click Resolve All and it will walk you through each line item under the TechMapp Upload Review section. You can also Resolve each line individually if you prefer, by clicking the down arrow on each line and choose Resolve.

The screenshot shows the 'Products' tab selected in the top navigation bar. Below the navigation bar, there is a table of products with columns: Unit Id, Product, Line Item..., Purchas..., Quantity, Unit Price, Total Ret..., Wholesa..., Total W..., and Variant The table lists several products, including 'Double-Hung...' and 'Picture Wind...'. Below the products table, there is a section titled 'TechMapp Upload Review (2)' with a 'Resolve All' button. A dropdown menu is open next to the 'Resolve All' button, showing options: 'View' and 'Resolve'.

- From this screen, you can make any changes you'd like, however, most fields and changes from the Addendum should be pre-populated if you Resolve the lines under the TechMapp Upload Review. If you do not Resolve the lines within this section, you will have to manually input the sizes and edit the changes on the line items as needed. Click **Save and Next** to save and go to the next line item in the Resolve section, or **Save and Close** to get back to Order page.

The screenshot shows the 'TechMapp Uploader Review (1 / 3) Configuration Mismatch' screen. The form is titled 'Main Section' and contains the following fields and options:

- Product:** Casement-Triple Window
- Unit Id:** 203
- Frame Type:** Full Frame
- Quantity:** 1
- Exterior Trim:** None
- Sash Ratio:** 1:1:1
- Mfg Mull Sequence:** (empty)
- Exterior Color:** Canvas
- Interior Color:** White
- Glazing:** 1/13
- Width Inches:** 71
- Width Fraction:** 3/4
- Height Inches:** 46
- Height Fraction:** 1/2
- Sash Operation:** Left Vent / Stat / Right Vent
- Hardware Style:** Standard
- Hardware Finish:** Standard
- Hardware Option:** Wide Opening Hinge
- Corrosion Resistant Hardware:** (checkbox)
- Screen Type:** TruScene

At the bottom of the form, there are four buttons: 'Save and Next', 'Discard and Next', 'Skip and Next', and 'Close'.

Important!

Once all of the items have been resolved under the TechMapp Upload Review and/or all line items have been configured, you must check that the Combined Retail Total is what it is supposed to be (Original Contract Price +/- Addendum total. Add a "Change Order" line item for the difference if there is a discrepancy.

Button Actions

- **Resolve All** – Located in the TechMapp Upload Review section. This initiates the TechMapp Upload Review process
- **Save and Next/Close** – Located within the TechMapp Uploader Review screen(s). Saves the current record and proceeds to the next record in TechMapp Uploader Review or completes the session if it is the final record.
- **Cancel Product and Next/Close** – Located within the TechMapp Uploader Review screen(s). Cancels the Product and move the product to the Cancelled Products section when complete and proceeds to the next record in TechMapp Uploader Review or complete the session if it is the final record.
- **Discard and Next/Close** – Located within the TechMapp Uploader Review screen(s). Removes the current record and proceeds to the next record in TechMapp Uploader Review or completes the session if it is the final record. Record is removed from the TechMapp Upload Review section.
- **Add Product and Next/Close** – Located within the TechMapp Uploader Review screen(s). Removes the current record and proceeds to the next record in TechMapp Uploader Review or completes the session if it is the final record. Record is removed from the TechMapp Upload Review section.
- **Skip and Next** – Located within the TechMapp Uploader Review screen(s). Does not save any updates to the current record and navigates the user to the next record in the TechMapp Uploader Review. Record is not removed from the TechMapp Upload Review section.
- **Close** – Located within the TechMapp Uploader Review screen(s). Closes the current TechMapp Uploader Review.

Additional Notes:

1. For Acclaim units that have not changed – Techmapp Uploader will add final measurements during the TechMeasure file upload Process.
2. For Acclaim and Ensemble units that have been cancelled – Techmapp Uploader will create a flagged line item, informing the user to resolve the cancelled product. The TechMapp Upload Status will be “Product Removed” in the TechMapp Upload Review section.
3. For Acclaim and Ensemble units that have been added -Techmapp Uploader will create a flagged line item, informing the user to resolve the added product. When the user confirms the addition of the new/replacement unit, Techmapp Uploader will populate final measurements and Unit attributes. The TechMapp Upload Status will be “Product Added” in the TechMapp Upload Review section.
4. For Acclaim units that have changed measurements or attributes - Techmapp Uploader will create a flagged line item, informing the user to resolve the configuration mismatch. For these units, the user will need to review the changed attribute(s) and confirm the final measurements. The TechMapp Upload Status will be “Configuration Mismatch” in the TechMapp Upload Review section.
5. For Ensemble Units that have changed measurements or attributes – TechMapp Uploader will automatically update the attributes and measurements during the TechMeasure file processing. There will not be a TechMapp Upload Status of “Configuration Mismatch” for Ensemble Products since they are stored in a cloud application outside of rForce.
6. For units with makeability errors - Techmapp Uploader will create a flagged line item. The TechMapp Upload Status will be “Configuration Error” in the TechMapp Upload Review section.

Once all items have been resolved and you’ve checked the Combined Retail Total for accuracy, you may move on to the next step (see Creating a Product Purchase Order).

MULLIONS

Learning Objectives

This section explains:

- How to enter mullions and mulled units in rForce
- Mull configuration guidelines, tips & options
- Examples of Mull Configurations

Windows can be mulled together in the factory. For specific guidelines and more detailed instructions, reference The Link and the Spec & Tech manual. Though your IPM/Tech Measure should provide the measurements needed, it is best to check their math before starting.

How To Enter Mullions & Mulled Units

We will show an example of DG mulled next to another DG (201: a-b).

9. For Unit 1, enter the Unit ID + the letter "a".

▼ Main Section

Product: Double-Hung Window-DG

Product Description: Double Hung Window (DG)

Quantity: 1

Unit Id: 101

Frame Type: Full Frame

DP Upgrade: ☐

Insert Frame: ☐

Positive Force: --Select--

Negative Force: --Select--

▼ Window Configuration

*Width Inches: 36

*Width Fraction: 3/4

*Height Inches: 58

*Height Fraction: 1/2

*Exterior Trim: None

*Checkrail Style: Traditional

Sill Angle: --Select--

*Sash Ratio: 1:1

Mfg Mull Sequence: 101a

*Exterior Color: White

*Locks Sash: 1

*Hardware Style: Standard

*Hardware Finish: Satin Nickel

*Screen Type: TruScene

Screen Size: --Select--

10. For Unit 2, enter the Unit ID + the letter “b”.

▼ Main Section

Mfg Mull Sequence: 101b

*Exterior Color: White

*Locks Sash: 1

*Hardware Style: Standard

*Hardware Finish: Satin Nickel

*Screen Type: TruScene

Screen Size: --Select--

11. In addition to the windows, you must have a Mullion line (with the same Unit ID number as the windows) in order for windows to be mulled in the factory. For the Mullion Line, choose the correct Mfg Mull Sequence.

▼ Main Section

Product:

Quantity: 1

Unit Id: 101m

▼ Window Configuration

*Width Inches: 74

*Width Fraction: Even

*Height Inches: 58

*Height Fraction: 1/2

*Exterior Trim: None

*Mfg Mull Sequence Mullion: 201: a-b

*Exterior Color: White

*Interior Color: --Select--

NOTE: Since the windows are mulled side by side, the heights of both units and the mullion heights are the same. The mullion width equals the width of both units added together + 1/2 inch per mull.

Mullions Guidelines & Tips

- Muller units must have the same joining dimensions
- Units muller on top of each other (Vertically) must have the same width
- Units muller side by side (Horizontally) must have the same height
- Muller combinations cannot exceed 5 units
- The maximum mull combination is 144" x 84"
- Two-way combinations (groupings) cannot exceed a maximum of 40 sq ft according to the formula (widthxheight)/144
- Units being muller should be sequenced from left to right, or top to bottom from the exterior
- Mullions must be ordered and shipped in the orientation they will be installed
- Only like full frame and universal frame units can be factory muller
- Insert units cannot be factory muller
- Standard windows can be muller to standard units, for example DB-DB or FW/CS
- Specialty windows can be factory muller to specialty windows only. Specialty windows to non-specialty windows must be muller in the field. Specialty to specialty requires a NSPR
- Each unit being muller must be entered on separate lines
- Muller lines must be a separate line item on the order
- The number of the mfg mull sequence should proceed the letter (example: 1a)
- Units being muller together should contain a number and letter configuration in the Mfg Mull Sequence box (example: 1a)
- Units being muller together should have the same floor plan ID number (example unit 001 = 1a, unit 101 = 101b)
- If you're ordering multiple mullions on an order, each muller group should have its own mfg mull sequence number. Do not use the same mfg mull sequence for more than one muller on the order
- A dash "-" signifies the windows are to be muller next to each other (201a-b)
- A slash "/" signifies the units are muller on top of one another (201a/b)
- A combination mull will have a dash and slash 303a-b/c (meaning a is muller next to b and together they are muller over c)
- The muller line will contain the mull sequence to define layout of units. These instructions are used and are essential to our manufacturing processes
- Factory mulls have a 1/2" muller spacing:
 - If muller units next to each other, add the unit width's together plus 1/2" for each muller.
 - Example: unit 1a width= 45", unit 1b width 45" = 90, then add .5 for the muller joining piece= 90.5 total muller width
 - If muller units on top of each other add the unit height's together plus the 1/2".
 - Example: unit 1a height= 50", unit 1b width 30"= 80, then add .5 for the muller joining piece= 80.5 total muller height
 - The muller line dimensions should be the total of the units, plus the 1/2" for each mull depending on the if its vertical, horizontal or a combination muller.
- Enter the remaining information for each window: width and height, exterior color (which should be the same for all windows in the mull), and the type(s) of glazing desired for each sash in each window.
- Brickmould should be applied to the Muller line, not the individual units
- Special options are available for mullions lines, for example you can select a different exterior trim color
- Think of the numbers as "codes" not unit IDs, related to the unit ID. The letters and -/ determine the placement of the muller. (ex. 201a-b for a mull sequence does not mean the unit number is 201)

Mull Configuration Examples

Two Window Mulls		Three Window Mulls	
	201: a-b		202: a/b
			301: a-b-c
			302: a/b/c

			525: a-(b/c)-d-e
			526: (a/b)-c-d-e

NSPRS

Learning Objectives

By the end of this section, you will know:

- NSPR Guidelines
- How to Complete & Submit the NSPR Form
- NSPR Tips & Examples

“NSPR” stands for Non-Standard Product Request.

What constitutes an NSPR?

- Special grille patterns
- Custom shapes
- Grille alignments
- Other situations not buildable in rForce/ROP

More resources regarding NSPRs can be found on **The Link**.

NSPR guidelines

- Verify you are using the current version of NSPR form.
- Verify the form is completely filled out with all information (reference NSPR Policy).
- Each unit should be on its own tab, unless the units are identical.
- All custom grilles or grille alignments require a picture or drawing showing exact requested pattern.
- Grille alignment requests: make sure the sizes, floor IDs and unit types of non-NSPR unit(s) are also provided in the description.
- If CAD drawing is needed, choose Yes on the “CAD drawing Required” field.
- If this is for a Coastal Unit, choose Yes on the “Coastal Unit” field.
- If there are any revisions needed, a NEW NSPR form needs to be sent to your REC. (If original NSPR doesn’t match template from CAD, a new NSPR form is needed to match template drawing from CAD.)
- As stated on NSPR form, by releasing the purchase order, you agree to the terms of the NSPR.
- All window specs must be correct in rForce/ROP, not just entered on the NSPR form. In description, exclude any items that are standard in rForce/ROP (include this information in dropdowns on right side of form).
- Please double-check that “Grille Type” and “Grille Profile” make sense together. For example, a GBG grille type with a “FDL-HD” grille profile is not acceptable. If you are mixing grille types, please make a note in the description.

Complete & Submit the NSPR Form

1. Make sure you have the NSPR form on your desktop. Open the NSPR form (Excel sheet) and click Enable Content at the top. A pop up may occur for Security Warning – select Yes.
2. On the first tab, labeled “Start New”, you’ll see two options: specialty window NSPR and non-specialty NSPR. Double click the unit style you want.
3. Enter your quantity of NSPR units. If multiple units are identical, they may be entered on the same NSPR form, notating both unit IDs and changing the quantity to the correct number.
4. Then, click OK to proceed to the form where you’ll enter the window information. A new tab will appear at the bottom of the sheet for each unit needed (“NSPR form1, 2, 3, etc.”).

- Once the file is complete and saved, hit the "Click here to submit for Quote" button in the form. You will see the below prompt. Click Continue.

8. This will open a new email message and automatically attach the Excel spreadsheet. Enter a new subject line to match the Excel spreadsheet name (see below). Then hit Send!
9. You'll receive a tracking number in an autoreply within a few minutes; keep this email and include the tracking number if you need to ask your REC any questions.

- *Once approved, you will receive an approved form with an NSPR # from your REC. On the line item for the NSPR unit(s), check the NSPR box and add the NSPR# in each unit that has an NSPR.
- *It is best to save the line item once before checking the NSPR box to ensure makeability is accurate.

NSPR Tips & Examples

PW/DB Grille Alignment

- Provide drawing or picture, dimensions of all units and any mullion spacing.
- Verify all units are the same height (for horizontal alignment) or width (for vertical alignment) and grille lites high/wide are correct. (Double hung needs grilles in both sashes to align with picture window.)
- If not same unit heights, retailer needs to specify if they are aligning at the head or sill.
- Info needed for DB units in description: floor IDs, unit dimensions and grille pattern.
- The double hung and picture window need to be the same frame type (FF and FF, IF and IF). PWU will align to any double hung product.
- We can align Colonial, Modified Prairie and Prairie grille patterns.
- The double hung units do not need an NSPR number, just the picture window.

Modified Prairie across multiple units (CS/FW units)

Only the center unit would need NSPR special instruction grille since you can select modified prairie for end units as a standard grille pattern, and pattern is determined by handing.

For Circle Top, Chords and Springlines with custom grille pattern requests that are standard patterns

The reason they are NSPR is rForce and OMS only allow the exact pattern that is shown in the Spec and Tech manual for each unit.

The formula to determine if CSR will need to send to CADD:

- Unit width - 6 (for ALL frame profiles) and divide by the numbers or lites across the bottom of the unit
- If the end number is less than 4.5, then we need to send to CADD for review/approval.
- Example: $71.75 - 6 = 65.75 / 6$ (lites) = 10.95 since $10.95 > 4.5$ OK for REC to approve.
- REC will approve as standard vs. putting in a price. If they enter a price, it creates an upcharge to the total unit cost.
- This would be processed as an open hub sunburst 3 spokes 2 hubs.

Custom shapes (templates)

- Determine if unit(s) need a template sent to your REC and RbA engineering. Refer to custom shape guidelines document for process.
- Template ideally will be on Tyvek paper.
- Send REC NSPR form stating custom shape, stating template mailed via UPS and date it was sent (please send with attn: your REC).
- When entering in ROP/rForce, enter overall width and height as provided by CADD. Enter as "custom shape," not one of the provided specialty window shapes ("circle top," etc.).

Blanket NSPRs for RbA

- Example: NSPR # 24552852 = Extra GBG grille bumpers applied at all intersections. More blanket NSPR numbers are on the next slide.
- You need to check the NSPR box and use NSPR # 24552852 as your NSPR each time.
- If you need an NSPR for anything else on this unit, you will need to request a true NSPR approval from your CSR to get the order processed.
- Can only be processed if OK per Spec and Tech.

Blanket NSPR Number	Non- Standard Request
24487568	Interior trim- SHOE & FLAT on SPW/SWU
24486835	Overfit & Drip Cap on SPW/SWU
24512621	Exterior trim- L & WL on SPW/SWU
24552852	GBG Grille Bumpers All intersections
24961805	Additional WL trim for SPW/SWU
25852576	Dual Pane Glass (DP)
26275262	Exterior trim- 2L on SPW/SWU
26576000	Exterior trim- Picture Frame BM on SPW/SWU
27592980	Exterior trim- Chamfered Overfit Arches Only (COAO) on SPW/SWU
27596375	Exterior trim- Overfit Arches Only (OFAO) on SPW
27596428	Exterior trim- Nail Flange on SPW/SWU
27839985	Exterior trim- Traditional BM on SWU no ext jamb
28504466	Additional Exterior Wide L Trim and Interior Flat Trim on SPW/SWU
29498559	Additional Exterior 2L Trim and Interior Flat Trim on SPW/SWU Qty 2 Each

Makeability – common errors

- rForce & ROP: Midpoint height field needs to be filled out for UL units (in rForce, not a required field). Need to provide width, height, leg heights and midpoint height.
- Triangle (NOT right triangle) – need leg heights (lengths). SWU requires, not SPW (SPW is custom shape).
- Half Springline: tall leg height needed only, do not need short leg measurement.

CREATE A PRODUCT PURCHASE ORDER

Learning objectives

By the end of this section, you will know:

- The statuses for Purchase Orders
- How to Create a Product Purchase Order

For a Purchase Order to be created, an Order must first be in Ready to Order status. If the order is not in Ready to Order status, refer back to Completing Tech Measure Work Order section.

NOTE: You cannot manually change the status of the order.

Statuses for Purchase Orders

There are 6 different statuses that describe the Purchase Order's progress. The Purchase Order status will automatically update as certain actions have been completed.

- **In Process:** When a Purchase Order is created, the status is In Process. Add the Requested Ship Date (for windows if desired), then click the Release Purchase Order button. If a Purchase Order is Rejected, the status will revert back to In Process. Use the List View to identify any Rejected PO's.
- **Released:** The status is updated to Released by selecting the Release Purchase Order button. Released indicates all the Purchase Order information has been sent to the appropriate Vendor. When all POs within an Order are in Released status, the Order status will change to Order Released.
- **Confirmed:** Electronically submitted Purchase Orders will update automatically, while manually submitted PO's will need to have inputs entered by the user. When all Products have a Cost, Estimated Delivery Date, and Confirmation Number input on their PO, the status will update to Confirmed. After all POs within an Order are in Confirmed status, the Order status updates to Install Needed.
- **Received:** All Products on the Purchase Order have been Received at the warehouse.
- **Partially Received:** Some, but not all, Purchase Order line items have been Received in the quantity ordered.
- **Canceled:** Selecting the Cancel PO button will change the Purchase Order's status to Canceled. A PO can only be canceled if it is in In Process status. Once you have released a PO, you have to manually cancel the PO through your REC or submit a Fetch ticket (for vendors other than RbA).

NOTE: You can find the Order Change Form and the RbA Order Change Cancellation and Deadstock Policy on The Link.

On the Order Detail page, each Product is listed as an individual line item in the Order Products section. These Products will include the information recorded from the initial Sale and the IPM/Tech Measure appointments and will be used to create the Purchase Order.

NOTE: If product was added after the initial sales appointment, these units will not populate under Products.

When a Purchase Order is created, the Purchase Order number will appear in the Purchase Order column.

The Purchase Orders section will be used to create and view Purchase Orders. A separate Purchase Order is required for each vendor.

Create a Purchase Order

- 1. Within the Purchase Order section on the Order Details page, click the New Purchase Order button. The create Product Purchase Order page will be displayed.

- 2. Within the Select a Vendor section, use the dropdown to select the vendor for the Purchase Order. The Vendors within this list pre-populate based on the Products included within the Order. Create a new PO for each Vendor needed.

NOTE: For any Order that has both Renewal by Andersen windows and doors, two Purchase Orders will be created.
NOTE: Purchase Orders can be split if needed due to product lead times.

Purchase Order Vendor Selections		
Ordering:	Vendor:	Purchase Order Actions:
Windows	Renewal by Andersen	Click Release PO. Order is electronically delivered to Cottage Grove.
Andersen Patio Doors	Renewal by Andersen - Door	Create PO in rForce to track cost and ship dates. Build & Submit order in IQ+ Press Release PO Button in rForce.after submitting in IQ+
ProVia Entry Doors	Pro-Via Door Inc StoreName (for CORO) Pro-Via Door Inc ARO (for ARO)	Create PO in rForce to track cost and ship dates. Build & Submit order in EntryLink. Press Release PO Button in rForce after submitting in EntryLink.
BayWorld	Bayworld	Create PO in rForce to track cost and ship dates. Complete & email Bay Form to Bayworld. Press Release PO Button after creating the RbA Window PO.

3. Within the Purchase Order Details section, you may enter a requested ship date in the Requested Ship Date field for windows, if needed.

VERIFY PRODUCT PURCHASE ORDERS

Learning objectives

This section explains how to:

- Verify Orders

Verify Orders

All orders should go through an in-depth verification process before ordering the product. Verify all items on the order following the below steps and edit as needed. Once ready, you may move on to releasing the Purchase Order, shown in next section.

VERIFYING: (After you have configured the order)

1. Open the Purchase Order (PO):

Page 1 of 3

Sensitivity: Confidential

4. This is the PO. What is on this is what's *actually* being ordered. If possible, drag this tab to a different screen, and then on another screen open:
 - Tech Mapp Package (or The Installer Package + OMS)
 - Addendum (if any)
 - Change Orders/other forms regarding ordering if needed
5. Compare line by line these items to the PO that you just opened from Conga and dragged to your other screen.

- Click open the Opportunity and read the Notes to Construction Dept. Sometimes the Design Consultants put important notes there that they forget to put other places:

Account Name	55423, 6812 Grand Ave S		
Bill To Contact	Holly Monson		
Opportunity	Appt: RICHFIELD, MONSON, +1(612) 861-7553		
Quote	4 Windows		

Description Information			
Window Problems	2 standalone kitchen windows are priority, difficult to open/close and clean, may replace up to 9 total windows - h/o undecided		Sale Price
Important Lead Notes	[IN HOME] js 6/28/21 RA - yes Sole		Payment
Enabled Marketing Source	Organic Web - Appt Request		# of Series
Enabled Marketing SubSource	Phone Call		# of Series
Enabled Marketing Agent			# of Doors
Customer Concerns	[IN HOME] no concerns. Would like it to be done sooner if possible.		# of Bays
Addressing Customer Concerns	[IN HOME] See above note		# of Bow
Notes to Construction Dept	[IN HOME] White/White insert DGs. Sterling grey complete wrap. No hand lifts. This is a partial job that we will complete next year if all goes well.		# of Entr

- If necessary, while you are in the Opportunity, click open the original eGreement contract, scroll to any additional documents you may need to review (Detail Summary Review forms, Entry Door details, pictures, etc.) and make sure everything there matches the PO.

- If there are patio doors, compare all the documents you pulled up to the IQ+ document that should have been attached to the Order in rForce.
- If there are Provia doors, you'll open the door in Entry Link on one screen, and on the other screen open up the Provia form that the IPM turned in and also the Spec Sheet that the Sales Consultants should have included in the original contract (found on the Opportunity).

Verifying Tips and Things to Look For

****USE PICTURES DURING VERIFICATION PROCESS TO CONFIRM THINGS****

- Grille patterns (style, match existing?, sash 1 & 2 same or different?)
- Handings
 - -Don't open into house
 - -Typically, Bay Windows & Casement Triples go LSR handing from exterior left to right
 - -Entry Door, Patio Door handing
- Are window colors same? Should they be?
- EJ Receiver consistency
- Brickmold/Ext Trim consistency
- Units in BAY must be Inserts with Flat Sill
- FW's vs. PWU's
- CT & GT ratios 1:1:1 vs. 1:2:1 (check pics for what's existing compared to contract)
- Screen Types – are there any different than others and if so, does it make sense?
- Mull sequences (heights/widths same? A-b vs a/b?, mull size same as wds)
 - -is mull sequence letter in correct spot (Unit ID for Field/Factory Mull Sequ for factory mull)
 - -are we within factory mulling size (144 width, 84 height)
 - -if **001** is factory mulled, make sure Factory Mull Sequence is just 1a, etc (not **001a**)
 - -IF DG's, must be mulled to PWU (not FW)
 - -No BM on individual units of a mulled unit (SWU exception)
- Can't mull glider on top of anything – weep holes
- Special Options - when "opened", are defaults correct to what they should be?
- If IPM adds product on Addendum, check the WHOLE unit is correct with rest of order (glass, style (base or EJ frame), etc
- Need ALL required info for Specialty Windows filled out

RELEASE, CONFIRM, RECEIVE & CANCEL PRODUCT PURCHASE ORDERS

Learning objectives

This section explains how to:

- Release an Electronically and Manually Submitted Purchase Order
- Confirm an Electronically and Manually Submitted Purchase Order
- Receive a Purchase Order
- Cancel a Purchase Order

Release an Electronically Submitted RbA Purchase Order

After you have entered requested ship date (if desired), click on the Release Purchase Order button. The purchase order will be Released and all the Purchase Order data will be pushed to Baan IV. Renewal by Andersen will confirm the Order and submit the Order to manufacturing. Within rForce, you will now notice that the status within the PO has been changed to Released.

NOTE: You can access the PO Confirmation via iHUB on The Link. It is best to review and attach these confirmations to Salesforce.

Release a Manually Submitted Purchase Order

For manually submitted Purchase Orders, release the PO within rForce, and also manually send the information to the Vendor. To complete this step, you will need to have the Vendor's order form or access to the ordering website.

- On the Vendor order form or Ordering Website, specify the Purchase Order number that is generated in rForce.

Product Purchase Order Information		
Purchase Order Type:	Ordering:	Purchase Order Action:
Product Purchase Order	RbA Variant-specific Items	Release Purchase Order. Order is electronically delivered to Cottage Grove.
Cost Purchase Order	RbA Items with Part Numbers	Release PO. Order is electronically delivered to Cottage Grove.
Product Purchase Order	Andersen Window, Doors, and parts	Create PO in rForce to track cost and ship dates. Build & Submit order in IQ+. Press Release PO Button in rForce after submitting in IQ+
Product Purchase Order	Misc. other Items.	Create PO in rForce to track cost and ship dates. Follow Vendor's submission requirements. Press Release PO Button after submitting to the Vendor.

- Email the Vendor's order form or submit the order via the ordering website.
- If applicable, upload a copy of the Vendor order form to the Files section of the Order for record of what was ordered.
- Click the Release Purchase Order button. Within rForce, the status within the PO has been changed to Released. This signifies the Purchase Order has been sent to the Vendor.

NOTE: The Edit button can be used at any time. Clicking Edit puts the page into an edit mode. Clicking Cancel PO will cancel the PO in rForce and removes and product lines that were attached to it.

Confirm an Electronically Submitted RbA Purchase Order

When a Purchase Order is released from rForce, a Retail Experience Coordinator (REC) at RbA in Cottage Grove will review the PO and complete a validation check. This ensures all Products requested on the PO are valid and can be created. When the PO is approved, a sales order number (Confirmation number), estimated ship date, unit variant number, and unit wholesale cost are sent back to rForce.

When this data syncs to rForce, the status of the Purchase Order will go from Released to Confirmed. The estimated ship date, unit variant number, and unit wholesale cost fields have been populated within the rForce PO.

Confirmed status indicates the Products on the Purchase Order are now being manufactured. The Products will be shipped when they are completed.

NOTE: If you find any lines with no cost and/or variant# (though it should have been populated automatically), do these steps:

- Email your REC/Retail Quality Coordinator and tell them some costs/part numbers are missing and ask them to get the Confirmation updated.
- Submit an Incident in Fetch that states there was an issue with all lines auto-confirming on that PO. Inform them you are having CG fix it manually, but you wanted them to be aware there was an issue.

You can get a report in rForce (Pos in Confirmed with zero Cost) to catch these if you'd like. Never enter a fake amount or receive product with no cost if it's supposed to have one.

Confirm a Manually Submitted Purchase Order

When rForce is not integrated with the Vendor's system (all vendors other than RbA for new orders), the Purchase Order confirmation information will need to be manually input. When the confirmation is received, you must update the Estimated Ship Date, update all line items on the PO with their wholesale Cost, and enter a Confirmation Number.

1. Upload a copy of the **Vendor Confirmation** within the Notes & Attachments section of the Purchase Order. Attach the form to the Purchase Order Notes & Attachments section. This section is located on the right side of the PO.
2. Click the Confirm PO button at the top of the Purchase Order.

A horizontal bar containing several buttons: 'Edit', 'Cancel PO', 'Release PO', 'Reject PO', 'Confirm PO' (highlighted with a red box), and 'Receive PO'. A dropdown arrow is visible on the far right.

3. Enter the **Estimated Ship Date** in the appropriate field.
4. Enter the wholesale cost for each line item into the **Cost** field, as well as any other fields such as Confirmation Number.
5. Enter the Confirmation Number.
6. Enter the **Tax** (if applicable).

The 'Confirm Purchase Order' form includes the following fields and table:

- Estimated Ship Date:** 5/23/2023 (highlighted)
- Tax:** \$0.00 (highlighted)
- Confirmation Number:** 22752847 (highlighted)
- Table:**

Room ID	Unit Id	Product	Cost	Old Variant	New Variant
1	Foyer	101	200 Series Perma-Shield - 2 Panel	\$1,945.10 (highlighted)	

At the bottom right are 'Cancel' and 'Save' buttons.

7. Press the **Save** button at the bottom of the screen. Upon clicking Save, the page will refresh and the PO status is now Confirmed.

After all Purchase Orders within an Order are in Confirmed status, the status of the Order will go to Install Needed. At this point, an install crew can be scheduled.

Receive a Purchase Order

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

Products are being manufactured, the Order install can be scheduled, and the warehouse will start receiving Product. As the Products arrive, those in the warehouse will be updating the Purchase Order with the quantity Received.

Receiving the Purchase Orders is an important and necessary step of the process. Failing to do so will cause issues as the process moves forward. Receiving the Purchase Orders will also allow us to:

- Accurately Schedule our Install Work Orders
- Track our Inventory
- Quickly Order Variant Specific Service Parts

When the product arrives in the warehouse, find the Purchase Order in rForce.

1. On the Purchase Order, click **Receive PO**.

A horizontal bar containing several buttons: 'Edit', 'Cancel PO', 'Release PO', 'Reject PO', 'Confirm PO', and 'Receive PO'. The 'Receive PO' button is highlighted with a yellow background and a red rectangular border. A small downward arrow icon is located to the right of the buttons.

2. The Quantity to Receive should auto-populate a quantity on each line item. If one of the line items has NOT physically arrived, edit the Quantity to Receive to 0 for that line. Then when the product does arrive, you can go back to edit.
3. Click **Save**.

The screenshot shows the 'Receive Purchase Order' form. At the top, it says 'ALL AVAILABLE PRODUCTS ARE CURRENTLY SELECTED'. Below this is a table with the following columns: Room ID, Unit Id, Product, Variant Number, Quantity, and Quantity to Rec... The table contains five rows of data. A red rectangular box highlights the 'Quantity to Rec...' column, which contains the value '1' for each row.

Room ID	Unit Id	Product	Variant Number	Quantity	Quantity to Rec...
1	100	Double-Hung Window-DG	DGI TTOK14921623	1	1
2	101	Double-Hung Window-DG	DGI TTOK14921624	1	1
3	102	Double-Hung Window-DG	DGI TTOK14921625	1	1
4	104	Gliding/Gliding-Stat/Gliding-Fract Window	GL BKWH14921626	1	1
5	105	Gliding/Gliding-Stat/Gliding-Fract Window	GL BKWH14921627	1	1

At the bottom right of the form, there are two buttons: 'Cancel' and 'Save'.

If all Products within a Purchase Order have been marked as Received, the status of the PO will then update to Received. The status of a Purchase Order will change to Partially Received if only a portion of the Products within a PO have been Received.

NOTE: Product should be received in rForce as soon as it's been delivered.
NOTE: Upon date of install, verify all Purchase Orders are in Received status.
NOTE: A product must be received on the Purchase Order for it to become an Asset on the Account.
NOTE: If you receive product by accident, it can NOT be reversed (not even with Fetch). Be cautious.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you receive a purchase order:

Action Taken	Debit	Credit
Inventory Received - Intercompany	Product Inventory CORO: 14300120	IC Rec/Pay w/ RbA Corp: 41840860
Inventory Received - Intercompany Consolidation Center	Product Inventory CORO: 14300120	IC Rec/Pay w/ALI: 19140331
Inventory Received - External Vendor	Product Inventory CORO: 14300120	AP - Invoice Accrual: 41100600
Cost Product Received	Expense Drop Down	AP - Invoice Accrual: 41100600

Cancel a Purchase Order

If a PO is in an In Process status (meaning it has not been released to the factory), you can Cancel the PO by selecting the Cancel PO button. This will change the Purchase Order's status to Canceled.

Once a PO has been released, you have to manually cancel the PO through your REC/Vendor and then submit a Fetch ticket to fix in rForce.

For RbA Windows and Patio doors:

1. Fill out the Order Change Form (shown below). You can find this form and the RbA Order Change Cancellation and Deadstock Policy on The Link.

NOTE: Sales Order Number can be found on the Order Confirmation or on the Details Tab of the Work Order titled Confirmation Number.

NOTE: In the Describe the Change field, say "Cancel PO"

Order Change Form

Revised 01/23/2024

This form is to be used when requesting an order change or cancellation for Renewal by Andersen product. Please see the Order Change, Cancellation and Deadstock Policy for information about order changes and cancellations.

Directions:

- Email an Order Change Form to RbAOrderChange@AndersenCorp.com if the order change/cancellation is for a new order.
- If the order change/cancellation is for a reorder, email your regions Retail Quality Questions Inbox: RbAretailqualityquestions1-5@AndersenCorp.com
- If the request is eligible for change or cancellation, a revised order confirmation will be posted on iHub that includes applicable fees. If the request is not eligible for change or cancellation, retail will be notified via email.

Please complete the following:

Location Name/Number:	
Sales Order Number:	
Your Name:	
Date of Request:	
Describe the Change:	
Other information if applicable:	

2. Email the form with a copy of the Order Confirmation to RbAOrderChange@AndersenCorp.com (for new orders) or RbAretailqualityquestions1-5@AndersenCorp.com (for reorders).
3. They will send you back a new Order Confirmation showing the PO has been cancelled, and the costs will be \$0 for each line item. Create a Fetch ticket asking them to cancel the PO in rForce. You must attach a copy of the Revised Order Confirmation to prove the PO has truly been cancelled.

NOTE: Cancellations after ordered should be an exception. The Billable Report in Qlik can show how much you've been charged for these types of changes (under Order Changes and Cancellation Charges), but nothing needs to be entered into rForce regarding the fees for this.

For vendors other than Renewal by Andersen, contact the Vendor to cancel. Once they send confirmation of the cancel, create a Fetch ticket asking them to cancel the PO in rForce and attach the Vendor's notice that they have cancelled the PO.

Make Changes to a Purchase Order After Ordered

If a PO is in an In Process status (meaning it has not been released to the factory), you can Cancel the PO by selecting the Cancel PO button. This will change the Purchase Order's status to Canceled.

Edit	Cancel PO	Release PO	Reject PO	Confirm PO	Receive PO	▼
------	-----------	------------	-----------	------------	------------	---

If it's necessary to make a change to an order after it's been released and confirmed in rForce, you must complete the below Order Change Form.

For RbA Windows and Patio doors:

1. Fill out the Order Change Form (shown below). You can find this form and the RbA Order Change Cancellation and Deadstock Policy on The Link.

NOTE: Sales Order Number can be found on the Order Confirmation or on the Details Tab of the Work Order titled Confirmation Number.

NOTE: Note what you need to change in the Describe the Change field.

Order Change Form

Revised 01/23/2024

This form is to be used when requesting an order change or cancellation for Renewal by Andersen product. Please see the Order Change, Cancellation and Deadstock Policy for information about order changes and cancellations.

Directions:

- Email an Order Change Form to RbAOrderChange@AndersenCorp.com if the order change/cancellation is for a new order.
- If the order change/cancellation is for a reorder, email your regions Retail Quality Questions Inbox: RbAretailqualityquestions1-5@AndersenCorp.com
- If the request is eligible for change or cancellation, a revised order confirmation will be posted on iHub that includes applicable fees. If the request is not eligible for change or cancellation, retail will be notified via email.

Please complete the following:

Location Name/Number:	
Sales Order Number:	
Your Name:	
Date of Request:	
Describe the Change:	
Other information if applicable:	

2. Email the form with a copy of the Order Confirmation to RbAOrderChange@AndersenCorp.com (for new orders) or RbAretailqualityquestions1-5@Andersencorp.com (for reorders).
3. They will send you back a new Order Confirmation showing the changes. Attach this confirmation to the Purchase Order.

NOTE: Change Orders after ordered should be an exception. The Billable Report in Qlik can show how much you've been charged for these types of changes (under Order Changes and Cancellation Charges), but nothing needs to be entered into rForce regarding the fees for this.

For vendors other than Renewal by Andersen, contact the Vendor directly.

SCHEDULE INSTALL WORK ORDERS

Learning Objectives

This section explains:

- Scheduling Preparation
- How to schedule an Install Work Order
- How to change the Primary Install on an Install Work Order

Scheduling Preparation:

- Be mindful of Estimated Delivery Dates before scheduling any appointment.
- Reference the Install Package to confirm what product and construction charges apply for the order.
- Determine which Install crew is most capable of completing the project most efficiently and timely.
- Partner Install Crews together when possible.
- Try to schedule half-day installs when possible.
- Schedule as close to the Install Crew's daily capacity (so they don't get done early every day).
- Be aware of job size and geographical location when scheduling multiple appointments per day.
- Scheduling and how to pick resources is specific to each location and type of Work Order. Additional training may be needed at the local level.

When the Tech Measure Work Order is Completed, the Install Work Order is automatically generated on the Order. If desired, you can utilize the FSL Calendar to determine next available dates for install.

Schedule the Install Work Order

1. From the Order, select the Install Work Order under Work Orders.

Work Order Number	Work Order Record Type	Status	Scheduled Start Time
03844491	Tech Measure	Appt Complete / Closed	4/7/2022 11:30 AM
03844521	Permit	New	
03844591	Install	To be Scheduled	

If you are needing a work order that is not there, you can create one by clicking the New Work Order button near the top right of the screen. However, most Work Orders that need scheduling should auto-populate based on Salesforce status.

- Under Chatter, choose **Time Slots**. Here, if needed, you can edit the number of resources, your appointment duration (8 hours = 1 day), date range, and change the territory. If you know what date you want to schedule the install, you can change the dates to the day you want to schedule the install.

- Click **Get Time Slots**. It will show the possible time slot available for the date range and resources you have chosen.
- Choose a time, and then choose a resource if necessary. Click **Schedule**.

NOTE: The green check mark verifies the appointment has been scheduled, but it's best to Refresh the screen and confirm.

- Confirm the Install Work Order has changed status to **Scheduled & Assigned** and the proper date, time and Install Crew have populated.

Tips:

- Go to the FSL calendar and refresh the screen to ensure your appointment has loaded and there wasn't another appointment double-booked by someone at the same time.
- If the Installer Package/Tech Mapp Package, or any other documents needed for the Installer were not already uploaded to the Install Work Order, do so at this time.
- It's recommended to give the homeowner a reminder of all appointments. Confirm reminder process with local leadership

Change the Primary Installer on an Install Work Order

If you need to change the Primary Installer on an Install Work Order, follow these steps:

1. Click open the Install Work Order.

	Work Order N...	Work Order Record...	Status	Scheduled Start Time
1	04617427	Tech Measure	Appt Complete / Closed	11/30/2022 7:00 AM
2	04625897	Permit	New	
3	04650995	Install	Scheduled & Assigned	2/20/2023 8:00 AM

2. On the right side of your screen, click on Time Slots. Change the Earliest Start Date to the date prior to the install start date. Change the Due Date to the date after the last day of install. Click **Get Time Slots**.

Reschedule service appointments

Work Type: Install

Resources Needed: 1

Duration: 8

☒ Allow Multi-day

Earliest Start Reschedule: 04/18/2023

Due Date: 04/18/2023

Address: 8146 Jergen Bay S, Cottage Grove, Minnesota, 55016-3622

Install Work Order Number 04650995 Sold Order 02694602 Account 55016, 9146 Jergen Bay S Contact Work Type Install Status Scheduled & Assigned Primary Installer Devere Construction Primary Service		

NOTE: Notes typed in the Install Notes field on the Order will show up on the Install Packet generated from rForce. At this point, someone should make sure LSWP Work Order is updated and full LSWP compliance process is followed. For the complete LSWP Compliance process, see the Addendum.

ENTER LABOR FOR INTERNAL & EXTERNAL LABOR

Learning objectives

This section explains how to:

- Create New Labor
- Enter Labor for internal RbA Employees & External Contractors

You will be entering labor for Paint & Stain, LSWP, Service, and Install Work Orders. These will be the only instances when entering Labor is necessary. Labor will be entered within Action and Visit Work Orders, and the process used to enter Labor will be the same within both types of Work Orders.

Tip: Entering Labor can happen before or after Recognizing Revenue. It is important to enter Labor as soon as it has been completed. This ensures that external Contractors are paid in a timely manner and job costing details are accurate.

Create New Labor

1. Hover over Work Orders and select the Work Order you are applying labor to (or find the Work Order you need by clicking the Work Order tab).

	Work Or...	Work Order...	Status	Scheduled Sta...	Scheduled End T...	Primary Resou...	Total ...	Created Date	Owner

Enter Labor for internal RbA Employees & External Contractors

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

After the New Labor is created, the New Labor page will load. The Related Work Order (1), Record Type (3), Date Applied (4), and Store Location (5) fields have all been populated. Follow the steps below to enter Labor for an RbA employee.

1. Within the Resource field (2), search name to find the crew that was assigned to the Work Order. Only Resources that are available in rForce will display when using the search feature.
2. For RbA employees, enter the number of hours that the crew that worked in the Hours Applied field; within the Work Order (6). Standard hourly rate will then be used to determine entire payment amount.
 - a. If desired, add a description within the Description field (8).
3. For external employees, enter total payment amount in the External Payment Amount field (7).
 - a. If desired, add a description within the Description field (8).
4. Click the **Save** button (9). The Labor Record page will load. The newly entered Labor will be reflected in the Labor section on the Work Order Details page. A Journal Entry will also be created.
5. Attach a copy of the labor sheet to the Work Order for future reference.

Cancel Save & New **9** Save

NOTE: The Check Date and Check Number fields will **not** be used when entering Labor. These fields are used for a different type of Vendor reimbursement. Also, when entering Labor for RbA employees the External Payment Amount field will not be used.

NOTE: The Additional Labor field can be used for reporting purposes only. Here you can note how much of a contractor's total labor was over their base pay.

NOTE: Install Labor and LSWP Labor can be entered as one single payment if completed by the same contractor. It is not needed to check the LSWP checkbox on the labor record.

NOTE: For CORO locations, enter a negative labor record to charge a subcontractor back for any reason.

If the vendor has expired insurance for General, Auto, or Workers Compensation (**11**) (see example below, from Account page), the Labor entry cannot be saved, and the crew will not appear as a resource.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Labor journal entries won't generate until the job is closed, but here are the journal entries that will eventually result from entering labor:

Action Taken	Debit	Credit
Internal Labor	COS Internal Labor CORO: 84000150	Labor Salaries Inst Alloc: 88020200
External Labor	Work In Process – Casement: 14200300	Accounts Payable: 41000100

Post Recognized Service External Labor	Purchased Labor: 88330100	Accounts Payable: 41000100

MISCELLANEOUS LABOR REIMBURSEMENTS

Learning Objectives

This section explains how to:

- Create a Miscellaneous Labor Reimbursement

A Miscellaneous Labor Reimbursement is reimbursement for labor that is not tied to a specific Order.

Examples of a Miscellaneous Labor Reimbursement:

- An install crew needs to be reimbursed for purchased materials not provided by RbA.
- Reimbursement for time and materials for an employee working at a trade show or in warehouse.
- New crew training pay
- Quarterly & Sign on bonuses
- Flex pay

Create a Miscellaneous Labor Reimbursement

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

Since Miscellaneous Labor Reimbursements are not tied to a specific Account or Order, you will use the Labor section under the main navigation menu.

1. Select Labor from the main navigation menu.
2. Click **Misc Labor** located in the top righthand corner of the Labor section.

3. Complete the information on the New Labor screen.
 - **Resource:** Search for the resource you are reimbursing using the search icon.
 - **Store Location:** Enter your specific location here before entering the GL code.
 - **GL Account:** Find your General Ledger Account using the search icon.
 - **External Payment Amount:** Enter the total amount of the reimbursement.
 - **Description:** Enter a brief description of the reimbursement.
4. Click the **Save & New** or **Save** button.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter a miscellaneous labor reimbursement:

Action Taken	Debit	Credit
Misc Reimbursement	Expense Drop Down	Accounts Payable: 41000100

RECOGNIZE REVENUE

Learning Objectives

This section explains:

- How to Recognize Revenue

Recognizing Revenue is the act of acknowledging that a job is far enough along to send revenue information to the financial system of record. This happens when the installation is substantially complete, meaning all units are installed or temped in, regardless of any service.

Requirements to Recognize Revenue:

- Must be in Install Scheduled or Job in Progress status
- All Purchase Orders must be in Received status
- The Install Work Order must be scheduled

How to Recognize Revenue

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

1. Click the drop-down button in the top righthand corner on the Order Detail page.

The screenshot shows the top right corner of the Order Detail page. It includes buttons for 'New Work Order', 'New Payment', 'Edit', and 'On Hold'. A red box highlights a drop-down arrow button next to 'On Hold'. Below these buttons, a table displays order details: Account Name (55104, 965 Laurel Ave), Bill To Contact (Christian Dahlager), Booking Date (1/2/2023), Status (Install Scheduled), and Combined Retail Total (\$55,861.21). At the bottom, a progress bar shows stages: Install Sch... (active), Install Co..., Job in Pro..., Pending C..., and Cancelled. A 'Mark Status as Complete' button is also visible.

2. Click Recognize Revenue.

This screenshot shows the drop-down menu that appears when the button from the previous screenshot is clicked. The menu options are: 'New Change Order', 'Recognize Revenue' (highlighted with a red box), 'Job Closed', 'Cancel Order', and 'Order Invoice'. The background shows the same order details as the previous screenshot, with the status 'Install Scheduled' and total '\$55,861.21'.

- Click on **Save** to confirm your selection.

Recognize Revenue

Are you sure you want to recognize revenue on this order?

Cancel
Save

- After clicking Save, changes will be updated on the Order.
 - The status of the Order has changed to Install Complete
 - Within the Additional Information section, the Revenue Recognized Date has been populated
 - Any Install Work Order(s) will automatically be changed to Appt Complete/Closed status
 - All Action Work Orders, except for Paint/Stain and Permit, will automatically be closed

NOTE: CORO locations should immediately complete this step and Close the job (see next step).

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you close a job, where applicable:

Action Taken	Debit	Credit
Revenue Recognized - Deposit	Consumer Deposits: 41700100	Accounts Receivable: 12000100
Revenue Recognized - Refund Deposit	Accounts Receivable: 12000100	Consumer Deposits: 41700100
Revenue Recognized - COGS	Material Cost of Sales: 84000100	Product Inventory CORO: 14300120
Revenue Recognized - Discount	Sales Allowance: 82000000	Accounts Receivable: 12000100
Revenue Recognized - Finance Fees	Financing Fees: 80500200	Prepaid Marketing Expense: 17000160
Revenue Recognized - AR	Accounts Receivable: 12000100	Retail Sales CORO: 71100100
Revenue Recognized - Service AR	Accounts Receivable: 12000100	Service Revenue: 88500410
Revenue Recognized - External Labor	COS External Labor CORO: 84000160	Work In Process - Casement: 14200300
Revenue Recognized - Service External Labor	Purchased Labor: 88330100	Work In Process - Casement 14200300

CLOSE A JOB

Learning Objectives

This section explains how to:

- Close an Order

Close a Job

After you have Recognized Revenue, logged a post installation call, and completed any other Tasks within an Order, the last step is to close the Order. **This step is mandatory for all orders.** CORO locations should complete this step immediately after Recognizing Revenue.

1. Click the drop-down button in the top righthand corner on the Order Detail page.

2. Click Job Closed.

3. Click **Close Job** to verify your selection.

4. The Order will move to Job Closed status.

Details	Products	Finance	Work Orders	Purchase Orders	Change Orders	Other
Unique Identifier 00770039644					Order Owner  Halle Scheer	
Store Location ⓘ 0077 - Twin Cities					Sales Rep Ryan Johnson	
Account Name 55104, 965 Laurel Ave					Status Job Closed	
Bill To Contact Christian Dahlager					Cancellation Reason	

5. Now that the Order is in Job Closed status, you will no longer be able to:
- Make edits to Purchase Orders
 - Add Products
 - Add or edit any Discounts
 - Add any or edit Financial Programs
 - Do Inventory Write-offs
 - Add Vendor credits

However, you are still able to:

- Have open Permit, Paint/Stain, or Collection Work Orders
- Add Payments
- Add Notes
- Add Install Adjustments
- Add Labor
- Add Refunds

JOB IN PROGRESS/RECOVERY PROCESS

Learning Objectives

This section explains how to:

- Create and manage a Job In Progress

Guidance

After installation date, you may have items that did not get completed. If the job is not substantially complete, it will become a Job In Progress (JIP). Use these steps as a guideline:

After initial install, did all units get installed/temped in?

- If Yes, then Recognize Revenue.
- If No:

Was it due to an uncontrollable, such as Backorder, Rot, Weather?

- If Yes, create a second Install Work Order on the order and schedule from there.
- If No, change the order status to Job In Progress. Open a Service Request (JIP Service) and follow the below Recovery Process.

Recovery Process:

NOTE: Once the Install Work Order is scheduled on the Service Request, the Reinstall Date and the Estimated Revenue Recognized Date on the original Order will auto-populate to the date of the Install Work Order.

NOTE: Once install is complete, Install Work Order on the Service should get closed and labor should go on the Service Request. The original Order should be Revenue Recognized and then closed, and the Service Request can be submitted for warranty and follow service processes.

COLLECTIONS LETTERS

Guidance

You can use auto-populated Collections letters through Salesforce. To create a Collections Work Order, click New Work Order on top right of the Order. Choose “Collections” as the type.

The screenshot shows a Salesforce interface with a top bar containing buttons: 'Place on Hold', 'New Work Order' (highlighted with a red box), 'New Payment', and 'Edit'. Below this, a 'Work Order Type' dropdown menu is open, showing a list of options: '---None---', '---None---' (with a checkmark), 'Collections' (highlighted with a red box), 'HOA', and 'Historical'.

- On a Collections work order, you can find the Collections letters to send.
- **RbA 1st & 2nd Attempt** – Use this for the first and second letters you send for non-finance orders.
- **RbA Final Attempt**– Use this for the third/final letters you send for non-finance orders.
- **Finance 1st & 2nd Attempt**– Use this for the first and second letters you send for Finance orders.
- **Finance Final Attempt**– Use this for the third/final letters you send for Finance orders.

Every time you populate a letter, it will record it in the Activity History, and the file/letter will show up under Files. When emailing collections letters, always email them from Salesforce. When attempting to collect another way, always note in Salesforce how you attempted.

NOTE: If you need the contact information that's on the letters updated, submit a Fetch request.

The screenshot shows a Salesforce interface with a top bar containing buttons: '+ Follow', 'Add Work Plans', 'Delete Work Plans', and 'Generate Work Plans' (highlighted with a red box). Below this, a dropdown menu is open, showing a list of options: 'Edit', 'Submit for Approval', 'Change Record Type', 'Delete', 'Clone', 'Change Owner', 'RbA 1st & 2nd Attempt', 'RbA Final Attempt', 'Finance 1st & 2nd Attempt', and 'Finance Final Attempt' (highlighted with a red box). Below the dropdown menu, the 'Activity History' section is visible, showing a task titled 'Collection 1st or 2nd Attempt Sent' with a due date of 9/17/2024 and assigned to Laura Pittman.

SURVEYS

New Order Surveys

Project Surveys (surveys that go out after the job is installed) will go out automatically 90 days after the scheduled install date (on the scheduling calendar). They can go out sooner if the Back Office triggers it in Medallia. Best practice is to send it as soon as the install is complete (or substantially complete).

If you do not trigger the survey, it will automatically go out after 90 days from the scheduled install date.

In Salesforce, a Survey Detail is created to help you manage which surveys are still pending and need to be sent. It is auto-created based off of the scheduled install date on the scheduling calendar within rforce.

CREATE ORDER INVOICES

Learning Objectives

This section explains how to:

- Create an Order Invoice

An Invoice can be used for several things, including:

- Auditing records
- To be included with the installation file for the customer at the time of install
- Customer request
- When notifying the customer of a balance due

The invoice will include:

- Customer's contact and Account information
- Order Number
- Sales Consultant, IPM/Tech Measure, and Install Crew information
- Invoice Notes
- All Products within the Order, including their Quantities and Prices
- Discounts
- Payment details, including Payments received and Order Balance

Create an Order Invoice

1. Click the **Order Invoice** button at the top of the Order detail page.

2. A second window will open.
3. When Merge Completed is displayed in the center, click on the file in the download bar to open it.

4. In the newly opened tab, click the printer icon in the top right corner to print the invoice.

5. A copy is created in the Notes & Attachments section at the bottom of the Order Detail page. Click on the link to open the invoice in a new tab.

6. The system will also save a copy of the invoice to your computer. You can click the link to open it again or you can click Show In Folder to see where it is saved on your computer.

The example below is from Google Chrome.

MISCELLANEOUS CASH RECEIPTS

Learning Objectives

This section explains how to:

- Define a Miscellaneous Cash Receipt
- Create a Miscellaneous Cash Receipt

What is a Miscellaneous Cash Receipt

A Miscellaneous Cash Receipt is a cash, check or credit payment that is not tied to a specific Account or Order.

Examples of a Miscellaneous Cash Receipt:

- If the location is part of electric co-op, and the co-op provides a dividend at the end of the year, a miscellaneous cash receipt would be used to account for the money received.
- If the location receives a refund back from a municipality, such as permit fees or cardboard recycling, a miscellaneous cash receipt would be used for the money received.

Create a Miscellaneous Cash Receipt

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

Use the Payments tab found in the top navigation ribbon. Click the tab to enter the Payments page. Miscellaneous Cash Receipts are not tied to a specific Account or Order.

1. Select Payments from the main navigation menu.
2. Click **Misc Cash Receipt** located in the top right corner of the screen.

3. Complete the information on the New Payment screen.
 - **Payment ID:** Enter the System Code number from the Payment List.
 - **Payment Amount:** Enter the amount of the payment.
 - **Payment Method:** Enter the appropriate payment method (cash, check, or credit card).
 - **Check Number/CC:** Enter in the check number or last 4 digits of the credit card.
 - **Description:** Enter a brief description, including why it was received.
 - **Store Location:** Find your Store Location using the search functionality.
 - **GL Account:** Find your General Ledger Account using the search functionality.

- Click the **Save** button to complete.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter a miscellaneous cash receipt:

Action Taken	Debit	Credit
Misc Cash Receipt	Cash: 11300120	Expense Drop Down

CHANGE ORDER AFTER JOB CLOSE

Learning Objectives

This section explains:

- When to do an After-Close Change Order
- How to process a Change Order after an order is Closed

When to do a Change Order?

There are Change Orders that occur during the process of an order. Those edits can be made to the original order and those processes vary by location. See your Supervisor with questions.

Occasionally, there are Change Orders needed after an order has been switched to Job Closed status and revenue has been recognized. In these situations, we use the Change Order “button”. This is the only way you can do Change Orders on an order that has been closed.

NOTE: You cannot order product from an After-Closed Change Order. If the original order has been closed and you need to order product, a brand-new Order must be created.

Process an After-Close Change Order

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

NOTE: It is recommended that you attach any email communication or documentation to the Files/Notes section of the original order that states what change is needed and why.

1. If an order is in Job Closed status, go to the drop down on the top right of rForce and click **New Change Order**.

2. Click **Save** on the pop-up if you are sure you want to create a new Change Order.

3. A new Order number has been created, but dollar changes made here will feed back to the Original Order.

4. From here, click the Product Tab and choose **Add Product**. Add line items for what the change needs to be. For example, this may be for additional materials that were needed at install, removing materials or work not needed at install, or adding or removing painting/staining.

5. Choose your Product (can use Change Order if it's a miscellaneous change). Enter the Unit Price, and any notes you want to include (enter a negative dollar amount in Unit Price if you are removing dollars). Click **Save and Close**.

The Retail Subtotal will populate on the After-Close Change Order but will also add/subtract to the original order.

6. Click the drop-down arrow at the top Right of the After-Close Change Order and click **Recognize Revenue**.

7. Click **Save** on the pop-up that you are sure you want to Recognize Revenue.

8. The After-Close Change Order Status should change to Job Closed. This will now remove it from any “open orders” data and show up on any Payments Needed reports from the original order.
9. Any additional work that needs to be completed should take place on the original order (Work Orders, Payments, etc.).

The After-Close Change Order will show up on the Account as an Order.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you enter a change order after job close:

Action Taken	Debit	Credit
Change Order to Increase Job Total	Accounts Receivable: 12000100	Retail Sales CORO: 71100100
Change Order to Decrease Job Total	Retail Sales CORO: 71100100	Accounts Receivable: 12000100

CANCEL AN ORDER & INVENTORY WRITE-OFFS

Learning Objectives

This section explains how to:

- Understand the steps necessary to Cancel an Order
- Write-off Inventory
- Cancel an Order if not keeping deposit
- Close an Order if keeping deposit
- Understand common errors

When is an Order Canceled?

There may be times when an Order needs to be Canceled. This can happen when a Product option has changed, there are make-ability restrictions, the homeowner wants to cancel the Order, or the HOA or historical application was denied.

Although this cancellation process normally occurs within three days of contract signing, there are some exceptions. The current Status of the Order will determine which steps need to be taken for an Order to be Canceled.

When to cancel at the Opportunity level:

The ONLY reason you're allowed to cancel at the Opportunity level is if the sales appointment did not occur. For example, if the homeowner calls before the sales appointment and says they signed a contract with a different company, you can cancel at the Opportunity level. The ISC will need to Cancel the Sales Appointment in Enabled Plus or rForce, then the Opportunity Stage can be updated to Canceled. Otherwise, you will get an Error.

Cancel the Opportunity by changing the Opportunity Status to Canceled.

The screenshot shows the CRM interface for an Opportunity. The top bar indicates the Opportunity Name: "App: DULUTH, THOMPSON, +1(555) 555-5555". Below this, there are tabs for "New", "In Progress", and "Cancellation". The "Details" tab is active. The form contains fields for Opportunity Name, Account Name, Store Location, Sales Territory, Price Book, Suite Id, and Last DNS Date. A dropdown menu is open, showing various status options. The "Canceled" option is highlighted with a red box. The dropdown also shows "New", "In Progress", "Quoted", "Finance Pending", "Sold", "Measured", "Suspended", "Pending Cancellation", and "Canceled and Sold". The "New" option is selected in the dropdown.

For Sold, Pending Sale, and Finance Turndown scenarios:

The Order will need to be created and then canceled. If the sale was resulted incorrectly, a leader with E+ or SalesGateway access will have to change the result.

Examples of when to cancel at the Order level:

- Finance turndown
- Homeowner cancellation
- HOA rejected window design

Cancel the Order by choosing "Cancel Order" in the dropdown in the top right. You will then be asked to select a Cancellation Reason.

rForce will leave the Opportunity in Stage "Sold".

rForce will auto-check the "Canceled Order" box on the Opportunity (Scroll down).

Orders: Cancel an Order & Inventory Write Offs

Inventory Write-Off

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

Before you can Cancel an Order, you first need to check if any Products have been manufactured and/or Received. An Inventory Write-off must be done **before** the Order is Canceled and **can only occur if all payments have been refunded to the homeowner**.

NOTE: If you are not refunding deposit, therefore retaining it, do not apply an Inventory Write Off and do not cancel the job. Job will have to be Revenue Recognized.

To verify if Products have been Received:

1. On the Order detail page, click on the Purchase Orders shortcut. If the Purchase Orders are in a Status of Received, write-off the inventory before Canceling the Order.

- Click on the Purchase Order Number to go to the detail page.

Purchase Order Nu...	Vendor	Amount	Status	Estimated Ship Date	Responsibility
SJ1553276P	Bayworld	\$3,791.48	Received	03/09/2023	
SX1557408P	Renewal by Andersen	\$13,410.32	Received	03/10/2023	

- Click the drop-down carrot at the top of the page and then select **Inventory Write Off**.

Purchase Order **SX1557408P**

Upcoming & Overdue

No activities to show.

Get started by sending an email, scheduling a task, and more.

March - 2023 3 Months Ago

Estimated Ship Date Has Changed

Jessica Simon had a task

No more past activities to load.

- rForce will alert you if a deposit has to be refunded first.

NOTE: You cannot write off product if a deposit is being retained – you would have to Revenue Recognize job instead of cancelling.

Inventory Write Off

Inventory cannot be written off if the customer deposit is being retained in any amount. Please fully refund any payments before completing an Inventory Write-off.

Cancel Save

Description	Quantity	Retail Price	Variant Number	Cost	Qty Received
Double Hung Window (DG)	1	\$0.00	PW WHWH14585393	\$401.63	1
Double Hung Window (DG)	1	\$0.00	CT WHWH14585394	\$1,248.36	1
Double Hung Window (DG)	1	\$0.00	DG WHWH14585395	\$536.95	1

- If payments have been refunded (as required) the dialog box will appear for the inventory write off.

- Enter the Quantity to Write Off for each line

NOTE: This field auto-fills, so you will need to change Quantity to zero if you do not want to write off that unit. This value to write off should match what is in the Qty Received column. Click **Save** after confirming quantities to be written off.

- Notify your Warehouse to destroy the product once it has been written off.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you close a job, where applicable:

Action Taken	Debit	Credit
Inventory Write-Off	Inventory Write Off: 87000000	Product Inventory CORO: 14300120

Cancel an Order if Not Keeping Deposit

If product has not been manufactured, **refund the deposit to the customer and cancel the order.**

- From the order screen, click on the drop-down carrot on the top right. Select **"Cancel Order"**.

- Click your cancellation reason. And then select **Cancel Order**.

- The order will move to Cancelled status.

4. Open activities and action items. The action items will depend on the current status of your Order and which activities have been completed. There are two general scenarios in which an Order would be Canceled:
 - A. User is able to Cancel without performing any additional activities. This would happen if an Order was being canceled early in the Order process, or after you have completed all necessary activities.
 - B. The Order status will now show as Canceled and any open Visit Work Orders will be canceled automatically.

- C. There are remaining activities that need to be completed, so you will not be able to Cancel. You will be presented with an error message stating what needs to be completed. Complete all the activities before Canceling the Order.

Closing an Order if Keeping Deposit

This process will only be used if product has already been manufactured. Is Order is going to be cancelled but we are retaining the customer deposit due to already manufactured products, so rather than cancelling, we will revenue recognize the order and close it.

NOTE: Some of these steps may only be available to CORO users.

1. Cancellation after product has been ordered and manager has directed to retain the deposit (Example: Situation where homeowner has been unresponsive).
 - A. Cancel all Discounts (change status of discount to Cancelled)
 - i. Open the discount line for edit and change status to **Cancelled**.

- B. Identify “combined retail total”. Then go to Product Tab... **Add Product**.
- C. Enter “Change Order” as product type (for removing full job cost)
 - i. Put in the floor plan ID “CNCL JOB”
 - ii. In Unit cost field put the combined retail total with a minus in front (creating negative cost)
 - iii. In the notes field put (example): FULL JOB CANCELLED due to homeowner unresponsive to scheduling installation

iv. Hit the “Save and New”

Product Name: Change Order

Unit ID: CNCL JOB

Unit Price: -\$16,487.00

Notes: FULL JOB CANCELLED - due to homeowner unresponsive to sc

Total Retail Price: -\$16,487.00

- D. Enter another Change order line
 - i. Put in the floor plan ID “CNCL FEE”
 - ii. In Unit cost field enter the deposit amount retaining (as a positive) – this puts that money back into the job (allocated as CNCL FEE)
 - iii. In the notes field put (example): CANCEL FEE (Retaining of deposit as product had been ordered/manufactured – per agreement).
 - iv. Hit “Save and Close”

Product Name: Change Order

Unit ID: CNCL FEE

Unit Price: \$4,121.00

Notes: Cancel Fee

Total Retail Price: \$4,121.00

- E. Review the product section. You should see the 2 new lines you entered one as a negative and one as a positive. (Both with CNCL in the floor plan)

- G. Cancel any open Work Orders.

- H. Schedule a “dummy” Install Work Order so the order status changes to Install Scheduled.
- I. Go to the top Right of the job (drop down carrot) and choose “**Recognize Revenue**”. Then go back to the same drop down and select **Job Close**.
- J. This completes the cancellation and recognizes revenue from the deposit. It also automatically accounts for the product inventory (taking it out of inventory).
- K. Email the warehouse team to destroy product.
- L. Submit a Fetch request to Cancel the Survey.

Common Errors

Below are common errors and the activities associated with them:

- **Error:** “Order with Revenue Recognized cannot be Canceled.”

Within the Order, if revenue is recognized and there is a date in the Revenue Recognition field, you will be presented with this error. This means that the install is complete, and the Order cannot be Canceled.

▼ Additional Information	
Order Processed Date	7/22/2017
Revenue Recognized Date	2/19/2018
Estimated Ship Date	12/11/2017

- **Error:** “Please enter Refund before Canceling the Order.”

Any Payments that were received must be Refunded to Cancel an Order. Look at the Order Details section on the Order detail page. Use a Business Adjustment if no Refund will be given.

PUT ORDERS ON HOLD

Learning Objectives

This section explains:

- When to put an order On Hold
- How to put an order On Hold
- How to remove an order from On Hold

When To Put an Order On Hold

Though orders can be put On Hold at any point after the Back Office Checks have been completed for an order (Orders in Draft status cannot be put on hold), it is important to use the On Hold status appropriately so Report statuses and Commission payments are accurate.

NOTE: If the order needs to go On Hold due to something that occurred at the IPM/Tech Measure appointment, you must put the job On Hold PRIOR TO completing the Tech Measure Work Order. The status should not flip to Ready To Order if the Sales Consultant is responsible for the On Hold reason and/or needs to do follow-up work to move the job forward. This includes if Sales has responsibility in clearing HOAs.

Put an Order On Hold

1. From the Order, Click the **Place on Hold** button on top right of the screen.

2. You can edit the Subject Line, add a primary reason, secondary reason, comments, and who you want the task assigned to.

A screenshot of a web form titled 'Place on Hold'. The form contains the following fields and elements:

- Place this order on hold?** (Section header)
- If this order is already on hold, you can still create On Hold Task(s) here.
- Subject**: A text input field containing 'On Hold'.
- * Primary Reason**: A dropdown menu showing '-- none selected --'.
- Comment**: A large text area for additional notes.
- * Assigned To**: A dropdown menu showing 'Traci Keskitalo' with a user icon and a close button (X).
- Due Date Only**: A date picker field.
- MMM d, yyyy (Label for the date field)
- ☐ Do you want to create another On Hold task ?
- Finish** button (Green button at the bottom right).

3. If you only want to create one On Hold task, click **Finish**. If you want to create another Hold Task, check the box at the bottom.

Due Date Only

MMM d, yyyy

☐ Do you want to create another On Hold task ?

Finish

4. If you check the box to create another On Hold task, fill in the Subject, Primary Reason, Secondary Reason, comments, and who it should be assigned to. Then click **Finish**.

Due Date Only

MMM d, yyyy

☒ Do you want to create another On Hold task ?

6. If at a later point you need to create another On Hold task, re-click the Place on Hold button and go through the steps like you did for the original On Hold task. Once complete, you'll see both On Hold tasks under Open Activities.

See below guide to help navigate how to put orders On Hold.

HOLD Quick Reference Guide

Subject Line Text	On Hold - HOA	On Hold - HISTORICAL	On Hold - LOCAL FEE	On Hold - PERMIT	For locations using 3rd party for permits and have no Permit Coord, assign HOA, Historical, Local Fee, & Permit holds to the IOS	On Hold - Mgmt
Primary Reason	Project Approval	Project Approval	Project Approval	Project Approval		Project Approval
Secondary Reason	Homeowner's Assoc	Historical Preservation	Architectural Review	Permit Pending		Management Review
Comments	Neighborhood Name	Historical District Name	Jurisdiction Name	"Construction"		"Addendum Review"
Assigned To	Permit Coord	Permit Coord	Permit Coord	Permit Coord		GM
	Neighborhood HOA	Historical Approval Required	Any Permit Required by Local Jurisdiction	Any building permit required due to Header Work, etc.		GM to review Addendums over 8% of job and make decision on accepting job

Subject Line Text	On Hold - CUSTOMER	On Hold - SALES	On Hold - TECH	On Hold - Homeowner	Pending Change is a secondary reason under Homeowner Decision. Do not use Pending Change. Instead use Homeowner Place On Hold or one of the Inc/Missing Ppwk buckets.	Pending Cancellation is a secondary reason under Homeowner Decision. If a Job is Pending Cancellation, then Change Job Status. No HOLD task is needed.
Primary Reason	Homeowner Decision	Inc/Missing Ppwk	Inc/Missing Ppwk	Homeowner Decision		
Secondary Reason	Deferred Installation	Sales	Tech Measure	Homeowner Place on Hold		
Comments	Why on Hold	Why on Hold	Why on Hold	Why On Hold		
Assigned To	Concierge	Sales Rep	IPM	Concierge		
	Any Delay from Customer in Scheduling TM or Install	Requires Sales Rep Action	Requires TechMeasure Action	Misc non-scheduling Homeowner driven delay, often health issues		

Subject Line Text	On Hold - NSPR	On Hold - Bayworld	On Hold - Provia	On Hold - SPR	On Hold - ROT	Don't use Product Limitations "Egress issues", "Project can't be installed as sold", or "Size restrictions". These should be assigned to IPM/Sales "Inc/Missing paperwork" instead
Primary Reason	Vendor Information	Venfor Information	Vendor Information	Vendor Information	Repair	
Secondary Reason	NSPR Approval	Bayworld Ack.	Entry Door Ack.	Spr Approval	Rot Shut Down	
Comments	Date sent NSPR	Date sent Bay order	Date ordered Provia	Date sent SPR	Date and who is fixing rot	
Assigned To	Order Entry	Order Entry	Order Entry	Order Entry	Install Leader	
	Waiting on Vendor for approval	Waiting on Vendor for something	Waiting on Vendor for something	Waiting on Vendor for something		

Subject Line Text	On Hold - Finance	On Hold - Finance	On Hold - Finance	On Hold - NSF	On Hold - FTD	Finance Holds may also be assigned to Sales when it is the DC's responsibility to address.
Primary Reason	Finance	Finance	Finance	Finance	Finance	
Secondary Reason	Need Signatures	Financing Changes	Loan Stipulations	Insufficient Funds	Finance Turn Down	
Comments	Date sent for signatures	What changes	What stipulations	Date and what issue is	Explanation	
Assigned To	Finance Coordinator	Finance Coordinator	Finance Coordinator	Finance Coordinator	Finance Coordinator	
	Waiting on signatures from customer	Payment plan, Finance Program, Lender changes	Waiting for Loan Stipulations to be cleared	Cash issues, such as NSF checks	If booked, but FTD later or booked by mistake	

*On any given Order, there may be more than 1 on hold task, So DO NOT Release Products until ALL HOLD's are Closed.

EXAMPLE: May be On Hold-Sales while simultaneously being On Hold- HOA.

*Add any progress/follow up notes to the Hold comments

Remove an Order from On Hold

When an order is ready to come off of hold, you need to complete all On Hold Open Activities for things to move through the system correctly.

1. From the Order, click the arrow to the right of the On Hold task and click **Edit**.

2. To complete the task, change the Status of the task to Completed. Click **Save**.

3. Once all On Hold tasks have been completed, the order will return to its previous status and the tasks will no longer show under Open Activities.

TASKS, NOTES, LOG PHONE CALLS & CHATTER

Learning Objectives

This section explains how to:

- Create & Assign Tasks
- Log Phone Calls
- Log a Note
- Use Chatter

Create & Assign Tasks

Tasks are used to keep track of pending items or create reminders. There are four different kinds of Tasks in rForce:

- **Collections:** Collection Work Orders are used to assign tasks on open AR balances once your project has been revenue recognized.
- **General:** Primary type of Task that is used, can be used for reminders or important need to know information about the project
- **On Hold:** Used when an Order is On Hold, describing in detail what next steps are needed
- **Post Install Call:** Log the post installation call.

1. Click on the Open Activities drop down and click **New Task**.

2. Select the Record Type and click **Next**.

Collections Task example:

A screenshot of the 'New Task' form in the rForce software. The form has a title 'New Task' at the top. Below the title is a section titled 'Select a record type' with four radio button options: 'General' (Used for General Tasks), 'Collections' (highlighted with a red box), 'On Hold', and 'Post Install Call' (Post install call record type). At the bottom right of the form, there are two buttons: 'Cancel' and 'Next' (highlighted with a red box).

3. Fill out the fields in the Task Information section.
 - **Subject:** The title of the Task
 - **Comments:** Add a brief description of this Task
 - **Due Date:** Add specific date the task should be completed by
 - **Assigned To:** Identify who will be responsible to oversee/ complete the task
 - **Related To Name:** Add the customer's name in the Contact field

2. Select the Record Type and click **Next**.

The screenshot shows the 'New Task' form. Under the heading 'Select a record type', there are four radio button options: 'General' (selected and highlighted with a red box), 'Collections', 'On Hold', and 'Post Install Call' (with a subtext 'Post install call record type'). At the bottom right of the form, there are two buttons: 'Cancel' and 'Next' (highlighted with a red box).

3. Fill out the fields in the Task Information section.

- **Subject:** The title of the Task
- **Comments:** You can add a brief description of this Task
- **Due Date:** Add specific date the task should be completed by (you can leave empty if this task will remain open for the life of the project.)
- **Assigned To:** Identify who will be responsible to oversee/ complete the task
- **Related To Name:** Add the customer's name in the Contact field
- **Reminder Set:** Set a date and time for a reminder of this task, you will get a notification from SF

The screenshot shows the 'New Task: General' form. The 'Task Information' section contains several fields, many of which are highlighted with red boxes: 'Subject' (with a subtext 'Preferred Method of Contact: TEXT'), 'Assigned To' (showing 'Michelle Morales'), 'Comments' (with a subtext 'Text touchpoint to homeowner'), 'Due Date' (with a calendar icon), 'Reminder Set' (with a checked checkbox), and 'Related To' (with a subtext 'Name' and a search bar). Other visible fields include 'Status' (set to 'Open'), 'Priority' (set to 'Normal'), 'Service Type' (set to '--None--'), and 'Create Recurring Series of Tasks' (unchecked). At the bottom, there is a 'System Information' section with a 'Pivotal id' field. The bottom right corner has three buttons: 'Save & New', 'Cancel', and 'Save'.

4. Click **Save** when finished. Your General Task will look like this once it has been saved.

Log a Note

You can also log a note to log information, which will show up under Activity history.

1. Click the down arrow next to the New Task button and click **Log a Note**.

2. Enter a Subject and Comments. Then press **Save**.

Chatter

Chatter can be used to make notes about the order, but also to communicate with your teammates.

1. Click the Chatter tab.
2. Type the notes you want to post. Using the @ symbol and then typing a teammates name shows up in their Notifications. It will also send them an email that they were mentioned and what Order it's tied to.
3. Click **Share**.

Work with local leadership to determine best practices in using this feature for your location. All Chatter will show in the Chatter feed.

ORDER SALES SAMPLES IN RFORCE

Learning Objectives

This section explains how to:

- Order samples for Sales Consultants or Showrooms in rForce
- Order Hand Sample Kit & Cover through RbA Marketplace - Hand Sample Kit & Cover (by Sales Admin or Sales Manager)

Order Samples for Sales Consultants or Showrooms

Use the global search to locate your store Account name. The Account name will be your store's address. (If not found please submit a Fetch request to add for you!). Click on the Account name and then Click **Opportunities**.

1. Click on **New** on the top right to bring up a New Opportunity.

2. Click **Next** and leave as a CORO Record Type regardless of if your store is ARO or CORO.
3. In the Opportunity Name field put in the title "Sales Samples", a close date of today, and the Stage to be "New", enter your Store Location and Price Book.

4. Scroll down to Lead Source Information and choose “Operations Use Only” for both Lead Source and Source Breakdown. Then click **Save**.

Price Book: Twin Cities - 2017 v1.0 | Probability (%): 0%

8. This will create an Order on the Opportunity. From the Related tab or the quick bar at the top, you should see a new Order in Draft status has been created. Click the Order Number to go to the order.

Orders (3)		
Order Number	Status	Booking Date
02878699	Draft	4/6/2023

9. Within the Order, complete the Back Office Checks by clicking Update and complete/check all boxes.
10. Go to the Tech Measure Work Order and assign to a Tech. Use FSL to drag and drop a back-dated appointment.
11. Change Tech Measure Work Order status to Appt Complete/Closed. This will change the Order status to Ready to Order.
12. Add the needed products, create a new Purchase Order, and Release the PO.

Sample Specifications for Sales Samples:

Product	Regular Size	Notes
DB,IF,SS		
DB,IF,SS	18 x 30.5	0 degree or FS
DG	18 x 30.5	
CS	18 x 30.5	L Handing
GL	29 x 18	AP Handing

13. Notify your CSR that you have released PO XXXXXXXX, and ask that they add the 30% discount to the PO for hand samples.

*At this point, a Sales Manager or Admin will have to order the Hand Sample Kit and Cover from the RbA Marketplace following the steps in the next section.

14. Once product arrives in the warehouse, receive the product in rForce.
- **CORO** locations, move on to next step (14).
 - **ARO** locations may move to the next section (Order Hand Sample Kit & Cover through RbA Marketplace).

15. CORO Locations must complete steps 14-19.

Once the product has been received in rForce, follow the write off process for the units:

- a. Click open the Purchase Order. Click the drop-down arrow at the top of the page, and select Inventory Write Off.

- b. Enter the quantity to Write Off for each line (it should auto-fill). Then click **Save**.

16. Email COROFinanceTeam@andersencorp.com with the PO# requesting they move it from Write Off to Sales Samples, as these require a manual entry by Finance. Reminder - you MUST write off the product BEFORE the order is closed.

17. Change the status of the open Install Work order to Cancelled. Choose a Cancellation Reason of “Closed by Recognizing Revenue.”

18. Schedule a “Dummy” Install Work Order, and the order status will change to Install Scheduled.

19. Click the drop-down arrow on top right of the Order and choose Recognize Revenue. The order status should change to Install Complete.

20. Then click the same drop-down arrow again and choose Job Closed. Make sure the order status changed to Job Closed. You **must do this step.**

*For instructions on how to do reorders for Sales/Showroom Samples, see the **Sales Samples Reorder** page under the Service section.

Order Hand Sample Kit & Cover through RbA Marketplace (by Sales Admin or Sales Manager)

After you have completed the above steps through Step 13, have your Sales Manager or Sales Admin order the Hand Sample Kit and Cover from the RbA Marketplace on The Link (can also be accessed at www.rbamarketplace.com).

CREATE A COST PURCHASE ORDER

Learning objectives

This section explains how to:

- Define a Cost Purchase Order
- Create a Cost Purchase Order
- Select a Vendor and add items to a Cost Purchase Order
- Create a Cost Purchase Order for Stock Patio Door Parts
- Confirm Cost Purchase Orders

A Cost Purchase Order is a Purchase Order for all Renewal parts, such as hardware, that have a part number. These items can also include construction materials, marketing or office materials, and more. Cost Purchase Orders are not associated with any specific Order unless created within a Service Request.

Create a Cost Purchase Order for Stock

1. Select Purchase Orders from the main navigation within the header.
2. To view a Cost Purchase Order that was previously created, navigate to the Purchase Order tab, and filter for Cost Purchase Orders using the List View (2) (use the black down arrow to select Cost Purchase Orders if this is not the default list). Another option is to use the Global Search (1) by entering the Purchase Order number and clicking Search.

3. Click the **New Cost PO (LEX Only)** button. The Create New Cost Purchase Order page will appear. Select the correct Vendor for the Cost Purchase Order.

Selecting a Vendor and Adding Items to a Cost Purchase Order

1. On the create **Cost Purchase Order** page, select a **Vendor** from the Vendor dropdown (1). To view Vendors, begin typing the name of the Vendor associated with the items required. Results will appear as you type. Select the correct Vendor within the dropdown and input the Requested Ship Date.

NOTE: The **Store Location** defaults to your specific Store Location. If this needs to be shipped to a different Location/Warehouse, click the X on the right side of the box and search for the correct Store Location related to that warehouse (Ex. Pittsburgh has 86 (Monroeville) and 84 (Cranberry) warehouses associated with their branch).

2. Enter a Requested Ship Date if desired (for windows). Entering a date does not guarantee the order will ship on that date, as that depends on lead times, truck schedule & truck capacity. This field is best to be used when trying to defer a ship
3. Enter Order number and Customer Last name in the Reference box if desired. This will show up on the package label.

4. Click the **Save** button (this will turn blue when the Vendor is entered).
5. Click on the **Add Parts** button.

6. After you click the Add Parts button, the Add Parts box will appear on your screen. To add a part, you can search for the part by entering the part number into the **Part** box. If you see two identical numbers, choose the first one. You will then need to select the Cost Center from the **Cost Center** drop down (if not auto-populated) and enter the **Quantity**. Once all necessary information is added, click the Add Parts button – this button will turn green once all part information is added.

- After all parts have been added, click the **Save** button. Once you click Save, it will go back to the Purchase Order screen, and you will see the parts that have been added under the Line Items tab.

- After all of the necessary items have been added, the next step is to click **Release PO**.

NOTE: To delete a line, minimize each category (shorten the width) until you see this symbol on the right . Click on the symbol (drop down) and select "Delete". You will not be prompted with "are you sure you want to delete this item" message. It will just be deleted so make sure you're on the correct line.

For instructions on creating Cost Purchase Orders for Service, refer to the Creating a Cost Purchase Order for Service Request section.

Create Cost Purchase Orders for Stock Patio Door Parts

- Create your stock PO in rforce. Click the **New Cost PO** button under your purchase orders tab.

2. Choose “Renewal by Andersen – Door” for your vendor. You may place a homeowner name or service request number in the “Reference” field for that information to show up on the confirmation. Hit the blue **Save** button.

Create New Cost Purchase Order

Vendor: Renewal by Andersen - Door

Store Location: 0077 - Twin Cities

Requested Ship Date:

Reference: 1234567

Comments:

Cancel Save

3. You now have a stock Purchase Order Number. DO NOT enter part numbers into the line items in this Purchase Order.
4. Click **Add Parts** button and enter “Miscellaneous Door Component.” Select your cost center and quantity and click “Add Part.” You’ll see the part shows up in the list. This is the only line item you need to add to this PO. Click **Save** to return to your PO screen.

5. Go into IQ+ and create and order as normal by clicking the “New Quote” button. Enter the customer information as your store typically would.

The screenshot shows the 'New Quote' form in the IQ+ system. At the top, there is a header bar with a '+ New Quote' button and a 'Need Help with Quoting?' link. Below the header, the breadcrumb trail reads 'Home / My Quotes / New Quote'. The main title is 'New Quote'. The form contains three input fields: 'Quote Name' with the value '77 stock patio', 'Project Name' with the value 'Smith', and 'Client' with a dropdown menu labeled 'Select a client'. At the bottom right, there are 'Cancel' and 'Create' buttons.

6. Click the “Line Items” tab. Click the green “New Line Item” button.

The screenshot shows the header of a quote titled 'Quote 2956393 test - test'. Below the title, a message states 'Product and acknowledgement will be labeled with Project Name for job name'. There is a navigation bar with several tabs: 'Quote Details', 'Customer', 'Line Items' (which is circled in red), 'Attachments', 'Notes', and 'Relatives'.

7. Scroll down. Under “Parts & Accessories, select “All Parts.”

The screenshot shows the 'Parts & Accessories' section of the quote. On the left, there is a sidebar with an 'Actions' dropdown and a 'Submit Order' button. Below these, there is a green button labeled '+ New Line Item'. On the right, the main content area shows the 'Entry Door' section. Under the 'Parts & Accessories' heading, there is a list of items. The first item is 'All Parts', which is circled in red.

8. Select “Lookup By Part Number.”

9. Enter the part number and quantity, then click “Add to Quote” button. Create a new line for each separate part number.

10. Click the “Add to Quote” button.

NOTE: Part numbers can be found in the online parts catalogs (<https://www.andersenwindows.com/support/replacement-parts/parts-catalog/#doors>). On this page, click into the catalog for the door style you're working with (it'll open in a separate tab), and hit CTRL-F to search for the part you need. Once you've found the correct part, copy the part number and paste it into the "Enter Part Number Here" field noted in Step 9.

12. Once all line items have been added, click the orange “Submit Order” button. This will submit the order to the factory.

Actions

Submit Order

+ New Line Item

13. Go back to your PO in rForce. Click “Release PO” in the upper right corner. This does not release an order to the factory, but acts as a timestamp so you can track in rForce when you ordered the parts in IQ+.

Edit Cancel PO Release PO Reject PO Confirm PO Receive PO

Activity Files Notes

Confirm a Cost PO

Once the Purchase Order is confirmed by the factory and you can view the Confirmation on iHub, you will need to confirm it manually in rForce.

1. Search rForce by the PO number and open the PO. Click **Confirm PO**.

A screenshot of a software interface showing a horizontal bar with several buttons: 'Edit', 'Cancel PO', 'Release PO', 'Reject PO', 'Confirm PO', and 'Receive PO'. The 'Confirm PO' button is circled in red. Below this bar is a tabbed interface with 'Activity', 'Files', and 'Notes' tabs.

2. Fill out the Estimated Ship Date, Confirmation Number and Cost of each line. Click **Save**.

A screenshot of the 'Confirm Purchase Order' form. At the top, it says 'Confirm Purchase Order'. Below this are two input fields: 'Estimated Ship Date' with the value '2/3/2023' and a calendar icon, and 'Tax' with the value '\$0.00'. Below these is a 'Confirmation Number' field with the value '7894561'. Below the form fields is a table with the following columns: 'Room ID', 'Product', 'Cost', 'Old Variant', and 'New Variant'. The table has one row with the following data: '1', 'Miscellaneous Door Component', '\$100.00', and empty cells for 'Old Variant' and 'New Variant'. The 'Cost' cell is highlighted in yellow and circled in red. At the bottom right of the form are 'Cancel' and 'Save' buttons.

Room ID	Product	Cost	Old Variant	New Variant
1	Miscellaneous Door Component	\$100.00		

The Purchase Order is now in “Confirmed” status and is ready to be received in rForce once your location receives the product.

NOTE: For other vendors, the process for creating Cost POs can vary by location. Check with your Supervisor for instructions.

ADD A VENDOR CREDIT ON PURCHASE ORDERS

Learning objectives

This section explains how to:

- Add a Vendor Credit to a Cost Purchase Order

Add a Vendor Credit to a Cost Purchase Order

There may be instances when a Vendor requests a credit to be applied to the Cost Purchase Order. This can happen any time after the Vendor has Confirmed a Cost Purchase Order.

1. Click the down arrow in the top right corner in the Purchase Order and then click the **Vendor Credit** button.

The screenshot shows a Purchase Order form for PO FD1104827S. The status is 'Received', the estimated ship date is 11/5/2021, and the vendor is Pro-Via Door Inc Pittsburgh. The top right corner has buttons for Edit, Cancel PO, Release PO, Reject PO, Confirm PO, and Receive PO. A red box highlights the down arrow next to the Receive PO button. A dropdown menu is open, showing options: Vendor Credit, Print Service PO, Printable View, and ARO Print PO. The 'Vendor Credit' option is highlighted with a red box. The main content area shows a table of products with one item: Miscellaneous Door Component, quantity 1, retail price \$1.00. The right sidebar shows an 'Activity' section with filters and a list of activities.

2. The cost of the Purchase Order auto-populates in the New Vendor Credit field. Confirm that the dollar amount of the credit in that field is correct. If this is correct, click **Save**.

The screenshot shows the 'Vendor Credit' form. At the top, it says 'ALL AVAILABLE PRODUCTS ARE CURRENTLY SELECTED TO RECEIVE FULL VENDOR CREDIT'. Below this is a table with columns: P., Va..., Total Cost, Tax, Ve..., and New Vendor Credit. The first row shows a product with a total cost of \$78.92, tax of \$5.52, and a new vendor credit of \$84.44. The 'New Vendor Credit' field is highlighted with a red box. At the bottom right, there are 'Cancel' and 'Save' buttons. The 'Save' button is highlighted with a red box.

P.	Va...	Total Cost	Tax	Ve...	New Vendor Credit
1	Mis...	\$78.92	\$5.52		\$84.44

SERVICE REQUESTS

SERVICE REQUEST OVERVIEW & NAVIGATION

Before jumping into the functionality within the Service Request, let's get an understanding of the layout.

Service Request Header

At the top of the Service Request page, you can find some details about your Service Request including the Service Request Number, Service Type, Service Status, the Bill to Contact, Balance Due (if applicable) and the Reimbursement Total (this will only populate after submitting for warranty).

There is also the:

- **Status Bar (1)** that shows the progress of the Service Request
- **Quick Links (2)** to different information within the Service Request (Not available for all user profiles)
- **Tabs (3)** to click through to look at different information within the Service Request.

Service Request Tabs

Details Tab: At the top of the Details Tab is the Description. This is a good location to summarize what's happening with the Service. Work with your location to determine best template for the Description section for consistency.

The screenshot shows the 'Details' tab selected. The 'Description' section is expanded, revealing a form with the following fields:

- Description: What is this/Visit number ****Visit #1****
- Number of Techs: 1
- Time/Hours Needed: 1
- Product Ordered: 2 CW sash
- Product Received:
- Shipping Location: 86 // Monroeville
- Materials Needed: 2 Casement Sash
- Scope of Work for this Visit: Replace both sash in a Casement unit from 2009 due to cracked veneer
- Additional note: Please call on your way

Below the Description is the **Service Request Information**. This provides important information including the Account Name (customer address), Bill to Contact, Service Type, Status and Order Owner.

NOTE: If a Service Request is a Save type, the primary Save reason and secondary Save reason will be populated and the Service Request will automatically close.

Service Request Information

Account Name	48162, 415 Hollywood Dr	Order Owner	Ashlee Devola
Bill To Contact	Carol Calender	Booking Date	7/18/2023
Order Number	03207789	Store Location	0092 - Detroit, MI
Service Type	Service	Backorder	☐
Service Initiated By	Customer	# of Visits	
Status	To Be Ordered	FSL Mileage	
Service Request Hold Reason			

Below the Service Request Information is the **Order Details**. Here is where you will find your Service Quote and Billing information. This section is used when a billable Service Request has been created. An example of a billable service is a customer is paying for a new screen because they have damaged the current one.

Order Details

AR Reason	Quote Subtotal	\$141.00
	Invoice Subtotal	\$141.00
	Billable Tax Amount	\$0.00
	Sales Tax	\$0.00
	Payments Received	\$141.00
	Amount Due	\$0.00
	Total Finance Fees	\$0.00
Invoice Notes		

Below the Order Details is the **Reimbursement Information**. Fields like Reimbursement Labor \$, Parts \$ and Mileage \$ are displayed in this section. This section is updated after the service is complete and the New Reimbursement process is complete and is ready to submit for warranty.

NOTE: Reimbursement Mileage \$ is calculated after the status is moved to Warranty Submitted.

Reimbursement Information

Reimbursement Labor \$	\$0.00	Warranty Date Submitted	
Reimbursement Parts \$	\$0.00	Warranty Date Accepted	
Reimbursement Total	\$0.00	Warranty Rejected Date	
Reimbursement Mileage \$	\$0.00	Rejection Reason	
Warranty Reimbursement Amount			

Below the Reimbursement Information is the **Sold Order Details**. This information is from the original sold Order and helps to identify previous Resources that worked on the original Order. Selecting the correct Sold Order is important

Service Request Statuses

There are many statuses within a Service Request. Each status helps to identify the progress of the Service Request within the process. The Service Request status needs to be manually updated every time. This can be done by using the status bar at the top and clicking **Mark Status as Complete** or by clicking the pencil next to the **Status** drop down.

Below are the different Statuses a Service Request can move through. It is important to update the status throughout the life of the Service to understand what action is required and for reporting purposes. Correct status on a Service will help ensure steps are being completed in a timely manner.

Status Definitions:

- **New:** Default status when a service request is created.
- **Quote:** A quote to be provided to a homeowner for a service.
- **To Be Ordered:** A Product needs to be ordered. It could also show that you are waiting on a service tech to give information prior to ordering.
- **Product Ordered:** When Product has been ordered from the manufacturer.
- **Customer Call Back:** Job is paused, waiting for a response from the customer. This could be submission of photos, or any additional information needed.
- **Service To Be Scheduled:** Service Visit Work Order needs to be scheduled. Also, it is possible skills need to be added to the work order before it can be scheduled.
- **Service Scheduled:** Work Order has been scheduled and a technician will be going to the customer's home.
- **Service Complete:** Service is complete and needs to be submitted for warranty or closed.
- **Service On Hold:** An on-hold Service Request.
- **Seasonal Service:** The Service Request is being put on hold for either weather or seasonal factors.
- **Warranty Submitted:** Request for warranty to the manufacturer has been submitted.
- **Warranty Accepted:** The warranty request has been accepted by the manufacturer.
- **Warranty Rejected:** The warranty request has been rejected by the manufacturer.
- **Cancelled:** The Service Request was opened in error or is determined that no service is needed for the homeowner.
- **Closed:** This is the final status and signifies when revenue has been recognized and potential warranty has been accepted.

CREATE A SERVICE REQUEST

Learning Objectives

This section explains how to:

- Create a new Service Request from an Account
- Add Service Products to a Service Request

A Service Request can be created during the installation, a few days after the installation, or perhaps many years after. Service Requests can be made throughout the entirety of the product's warranty period and beyond. Service Requests can sometimes be billable to the customer.

Create a New Service Request from an Account

When either a job requires additional visits or a customer calls in requesting service, a new Service Request from that customer's Account can be created.

1. First, locate the customer's Account. The best approach to locating the customer's account is using the Global Search tool located in the main header at the top of the page. Search by customer name, dwelling address, or phone number.
2. When the correct Account is located, click the **Account Name** to open the Account detail page.

3. Click on the **Service Requests** tab and then click on the **Create Service Request** button. If there are any existing Service Requests associated with this Account, they will be visible within this section.

4. All Orders associated with the Account are in the **Select an Order** dropdown, select the Order that the Asset that requires service was originally ordered on. If the Assets span multiple sold orders, best practice would be to select the most recent, as only one order can be associated to a Service Request. The Sold Order can be updated on the Service Request later.

Note: If the Account does not have an Orders or Assets, select the order of Not Listed and see the Legacy Assets section for more information to add those Assets.

The screenshot shows a 'Related Order' dropdown menu. The dropdown is open, displaying three options: '02725071 | Install: 8/1/2023', '02559120 | Install: 2/3/2023', and 'Not Listed'. The 'Next' button is highlighted with a red box.

5. When the correct Order is selected, click **Next**.
6. On the Service Request set up page, add additional details about the Products that need to be serviced.

The screenshot shows the 'Service Request' setup page. The page includes a header with 'Service Request' and a 'Continue' button. Below the header, there are fields for 'Service Type', 'Service Initiated By', and 'Description'. The 'Service Type' dropdown is set to 'Service'. The 'Service Initiated By' dropdown is set to 'Customer'. The 'Description' field is empty. The 'Continue' button is highlighted with a red box.

7. Select a service type from the **Service Type** dropdown.
- **Job in Progress** is automatically selected when the service request is within 30 days of the installation date and will not appear in the drop down for older orders.
 - **Service** is used when service on a Product is necessary. This will likely require a service tech to go to the customer's home.
 - **Save** is used if the issue was resolved during the call.
 - **Legacy** is used when a products information is not already in rForce. See Legacy Service section for more details.
 - **Field Service** is an option to be used when specific field service projects arise that require special handling.

NOTE: Service Type can be changed later if needed.

Service Requests: Create a Service Request

8. Select who the **Service Initiated By** field. Dropdown options include Customer, Installer, Service, Sales and IPM. For example: if a customer calls in, select Customer from the dropdown.
9. Add a description of the issue in the **Description** box.
10. Once all information is added, click **Continue**.
11. The next step is adding the Service Product or Products.

Add Service Products to a Service Request

This section reviews selecting Assets that need to be serviced. This process will create a Service Product on the Service Request. It is not required to add a Service Product at the time a Service Request is created and can be added later. This is best practice in situations where you do not have all correct data at the time. Confirm with local leadership on your store's preference.

NOTE: Every Service Request must eventually have at least one Service Product. Failure to add a Service Product will result in an error when attempting to Close/Warranty Submit.

1. This screen lists all Assets on the Account. You can expand each line by clicking the plus sign next to each Asset. Any components of that Asset that may need repair or service are listed under Product.

NOTE: A product must be received on the Purchase Order for it to become an Asset on the Account.

Service Requests: Create a Service Request

152

5. Select the **Defect Code** from the drop down for each Service Product. Only defect codes associated with that product line or Responsibility will be available for selection. Here, only affiliate codes are available since this is Retailer Responsibility.

The screenshot shows the service request form for Unit ID: 013 / Floor: / Room: Bedroom 2. The 'Product' column has 'S1' selected. The 'MTD Source Code' is 'H - Sash (Rails and Stiles)' and 'Responsibility' is 'Retailer'. The 'Defect Code' dropdown menu is open, showing a list of affiliate codes (A1 - Affiliate - Home... through A6 - Affiliate - Damag...). The 'A16 - Affiliate - Homeo...' option is highlighted with a red box.

6. Select the **Source of Defects** from drop down. For Manufacturing, Source of Defect should always be Renewal by Andersen for RbA Ordered products, otherwise other Vendors can be selected such as Provia or Bayworld. For Retailer/Customer responsibility, this field adds specific detail for retailers to use to code the remake.

The screenshot shows the service request form for Unit ID: 013 / Floor: / Room: Bedroom 2. The 'Product' column has 'S1' selected. The 'MTD Source Code' is 'H - Sash (Rails and Stiles)' and 'Responsibility' is 'Retailer'. The 'Defect Code' is 'A16 - Affiliate - Homeo...'. The 'Source of Defects' dropdown menu is open, showing a list of options (Aesthetic Function (R), Glass/Sash Panel (R), Goodwill, Grilles (R), Hardware (R), Screens (R), Unit ID). The 'Goodwill' option is highlighted with a red box.

7. Select **Defect Details** from the drop down. This detail is only necessary for Retailer/Customer Responsibility and helps Retailers understand what the issue was.

The screenshot shows the service request form for Unit ID: 013 / Floor: / Room: Bedroom 2. The 'Product' column has 'S1' selected. The 'MTD Source Code' is 'H - Sash (Rails and Stiles)' and 'Responsibility' is 'Retailer'. The 'Defect Code' is 'A16 - Affiliate - Homeo...' and the 'Source of Defects' is 'Goodwill'. The 'Defect Details' dropdown menu is open, showing a list of options (Customer Satisfaction, Out of Warranty, Select Details). The 'Select Details' option is highlighted with a red box.

NOTE: Source of Defect & Defect Details are very important and impact the Responsibility Matrix.

8. Click **Add** to add any necessary notes to each Service Product. Type your notes in the pop up that appears and click **Close**. Notes are important to add clarity for the Retail Quality team to process the order correctly and potentially prevent another reorder.

The screenshot shows a form for a service request. At the top, it says "CDW/JF | CDX WHPN2267609 | Unit ID: 013 / Floor: / Room: Bedroom 2". Below this is a table with columns: Select, Product, MTO Source Code, Responsibility, Defect Code, Source of Defects, Defect Details, Notes, and Apply to All. The table has several rows with checkboxes in the 'Select' column. At the bottom right, there are two buttons: "Add" and "Close", both highlighted with red boxes.

The screenshot shows a pop-up window titled "Add/View Notes". It has a text area for "Notes" and a "Close" button at the bottom right, which is highlighted with a red box.

9. If needing to reorder multiple units for the same reason, you can select codes on one unit, then click **Apply to All** checkbox. The codes & notes will copy to the additional units that are the same product line.
10. Once all necessary information is entered for each Service Product, click **Continue** in the top right corner of the page. This will bring you back to the Service Request page.

The screenshot shows the "Service Request" page. At the top right, there are two buttons: "Back" and "Continue", both highlighted with red boxes. Below the buttons is a progress bar with three steps: "Select Products", "Add Notes", and "Apply to All". The "Select Products" step is currently active. Below the progress bar is a list of units with checkboxes and expand/collapse icons. The units are: "7501865-001 | 7501865-001 | Unit ID: / Floor: / Room:", "CD | CD WHPN2267609 | Unit ID: 101 / Floor: / Room: Kitchen", "CDW/JF | CDX WHPN2267607 | Unit ID: 008 / Floor: / Room: Master Bedroom", and "CDW/JF | CDX WHPN2267609 | Unit ID: 013 / Floor: / Room: Bedroom 2".

NOTE: If needing to update the Source of Defect & Defect Details for CORO locations, see Addendum. ARO locations must submit a Fetch ticket if they need to update these fields.

UPDATE SERVICE REQUESTS

Learning Objectives

This section explains how to:

- Add Additional Service Products
- Edit Service Product
- Review Service Product Details

Add Additional Service Products

Often Service Products are added at the time the Service Request is created unless the product information is unknown at that time. There are also scenarios when additional service products need to be added later.

1. Click on the **Service Products** tab within the Service Request page. Service Products that have already been added will be listed. Click on the **Add Product** button.

The screenshot shows the 'Service Request' page for request 02705499. The 'Service Products' tab is highlighted with a red box. Below the tabs, there is a table of service products. The 'Add Product' button is also highlighted with a red box. The table has columns for Service Product, Component, Installed Product, Variant Number, Vendor, Responsib..., Purchase Order, and Reimbursement. A single product is listed: 0013186219, Complete Unit, 400 Series Frenchwood Inswing - 2 Panel, 01481115, Manufacturing.

2. Review the Add Service Products to a Service Request section for the details. All the same fields will be required when adding a Service Product after the Service Request was initially created.

Edit Service Products

There are a variety of reasons why codes may need to be updated on a Service Product after it is created. Best practice is to update these before printing a Service PO. Updating codes after a Service PO has been printed will not reflect the updates on the PO. This can cause discrepancies in what is processed vs. what is displayed in rForce.

1. Select Edit Product from the drop down on a Service Product.

The screenshot shows a dropdown menu for a service product. The options are: View/Edit Notes, Update Quote, Edit Product (highlighted with a red box), and Cancel Product.

2. Select Responsibility, MTO Source Code & Defect Code. This screen will not allow you to see what you already had selected as each of the fields will be blank to allow you to select new. Reference the Review Service Product Details section to see how to identify what codes you previously had on the Service Products.

NOTE: This screen does not allow you to edit the field Source of Defect & Defect Details. Submit a Fetch ticket to update these if necessary.

Review Service Product Details

Often it is helpful to see what codes were added to a Service Product after it has been created. This view allows users to see the codes but not edit.

1. To see the codes that were added to a Service Product, click on the **Component** name to open the Service Product page.

NOTE: For some users the component will not appear as a hyperlink (blue text & underline), but it will still open a new page.

SERVICE PURCHASE ORDERS

Learning Objectives

This section explains:

- Statuses for Service Purchase Order
- How to Create a Service Purchase Order
- How to Update the Service Purchase Order
- How to Print a Service Purchase Order
- How to Release, Confirm, and Receive a Service Purchase Order
- How to Handle Rejected Service Purchase Orders
- Cancel a Service Purchase Order

Statuses for Service Purchase Order

There are 6 different Purchase Order statuses. These automatically update when applicable criteria have been met.

- **In Process:** Initial status when a Purchase Order is created. Purchase Orders rejected from Retail Quality will also flip back to an In Process status when they have additional questions or need more information.
- **Released:** Use when order has been sent for processing. A copy of the PDF of the Service the Purchase Order should have been manually emailed to the Retail Quality Team.
- **Confirmed:** Confirmation Number, Estimated Ship Date & Cost have been added based on Order confirmation.
- **Received:** Use when product has been received from the Vendor and it is in your inventory.
- **Partially Received:** Use when the Quantity Received does not match the Quantity ordered. Once all quantities have been received on each line items, the status will move to Received.
- **Cancelled:** Use when a Purchase Order needs to be cancelled. Can only be updated to Cancelled if prior status was In Process.

Create a Service Purchase Order

Service Purchase Orders are created when parts or units need to be ordered to complete a Service Request. You will need to create separate Purchase Orders for Retailer Responsibility (Billable) versus Manufacturing Responsibility (Non-billable) items. You also need separate Purchase Orders for each Vendor. For POs for Vendors other than Renewal by Andersen, see your local process.

NOTE: To create a Service Purchase Order, there must be at least one Service Product on the Service Request.

1. Click on the **Purchase Orders** tab in the Service Request and click **New Service PO**.

- On the next screen, select which Products need to be ordered by **checking the box** next to the Product and clicking **Save** when all Products have been selected.

Create New Service Purchase Order

Vendor
Renewal by Andersen

Responsibility
Retailer

☒	Product	Installed Product	Variant Number	Responsibility	Source of Defect	Defect Details
☒	S1	CDW,JF	CDI WHPN2267609	Retailer	Goodwill	Customer Satisfaction
☒	S2	CDW,JF	CDI WHPN2267609	Retailer	Goodwill	Customer Satisfaction

Cancel **Save**

NOTE: If there are only window parts available for selection, the vendor will default to Renewal by Andersen (as shown here). If there are multiple products with different vendors/responsibilities, you will have to select the appropriate vendor(s) from the drop downs.

Update the Service Purchase Order

- Click the **Edit** button to open the below fields:

Update

3. On the Line Items, you can identify if the product is a Multiple Remake, meaning the component for this variant has been reordered more than once. Identifying it as a Multiple Remake alerts the Retail Quality team for further analysis & internal review.

To indicate this on your service product, scroll all the way to the right on your line item, click on the **drop down** and then select **Edit Remakes**. A pop-up will appear and you can mark the **checkbox** and click **OK**.

The screenshot shows the 'Line Items' tab of a software interface. At the top, there are three tabs: 'Details', 'Line Items' (which is selected), and 'Other'. Below the tabs is a header section with a 'Products (1)' label and an 'Add Products' button. Below this is a table with the following columns: 'Multiple Remakes', 'Qty Received' (with a dropdown arrow), 'Date Received', 'Qty Written Off' (with a dropdown arrow), and 'Vendor Cre...' (with a dropdown arrow). A red box highlights a small dropdown arrow in the rightmost column of the table.

This screenshot shows the dropdown menu that appears when the dropdown arrow in the 'Multiple Remakes' column is clicked. The menu has two options: 'Delete' and 'Edit Remakes'. A red box highlights the 'Edit Remakes' option.

The screenshot shows a pop-up window titled 'Update S1'. Inside the window, there is a checkbox labeled 'Multiple Remakes'. A red box highlights this checkbox. At the bottom right of the window, there are two buttons: 'Cancel' and 'OK'. A red box highlights the 'OK' button.

Print a Service Purchase Order

1. After the PO information is complete, click the down arrow at the top of the purchase order and then select Print Service PO.

2. After clicking, the screen will change to show Conga Composer. When you see Merge Completed in the center, drag and drop the downloaded file (at bottom left) onto a new email for the Retail Quality Team (the subject of that email should be the store number and customer name: 0001 – Customer Name). Click **Return to Purchase Order** to move on to the next step.

NOTE: Clicking the file will open the Invoice or Quote in a new browser tab.

Release a Service Purchase Order

Retail Quality Coordinators process all Service Purchase Orders. Check The Link for information about contact information for your region.

Service Request Order Information		
Purchase Order Type:	Use When Ordering:	Purchase Order Actions:
Service Purchase Order	RbA products with Variant Numbers	Print & Save PDF of Service PO Email Retail Quality PO & applicable photos. Click Release PO
Service Purchase Order	Andersen Windows, Doors, & Parts	Print & Save PDF of Service PO Download & Save the Abbreviated Quote Report – Customer” from IQ+ Email Retail Quality both files & applicable photos Click Release PO

Confirm a Service Purchase Order

For a Service Purchase Order to be in Confirmed status, you need to enter the Cost on each Product line (if the PO is charge cost to Retailer or Customer), the Estimated Ship Date, the New Variant number (if a complete unit or window frame was ordered), and either a Confirmation or Invoice Number.

1. **Upload a copy of the Vendor Confirmation** within the Notes & Attachments section of the Purchase Order. Attach the form to the Purchase Order Notes & Attachments section. This section is located on the right side of the PO.
2. Click Confirm PO at the top of the Purchase Order.

NOTE: Unlike Product or Cost Purchase Orders, you will need to manually update the status to Confirmed on a Service Purchase Order.

Purchase Order

2	9188152	9188152	1	1

Cancel **Save**

3. Click **Save** when finished. When the screen loads, the Purchase Order should be in Received status.

NOTE: If you receive product by accident, it can NOT be reversed (not even with Fetch). Be cautious.

Rejected Service Purchase Orders

There are several reasons why a Service PO may be rejected by the Retail Quality team. See chart below for more information about the reasons behind each return code.

To find the POs that have been rejected, use the Purchase Order List View called “Rejected Service PO” found in the list view drop down. This shows all the Service POs that have a Rejection Timestamp, are in the status of In Process and have a Retail Quality Returned Code listed with the Comments section.

Store	Date	Purchase	Status	Retail Quality Returned Codes	Comments	Rejection Timestamp	Order	Created By

To resolve a rejected Service PO you may need to add additional information to the Service PO or may need to create a new Service PO with new Service Products depending on the scenario. Reach out to your Retail Quality Coordinator if you need further clarification on next steps.

Return Code	Description
Returned MI: Missing Information	Service PO is missing specifications critical to order processing
Returned VW: Variant Wrong	The variant (unit serial #) does not match the specs provided
Returned DM: Documentation Missing	Photos, approval forms, or service details missing from submission
Returned AE: Additional Explanation needed	PO notes are unclear about unit specs or service history
Returned WC: Wrong Code (billing type or reason)	Billing or reason code requested does not match the details of the service
Returned WF: Wrong Form/Format	Incorrect order form used or submission should have been by Cost PO
Returned NA: Not Available option etc.	The specifications requested cannot be made or are not offered
Returned DO: Duplicate Order	Exact order was already fulfilled recently (usually within a week)
Returned WD: Warranty Denied	Request does not meet the requirements for warranty coverage
Returned IQ: Outside of 180 day Initial Quality Policy	Out of the box damage/defect not reported within 180 initial quality period
Returned CA: Store cancels event prior to processing	Retail reached out to cancel submitted reorder prior to processing
Returned BA: Dissatisfied with Limited travel DG sash	DG limited sash travel due to balancer capabilities – no replacement needed

Cancel a Service Purchase Order

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

If you have **not yet** released or emailed the Service PO to Retail Quality, you can cancel a Service PO in rForce when it is still in an In Process status.

If you **have** released and emailed the Service PO to Retail Quality, the first step to cancel a Service PO is to reach out to your Retail Quality Coordinator to see if the order can be cancelled.

If a PO has been Released, Confirmed or Received, a Fetch ticket is required to cancel it. Do not submit a Fetch ticket to cancel the PO if the order has already been processed by Retail Quality.

This error message will appear if the Order has been released.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you receive a purchase order:

Action Taken	Debit	Credit
Service Inventory Received - Intercompany	Svc Matl Supplies-Prod Repair: 88500400	IC Rec/Pay w/ RbA Corp: 41840860
Service Inventory Received - Intercompany Consolidation Center	Svc Matl Supplies-Prod Repair: 88500400	IC Rec/Pay w/ALI: 19140331
Service Inventory Received - External Vendor	Svc Matl Supplies-Prod Repair: 88500400	AP - Invoice Accrual: 41100600

SERVICE COST PURCHASE ORDERS

Learning Objectives

This section explains how to:

- Create a Service Cost Purchase Order

Create a Service Cost Purchase Order

NOTE: The purpose of creating a Cost Purchase Order within a Service Request is that the Purchase Order will be related to the Service Request in rForce and the box will come labeled with the homeowner's information. For instructions on creating non-Service Cost POs & Cost POs for Stock Patio Doors Parts, see Cost Purchase Orders in the New Orders section of this guide.

1. Select the Purchase Orders tab from the main page in the Service Request.

The screenshot shows the 'Service Request' page for request 02701010. At the top, there are buttons for 'Edit', 'New Work Order', and 'New Payment'. Below this, a summary bar displays 'Service Type: Service', 'Status: New', 'Bill To Contact: Mary C Smith +', 'Balance Due', and 'Reimbursement Total: \$0.00'. A progress bar shows steps: 'New' (selected), 'To Be Ord...', 'Product O...', 'Customer...', 'Service To...', 'Service Sc...', 'Service C...', 'Service O...', and 'Seasonal ...'. Below the progress bar, there are links for various sections: 'Purchase Orders (0)', 'Payments (0)', 'Refunds (0)', 'Work Orders (1)', 'Business Adjustments (0)', 'Assets (0)', 'Journal Entries (0)', 'Files (0)', 'Notes & Attachments (0)', and 'Order History (7)'. At the bottom, a tabbed interface shows 'Details', 'Service Products', 'Work Orders', 'Purchase Orders' (highlighted with a red box), 'Finance', and 'Other'.

2. Click **New Cost PO** button.

This screenshot shows the same 'Service Request' page, but with the 'Purchase Orders' tab selected. Below the tabbed interface, there is a section titled 'Purchase Orders (0)'. Within this section, the 'New Cost PO' button is highlighted with a red box, and the 'New Service PO' button is visible next to it.

3. Select a Vendor from the Vendor dropdown. To view Vendors, begin typing the name of the Vendor associated with the items required. Results will appear as you type. Select the correct Vendor within the dropdown and input the Requested Ship Date.

NOTE: The Store Location defaults to your specific Store Location. If this needs to be shipped to a different Location/Warehouse, click the X on the right side of the box and search for the correct Store Location related to that warehouse (Ex. Pittsburgh has 86 (Monroeville) and 84 (Cranberry) warehouses associated with their branch).

4. Enter a Requested Ship Date if desired.
5. Enter Order number and Customer Last Name in the Reference box if desired. This will show up on the package label.
6. Click the **Save** button. (This will turn blue once the Vendor is entered)

Create New Cost Purchase Order

No activities to show.
Get started by sending an email, scheduling a task, and more.

8. After you click the Add Parts button, the Add Parts box will appear on your screen. To add a part, you can search for the part by entering the part number into the **Part** box. If you see two identical numbers, choose the first one. You will then need to select the Cost Center from the **Cost Center** drop down (if not auto-populated) and enter the **Quantity**. Once all necessary information is added, click the Add Parts button – this button will turn green once all part information is added.

Add Parts

* Part

* Cost Center

* Quantity

Part	GL Account	Description	Quantity
No Parts Added			

9. After all parts have been added, click the **Save** button. Once you click Save, it will go back to the Purchase Order screen and you will see the parts that have been added under the **Line Items** tab.

10. After all of the necessary items have been added, the next step is to Release the Cost Purchase Order.

NOTE: To delete a line, minimize each category (shorten the width) until you see this symbol on the right . Click on the symbol (drop down) and select "Delete". You will not be prompted with "are you sure you want to delete this item" message. It will just be deleted so make sure you're on the correct line.

NOTE: Please reference the Types of Product Purchase Orders section for status details.

BILLABLE SERVICES & SERVICE QUOTES / INVOICES

Learning Objectives

This section explains how to:

- Add Quote/Billing information to a Service Product
- Print a Service Quote & Invoice
- Enter Payments and Refunds

A Billable Service is when a customer is paying for the cost of the replacement part or Product. Examples include a customer choosing a different hardware color or a different screen style.

Add Quote & Billing Information

The Quote/Billing information needs to be added to each Service Product individually. If the customer wants to change the hardware color on four of their windows, add the quote/billing information to each line item. See The Link to reference the RBA Quote Tool for pricing information.

1. In the Service Request, click on the Service Products tab.
2. Click on the down arrow all the way to the right on the Service Product line.

Service Product	Component	Installed Product	Variant Number	Vendor	Responsib...	Purchase Order	Reimbursement
0014691890	Miscellaneous Install Material	Gliding Triple Window 1:2:1 Ratio	GT WHWH7507240	Renewal by Andersen	Customer		

3. In this drop-down menu, click on **Update Quote**.

Service Product	Component	Installed Product	Variant Number	Vendor	Responsib...	Purchase Order	Reimbursement
0014691890	Miscellaneous Install Material	Gliding Triple Window 1:2:1 Ratio	GT WHWH7507240	Renewal by Andersen	Customer		

4. Scroll down to the Quote/Billing Information section and enter the appropriate information.
 - **Quote Amount:** The amount that this Service Part will cost
 - **Billable Amount:** Copy the Quote Amount here so it will show up as Billable if the quote is approved
 - **Quote Accepted:** Customer has agreed to buy the Service Part and it will show up when printing the Service Invoice
NOTE: This box must be checked after the quote has been approved by the customer for it to print on the invoice and for a payment to be applied to the Service
 - **Customer Pickup:** "Yes" indicates the customer will pick up the Service Part and will be charged sales tax. "No" indicates the Service Part will be brought to their house and installed by a Service Technician
 - **Do Not Print this Service Product on Service Quote:** Service Part will not show up on the Service Quote regardless of if the Quote Amount is completed.
 - **Do Not Print this Service Product on Service Invoice:** Service Part will not show up on the Service Invoice regardless of if there is a Quote Amount and the quote is accepted.

5. Click **Save** when finished.

Print Service Quotes & Invoices

Printing Service Quotes and Invoices have the same process but use a different button.

1. Click the down arrow at the top of the Service Request detail page.

2. In this drop-down menu, you will click the **Print Service Invoice** button or the **Print Service Quote** button.

3. After clicking, Conga will appear on the screen. You do not need to take action yet.
 4. When you see Merge Completed in the center, click on the file in the download bar to open it.
- NOTE:** Clicking the file will open the Invoice or Quote in a new browser tab.

5. In the new tab, click the printer icon in the top right corner to print the Invoice or Quote.

6. The system will also automatically save a copy of the Invoice or Quote locally to your computer. To find it, locate your default downloads folder or look in your recently downloaded files in your browser. The example below is from Google Chrome.

You can click the link to open it again or you can click Show in folder to see where it is saved on your computer.

7. Back in the browser tab with Conga, click **Return to Order** to get back to the Service Request.

8. From here, you can find another copy of the Service Invoice or Quote has been saved in the Notes & Attachments within the Service Request. This can be found by hovering on Notes & Attachments under the status bar in the Service Request page. The Service Invoice or Quote will be the first file in the list.

Payments on a Service Request

NOTE: Payments processed in the Payment Portal cannot be entered into rForce until the next business day.

1. To enter a payment, click **New Payment** in the top right corner of the service request.

2. Fill in the:
 - **Payment ID** (the system code from the Payment Portal)
 - **Payment Date**
 - **Payment Amount**
 - **Payment Method**
 - **Credit Card Type** (if Credit Card Payment)
 - **Credit Card (or Check) information** (For CC – First Digit * Last Four Digits; For Check – Check Number), and the Auth Code (from the Payment Portal)

*This information is important, as it helps Accounting to track the payment.

NOTE: Payments made by the National Service Assessment Team (NSAT) should use a Payment Method of NSA Team Credit Card.

3. Click Save when complete. The Payment will now show up on the Service Request detail page.

The screenshot shows a 'New Payment' form with the following fields and values:

- Information**
 - Record Type: Deposit
 - * Order: 02705361
 - Contact: Joann Garofolo
 - Payment ID: 874335631
- Payment Information**
 - Payment Date: Dec 13, 2022
 - Payment Type: Final Payment
 - * Payment Amount: \$320.00
 - Description: (empty)
 - Non-Sufficient Funds: (checkbox unchecked)
 - * Payment Method: Credit Card
 - Credit Card Type: VISA
 - Check Number / CC: 4*4141 08983D
- System Information**
 - Buttons: Cancel, Save

Refunds

NOTE: Refunds processed in the Payment Portal cannot be entered into rForce until the next business day.

1. To enter a Refund, click on the Finance tab within the service request.

The screenshot shows the service request details page with the following tabs and links:

- Purchase Orders (2)**, **Payments (1)**, **Refunds (0)**, **Work Orders (1)**, **Business Adjustments (0)**, **Assets (2)**
- Journal Entries (2)**, **Files (6)**, **Notes & Attachments (6)**, **Order History (10+)**
- Details**, **Service Products**, **Work Orders**, **Purchase Orders**, **Finance**, **Other**

2. Scroll down to refunds and click "New".

The screenshot shows the Refunds (0) section with a **New** button.

3. Fill in the:

- **Amount**
 - **Date**
 - **Refund Method**
 - **Refund ID** (this is the system code from the payment portal)
 - **Credit Card** information (first digit * last four digits)
- This information is important as it helps Accounting to track the payment.

The screenshot shows a 'New Refund' form with the following fields and values:

- Refund Name:** (empty)
- * Amount:** \$83.00
- * Order:** 02533982
- * Date:** 12/13/2022
- Contact:** Lauren Reicks
- * Refund Method:** Credit Card
- Refund ID:** 874302655
- Description:** 4*9751
- Store Location:** 0092 - Detroit, MI

At the bottom of the form, there are three buttons: 'Cancel', 'Save & New', and 'Save'. The 'Save' button is highlighted with a red box.

4. Click **Save** when done. The Refund will now show up on your Service Request Detail page.

NOTE: Refunds made by the National Service Assessment Team (NSAT) should use a Refund Method of NSA Team Credit Card.

SALES SAMPLES REORDERS

Reorder Units or Parts of Samples for Sales Consultants or Showrooms

Follow these steps when needing to order parts or units for sales samples or showroom units.

1. Create a Service Request under the Account with your location's address.
 - Use "Not Listed" for the Order
 - Do not use the Account that starts with your Store Number
 - Cancel the auto-generated Service Work Order
2. Find the Assets you would like items reordered for and populate all required info.
 - You will use A10 – Sales Sample
 - Add a note for each selection "Sales Sample Reorder"
 - Use "Add Legacy Asset" if units are not displayed
3. Create and Release the PO.
4. Confirm and Receive the PO the per your standard process.
5. Move the Service Request to Closed after the samples have been Received.

WORK ORDERS & SERVICE APPOINTMENTS

Learning Objectives

This section explains:

- Work Order Types & Statuses
- How to Create a New Work Order
- How to Schedule Through the Chatter Feed
- How to Schedule Multiple Resources
- How to Complete Work Orders

When a Service Request is created a Work Order is automatically created as a Service type and set to the To Be Scheduled Status. Every work order has a sub-component called a Service Appointment that can be found under the related tab. The Service Appointment is the schedule-able part of the Work Order overall.

Best practice is to create a new Work Order for each trip to the home, an existing work order should not be reused. When multiple resources need to go to the home at the same time see section about Scheduling Multiple Resources.

Work Order Types & Status

Selecting the Work Order type limits the Resources available when scheduling. If the work order type is Service, you will see Service Resources when scheduling.

The Work Orders types that are primarily used within Service Requests are:

- **Service:** Used for any type of work a Service Tech would do including Service Assessments
- **Install:** Used when you would like to schedule an Install Crew at, such as full unit replacement(s)
- **Job Site Visit:** Used when sending out a manager or when needing to schedule resources that are not primarily Service or Install. These Work Order types are not eligible for Mileage Reimbursement. Check with your local procedures on when to use Job Site Visit

Users can change a Service Work order to an Install work order type using the **Change to Install** button. This function will update the Work Order Line Items (WOLIs) to match those for Install.

For any other work order type changes, you would need to cancel the work order and create a new work order with the correct type.

Work Order Status help identify the state of the appointment:

- **To Be Scheduled:** Appointment needs to be scheduled.
- **Scheduled & Assigned:** Appointment is scheduled and assigned to a resource, waiting for appointment to occur. Use this status when needing to reschedule.
- **Appt Complete/Closed:** Appointment was completed at the time by the resource.
- **Canceled:** When the appointment did not occur & work order needed to be canceled.

Create a New Work Order

1. On a Service Request, click **New Work Order** button

2. Select Work Order Type from the drop down. All work order types are available.

A screenshot of a dropdown menu titled "Work Order Type". The menu is open, showing a list of options. The first option is "---None---" with a checkmark. Below it are several other options: Collections, HOA, Historical, Install, Job Site Visit, LSWP, Paint/Stain, Permit, and Service. The dropdown is set against a light gray background.

Schedule Through the Chatter Feed

1. Navigate to the Work Order that needs to be scheduled. Access the Work Order through the Work Orders tab within the Service Request.

A screenshot of the "Service Request 03082933" page. The page has a header with the service request number and a status of "Service". Below the header is a navigation bar with tabs: "Details", "Service Products", "Work Orders", "Purchase Orders", "Reimbursable Parts", "Finance", and "Other". The "Work Orders" tab is selected. Below the tabs is a table with the following columns: "Work Order Number", "Work Order Record Type", "Status", and "Scheduled Start Time". The table contains one row with the work order number "05423675", record type "Service", and status "To be Scheduled".

2. Upon clicking on the Work Order number, the Work Order will open with the below view.

A screenshot of the "Work Order 05746923" page. The page has a header with the work order number and a status of "Service". Below the header is a navigation bar with tabs: "Details", "Line Items", "Other", "Service Appointments", "Work Order Line Items", and "Work Order History". The "Details" tab is selected. Below the tabs is a table with the following columns: "Work Order Number", "Work Order Record Type", "Status", and "Scheduled Start Time". The table contains one row with the work order number "05746923", record type "Service", and status "To be Scheduled". On the right side of the page is a "Chatter" feed with a search bar and a list of activity items. A red box highlights the "Time Slots" button in the Chatter feed.

3. In the Chatter, the options to use for scheduling are Time Slots or Book Appointments as seen above. For both options, you will need to set your Earliest Start Permitted and the Due Date. This will typically be set based on the availability on the Calendar/GAANT.

- **Book Appointment** – Finds the ideal results based on the earliest available time slots. Scheduler will pick the time but the system will select the resource.

NOTE: This function is helpful for resources that schedule appointments for themselves.

- a. Set your Earliest Start Date and your Due Date (date the task should be completed by, at least 1 day later). Click **Get Appointments**.

If you are a resource and you are scheduling your own appointment, you will see the Assign to me box that will only show time slots for your schedule and not include any other resources.

- b. You will then select your appointment time – you can select from the Golden Slots (most preferred) or the additional Time Slots below.

NOTE: Generally, Golden Slots highlights the appointment times that have resources that are nearby and available.

3. Select the two Resources that you would like to assign to the appointment and then click **Schedule**.

The screenshot shows the 'Time Slots' tab in the Chatter interface. At the top, there are tabs for 'Chatter', 'Activity', and 'Files'. Below these are buttons for 'New Labor', 'Change t...', 'Post', 'Time Slots' (which is active), 'Book App...', 'New Event', and 'More'. The main content area shows a 'Back' link and a work order number '04578894'. Below this is a section titled 'Select at least 2 resources' with a date and time 'Friday, September 22, 2023 at 8:00 AM EDT'. A list of resources follows: Charles Couch (5/100), Kevin Miller (49/100) with a checked checkbox, Michael Squibb (13/100) with a checked checkbox, and Renewal 1 (100/100) with an unchecked checkbox. A blue 'Schedule' button is at the bottom.

4. Select a Primary Resource and click Confirm.

NOTE: Confirm Button is not available until a Primary Assigned Resource is assigned. Choosing the Primary Resource is important for survey and mileage calculation.

The screenshot shows the 'Time Slots' tab with the 'Assigned Resources' section. It displays two radio buttons: 'Kevin Miller' (selected) and 'Michael Squibb'. Below this is a blue 'Confirm' button. The interface also shows the 'Back' link, work order number '04578894', and a 'Select a Primary Resource' prompt.

5. After you click Confirm, you will see this in the Chatter.

The screenshot shows the 'Chatter' tab with a large green checkmark. Below it, the text reads 'Scheduled for Friday, September 22, 2023 at 8:00 AM EDT'. A list of resources follows: 'Kevin Miller (Primary)' and 'Michael Squibb'. At the bottom, a note states: 'Note: These updates may take a few seconds to be reflected on the Work Order. Please refresh the page to view any updates.'

NOTE: From the GAANT Calendar, you can click any appointment and drag it to a different day or Technician. Once you Refresh, it will have updated your Work Order with the correct information.

Complete Work Orders

1. Review Work Order Line Items (WOLIs) or any other notes from the Service Tech about possible next steps.
2. Update status to Appt Complete/Closed

The screenshot shows the 'Status' dropdown menu in the iForce system. The menu is open, showing options: --None--, To be Scheduled, Scheduled & Assigned, Appt Complete / Closed (selected with a checkmark), and Canceled.

3. Update Mileage Responsibility field (if Service Request will be submitted for warranty).

The screenshot shows the 'Mileage Responsibility' dropdown menu in the iForce system. The menu is open, showing options: --None-- (selected with a checkmark), Manufacturing, and Retailer/Customer.

WORK ORDER LINE ITEMS (WOLIS)

Learning Objectives

This section explains:

- How to add individual Work Order Line Items
- Default Work Order Line Items

Work Order Line Items (WOLIs) are a helpful way to share information about the Service Request & easily communicate between the office and field technicians about what they are to do in the home. Field Technicians can see & complete WOLIs within FSL Mobile during their Check In and Check Out processes.

WOLIs can be built on each work order individually or can be set up so that default WOLIs auto populate when a work order is created.

Add Individual Work Order Line Item

1. To manually add a WOLI, click on the Work Order, and then click the **Line Items** Tab. If you have Default WOLIs set up, you will see them listed already.

2. Click **Add Row** and edit the Subject field of the line that was just created. The subject is the main message to the Technician and will be viewable to the Technician in their App.

A screenshot of the 'Work Order' screen for work order number '06807078'. At the top, there are 'Save' and 'Add Row' buttons. The 'Add Row' button is highlighted with a red rectangular box. Below the buttons is a table with columns: 'Subject', 'Status', 'Office Notes', 'Job Notes', and 'Customer-Facing'. The table contains five rows of default WOLIs. The fifth row is highlighted with a red rectangular box, and its 'Subject' field is being edited with the text 'Please collect Balance due'. A text cursor is visible in the input field.

	Subject	Status	Office Notes	Job Notes	Customer-Facing
1	Add any pre visit service notes here. If none click next.	New			✓
2	Was the service Completed today? If yes click "next". If No, please describe why and flag for office.	New			✓
3	Do we need to send a service tech or installer back to the home? If no click next. If yes which and describe why.	New			✓
4	Are you returning any product? If no click "next" to skip. If yes, please list product you are returning.	New			
5	Please collect Balance due	New			

3. Add Office Notes on each line if you have any additional notes want visible to the Technician in the App.
4. Edit if you want the note to be Customer-Facing (meaning it will be seen on the Field Service report generated for the customer).

5. Under Line Type, designate if you want the WOLI to be a Check In or Check Out item for the Technician.

The screenshot shows the 'Line Items' form. The 'Line Type' field is highlighted with a red box. Other fields include 'Subject', 'Office Notes', 'Job Notes', 'Customer-Facing', and 'Status'. A 'Check In' button is visible next to the 'Line Type' field.

NOTE:

- The Job Notes Field will be filled out by the Technician in the field.
- The Status will default as New and will update as the Technician works through them.
- You can click the trash can on the right to remove a line item if no longer needed.

The screenshot shows the 'Line Items' form. The 'Job Notes', 'Status', and 'trash can' icon are highlighted with red boxes. The 'Status' field is set to 'New'.

6. You can continue to add rows as needed. Once all WOLIs are added, click **Save**.
7. If needed, adjust the order of the line items by scrolling to the left and using the Position Arrows to move a line up or down. Once in the correct order, scroll to the top and click **Save**.

The screenshot shows the 'Line Items' form with a list of three line items. Each item has a position arrow (up and down arrows) to its left. The 'Save' button is highlighted with a red box. The 'Add Row' button is also visible.

Default Work Order Line Items

It is possible to add or edit default WOLIs, this can be done under the Service Territory. After adding those fields, all new work orders that get created will have WOLIs listed. You can find instructional videos on setting up Default WOLIs on iSpring.

After setting up Default WOLIs, a Fetch ticket would be required to update any existing work orders to have those default WOLIs added automatically.

SERVICE WORK ORDER/HSR FORM (OPTIONAL)

Learning Objectives

This section explains how to:

- Add New Task
- Print a Service Work Order / Homeowner Service Request Form
- Review Sample Form

Some locations elect to use the Work Order/HSR forms. Some elements that are on this form have different processes – such as Add New Task.

The Service Work Order / Homeowner Service Request Form can be used for a variety of purposes. For example, a Service Technician that is not using FSL Mobile can use this form to manage Tasks.

Add New Task

Creating Tasks and listing as Tasks or Materials are used in order for lines to show on the Service Work Order/HSR Form.

1. Click on Work Orders. Click open the Service Work Order. From here, click **More** and then click **New Task**.

2. Then enter a **Subject** then press **Save**. The subject should be the line item you want listed on the HSR form.

- Continue to add new tasks as needed.

LEGACY SERVICE & ASSETS

Learning Objectives

This section explains how to:

- Identify Assets on Account
- Create an Account (if necessary)
- Create a Contact (if necessary)
- Add Legacy Assets
- Edit Legacy Assets
- Create Legacy Service Request

Homeowners that have had their products installed for a longer period may or may not have an Account in rForce due to age, system data transfers, acquisitions etc. Users will need to search carefully for an Account to prevent potentially creating a duplicate record. Homeowners with Accounts may or may not have the products installed listed as Assets on their account, these Accounts may or may not have the original sold order details associated as well. In either scenario Legacy Assets may need to be created.

Steps to take:

- Search for the account
 - If Account does exist, identify if assets to be serviced are listed.
 - If not, Legacy Assets will need to be created.
 - If assets are listed, Legacy Service does not apply.
 - If Account does not exist, create a new Account & Contact.
 - Legacy Assets will need to be created.

Identify Assets on Account

Legacy Assets are Products that have previously been installed in a home that need to be added retroactively because they are missing from the system.

Here is an example of when Legacy Assets need to be added, where the asset count is 0:

NOTE: Products on Purchase Orders must be received for it to become an Asset on the account.

If an Account has Assets, it will look like this instead:

Create an Account

If the Account is not in rForce, you must create one.

1. Click the down arrow next to Accounts and click **New Account**.

2. Choose Dwelling and click **Next**.

A screenshot of the 'New Account' form in rForce. The title 'New Account' is at the top. Below it, the instruction 'Select a record type' is followed by a list of radio button options. The 'Dwelling' option, which includes the subtext 'Used to support Dwelling', is selected and highlighted with a red rectangular box. Other options include Vendor, Canvass Market, Contractor, Finance Company, Ownership Group, Region, and Store. At the bottom right of the form are 'Cancel' and 'Next' buttons.

3. Fill out the needed information and click **Save**.

Create a Contact

If there is an Account, but not a customer (Contact) or if the Customer has changed in rForce, follow these next steps.

1. From the customer's Account, click **New Contact**.

- Fill out the Customer's Information and click **Save**. You must also click the boxes for Primary Dwelling & Primary Contact.

The screenshot shows a form for entering customer information. The 'Mark Primary for this Dwelling?' and 'Primary Dwelling for Contact' checkboxes are highlighted with red boxes. Other fields include First Name, Last Name, Roseville Account, Spouse, Home Phone, Mobile Phone, Business Phone, Email, and Address.

Add Legacy Assets

- Click on the Service Request tab in the Account Detail page and click **Add Legacy Asset**.

The screenshot shows the 'Service Requests' tab in the Account Detail page. The 'Add Legacy Asset' button is highlighted with a red box. The table below shows a single service request.

Request Number	Status	Start Date	Service Type	Amount Due	Description
00280150	Closed	Jul 11, 2006	Service	\$0.00	replace 6 GW screens - receive...

- Click the **Add Asset** button.

The screenshot shows the 'Add Legacy Assets' page. The 'Add Asset' button is highlighted with a red box. The page includes a 'Return to Account' button, 'Account Information' section, and a 'Legacy Assets' table.

Create Service Request

2. Fill out Service Initiated by, Description, Install Date, and Contact. Click **Continue**.

The screenshot shows the 'Service Request' form. At the top right, there are two buttons: 'Back to Account' and 'Continue'. The 'Continue' button is highlighted with a red box. The form fields include: 'Service Type' (Legacy), 'Account' (55113, 1920 County Road C West), 'Service Initiated By' (Service), 'Bill To Contact' (Roseville Account), 'Description' (notes of issues), and 'Install Date' (Dec 31, 2000).

3. The Asset you created should now be listed, complete the code fields & click **Continue**.

The screenshot shows the 'Service Request' form with the 'Asset' list. The 'Continue' button is highlighted with a red box. The 'Asset' list shows a single entry: '+ Service/Repair | Unit ID: / Floor: / Room:'. The 'Continue' button is highlighted with a red box.

4. You should see your Legacy Service has been created with a Service Type of Legacy.

The screenshot shows the 'Service Request' details page for '03424024'. The 'Service Type' is 'Legacy'. The 'Service Type' field is highlighted with a red box. The page includes a 'Details' section with fields for 'Description', 'Service Request Information', 'Order Details', and 'Order Information'. The 'Service Type' field is highlighted with a red box.

SERVICE REIMBURSEMENT/WARRANTY SUBMISSION

Learning Objectives

This section explains how to:

- Add a New Reimbursement
- Add Reimbursable Parts (if applicable)
- Update Status to Warranty Submitted
- Verify Reimbursement Amounts
- Address Warranty Rejected Status

Submitting for warranty is a process in which a Retailer requests to be reimbursed for the cost of the labor, mileage and, if applicable, stock parts associated to replacing or repairing a damaged or defective product from manufacturing. This process only applies to products ordered through RbA (Windows, Patio Doors & Entry Doors) and requires at least one service product to have the responsibility of Manufacturing.

NOTE: Updating status to Warranty Submitted triggers the survey to the homeowner. Only non – “Job in Progress” services will send a survey, and duplicates will not be sent if there’s more than one Service Request within 30 days.

It is recommended to review the Service Reimbursement Policy which can be found on The Link for up-to-date information about what is eligible for reimbursement.

Add New Reimbursement

We recommend having the Homeowner Service Request Detail Codes pdf handy when submitting reimbursements. The most up to date version of the document can be found on The Link.

1. On the Service Request page in the top right corner, click on **New Reimbursement**.

2. Select the Service Product that you would like to add a reimbursement for by clicking the **plus sign** in the far left column.

3. Once you have selected service products, click **Continue**.

NOTE: You can only select up to 10 products at a time. If you have more than 10 products to submit for warranty (like the example shown), you will have to repeat the process for the remaining products on the Service Request.

New Service Reimbursement

Select Service Product | Add Service Symptoms | Add Problem Components | Add Procedure Codes | Add Reimbursable Parts | Confirm Details

The following products are eligible for reimbursement. To qualify for reimbursement, the following conditions must be met:
Responsibility = Manufacturing
Source of Defect = Renewal by Andersen

Eligible Service Products

5. Select the **Problem Component** for each service product using the drop down. Once Problem Components have been added to each service product, click **Continue**.

The screenshot shows the 'New Service Reimbursement' form with the 'Add Problem Components' step active. The progress bar at the top shows four steps: 'Add Problem Components' (active), 'Add Procedure Codes', 'Add Reimbursable Parts', and 'Confirm Details'. Below the progress bar, the 'Add Problem Components' section contains a table with columns: CT, Variant, Component, Symptom, and Problem Component. The first row shows CT D2CV3204961, Variant S1, and Symptom JJ - IMPERFECTION. The 'Problem Component' column has a dropdown menu open, showing a list of options: A - HARDWARE, B - GRILLE - EXTERIOR, C - GRILLE - INTERIOR, D - ASTRAGAL/INTERLOCK, E - WEATHERSTRIP, F - MULL COMPONENT, H - SASH, and I - SCREEN. The 'Continue' button at the bottom right is highlighted with a red box.

6. Select the appropriate **Procedure Code** for each service product using the drop down.

The screenshot shows the 'New Service Reimbursement' form with the 'Add Procedure Codes' step active. The progress bar at the top shows four steps: 'Add Problem Components', 'Add Procedure Codes' (active), 'Add Reimbursable Parts', and 'Confirm Details'. Below the progress bar, the 'Add Procedure Codes' section contains a table with columns: CT, Variant, Component, Symptom, Problem Component, and Procedure Code. The first row shows CT D2CV3204961, Variant S1, Symptom JJ - IMPERFECTION, and Problem Component T - GLASS. The 'Procedure Code' column has a dropdown menu open, showing a list of options: 105 - UNIT: FIBREX SURFACE REPAIR, 125 - SCREEN: WINGBLADE OR GROMMET FIT, 135 - SCREEN: REPLACEMENT, 140 - GRILLE: REPAIR OR REPLACE PERMANENTLY APPLIED INT. OR EXT., 145 - GRILLE: GRILLE CLIPS: REPAIR OR REPLACE INTW, 155 - HARDWARE: HINGE: MODIFY OR REPLACE (CASEMENT), 165 - HARDWARE: HANDLE; LIFT, PULL: REPAIR OR REPLACE, and 170 - HARDWARE: LOCK STRIKE: MODIFY OR REPLACE. The 'Continue' button at the bottom right is highlighted with a red box.

If an assessment was required prior to completing the repairs/replacement on a service product, you will add an Additional Procedure Code **ONLY** on the first product line as this can only be used one time per Service Request. Select the 555 Code in the Additional Procedure Code drop down and add a Quantity of 1 in the Quantity box. Once Procedure Codes have been added to each service product, click **Continue**.

If no assessment was required, do not add the Additional Procedure Code. Simply click **Continue** once all necessary Procedure Codes are added to the service products.

Add Reimbursable Parts (if applicable)

If stock **window** parts were used during the service and are listed as Service Reimbursable in the Online Parts Catalog, reimbursement for the cost of that part can be submitted here. Non-Service Reimbursable parts need to be reordered through Retail Quality via a Service PO.

NOTE: Patio Door parts are not eligible for Service Reimbursement and must be reordered through Retail Quality via a Service PO. Contact Retail Quality for any questions.

1. Select the Service Product/Variant related to the Reimbursable Part using the **Product** drop down.

The screenshot shows the 'New Service Reimbursement' form at the 'Add Reimbursable Parts' step. The 'Product' dropdown menu is open, showing a list of product codes. The 'Quantity' field is set to 1.00. The 'Add Reimbursable Parts' button is highlighted in the progress bar.

Product	Quantity	Reason
CT CT DZCV3204961	1.00	

2. Search for the Part used (can enter 7-digit number or search by term) in the **Part** search box and click on the Part to confirm your selection.

The screenshot shows the 'New Service Reimbursement' form at the 'Add Reimbursable Parts' step. The 'Part' search box is open, displaying search results for '9188151'. The 'Quantity' field is set to 1.00. The 'Add Part' button is highlighted in the progress bar.

Product	Part	Description	Quantity	Reason
CT CT DZCV3204961	9188151		1.00	

3. Select your Reason from the drop down and update the Quantity if more than one part was used.
- NOTE:** Rolls or packages are broken out by unit or foot. You can only put up to a Quantity of 5 for each Product. You may need to add multiple parts for the same product to get the correct quantity – ex: 15 feet of weatherstrip would have that part # on each product 3 times with a qty of 5.

Update Status to Warranty Submitted

Updating the status of the Service Request is an important final step in the Service Reimbursement process. This triggers the Reimbursement Mileage \$ to be calculated and sends the Service Request to be reviewed by Retail Quality. The status update also initiates the survey to the homeowner.

* Status

Warranty Submitted

- Activated
- New
- To Be Ordered
- Product Ordered
- Customer Call Back
- Service To Be Scheduled
- Service Scheduled
- Service Complete
- Service On Hold
- Seasonal Service
- ✓ Warranty Submitted

No additional updates to the Reimbursements can be made once in this status, you will need to move the status back to a prior status such as Service Complete to make changes.

Verify Reimbursement Amounts

It is best practice to double check your reimbursement to ensure values calculated as expected. You can review the Service Reimbursement codes by opening the Service Product page (see Review Service Product Details section). These values are found under the Reimbursement Information section.

Reimbursement Information	
Reimbursement Labor \$ ⓘ	Warranty Date Submitted ⓘ
\$7.50	6/29/2023
Reimbursement Parts \$ ⓘ	Warranty Date Accepted ⓘ
\$16.82	6/30/2023
Reimbursement Total	Warranty Rejected Date
\$42.14	
Reimbursement Mileage \$ ⓘ	Rejection Reason
\$17.82	
Warranty Reimbursement Amount ⓘ	

- **Reimbursement Labor \$:** Labor is calculated from the Procedure Codes added during New Reimbursement flow which have an amount of time associated to them.
- **Reimbursement Mileage \$:** Mileage is calculated within Field Service from appointment to appointment. A total will automatically be calculated from the work orders with Mileage Responsibility = Manufacturing *after* updating the status to *Warranty Submitted*.
- **Reimbursement Parts \$:** Parts are calculated if stock parts were adding during the New Reimbursement Flow.
- **Total Reimbursement:** Is the sum of the 3 prior.
- **Warranty Reimbursement Amount:** This field is only used for data migrations and is not tied to the New Reimbursement flow process.
- **Warranty Date Submitted:** The date the service request status was updated to Warranty Submitted.
- **Warranty Date Accepted:** The date the service reimbursement amount was processed & credited to the store.
- **Warranty Rejected Date:** If applicable, the date the service request was returned from Retail Quality.
- **Rejection Reason:** If applicable, the reason the service request was returned by Retail Quality, see Description field for additional note about the return & next steps.

Warranty Rejected Status

If the Service Request is rejected by Retail Quality, you will need to review rejection reason & the note in the description to determine next steps. Often a Service Request is rejected as there is an update needed on your end, if so, you'll need to update the status back to Service Complete to make any requested updates and resubmit. In other scenarios, if the service is not eligible for reimbursement and no updates are needed, status should be updated to Closed.

You can use reports in the #Ops-9 folder to review service requests, but the easiest way to identify service requests that have been rejected is to use the List View under Orders called Service Requests – Warranty Rejected. This will present a list of all the Service Requests in that status indicating the Rejection Reason etc.

CLOSING A SERVICE REQUEST

Learning objectives

This section explains how to:

- Update Number of Visits
- Close a Service Request

Closed is the final status of a service and signifies when revenue has been recognized and/or when warranties have been accepted & validated. All Services must get closed. This helps identify that all work is complete and helps keep active services separate.

If a Service Request is not submitted for warranty, the Closed status initiates the survey to the homeowner. Only non-“Job in Progress” services will send a survey, and duplicates will not be sent if there’s more than one Service Request within 30 days. For assistance closing older service requests, submit a Fetch ticket.

Update Number of Visits (Optional)

Some locations choose to count the number of trips that a Service Request required. This can be used as a reporting element and better understand how many trips a service required before it could be closed. The # of Visits field does not automatically calculate and needs to be manually entered.

1. Click the Pencil to edit the # of Visits field, click **Save**.

The screenshot shows a web form titled "Service Request Information". It contains several fields for account and contact information, service details, and booking information. The "# of Visits" field, located in the bottom right section of the form, is highlighted with a red rectangular box. Below the form, there are "Cancel" and "Save" buttons, with the "Save" button also highlighted by a red rectangular box.

Service Request Information	
* Account Name 55044, 19732 Ireland Way	Order Owner Christy Lynghaug
* Bill To Contact Tom Neitzke	Sales Rep Contact Ryan Tauer

Cancel Save	

Close a Service Request

NOTE: CORO Users, this step triggers an Accounting Journal Entry. Use care, as some actions may not be easily corrected if mistakes are made.

When closing any Service Request be sure to check for these things:

- Click on the Service Products tab to confirm that the Service Request has at least one Service Product. It cannot be closed without a Service Product.
- Verify all Work Orders are in Appt Complete/Closed or Cancelled status. This is especially important to ensure Service Resources don't go over their limit of the number of open activities.
- Check all Purchase Orders are Received.
- Review that the balance due is accurate. Cannot be removed from the account without a write off once the service is closed.
 - Best practice is to attempt to collect the remaining balance before closing the service.
 - If the service is closed out with a balance due, this will show up on the AR Report.

If the Service Request was submitted for warranty, you will want to wait to close the Service Request until the credit has been processed. Reimbursement Credits are processed every other Friday, which is when the status is updated to Warranty Accepted. You can verify which Service Requests were accepted via reporting in the #Ops-9 Service folder and, if necessary, confirm that the credit was received with your accounting team.

You can update the status of the Service Request to Closed via the status bar and Mark Status as Complete or click the pencil next to the status field.

The screenshot shows the 'Service Request' interface for request 03066114. The status is 'Closed'. A red box highlights the 'Closed' button in the status bar. Below the status bar, a dropdown menu is open, showing a list of status options: Closed, Customer Call Back, Service To Be Scheduled, Service Scheduled, Service Complete, Service On Hold, Seasonal Service, Warranty Submitted, Warranty Accepted, Warranty Rejected, Cancelled, and a checked 'Closed' at the bottom.

NOTE: When service is complete on a Job In Progress, you must go back to the original order and change the status from Job in Progress to Closed. This is MANDATORY for all CORO locations.

JOURNAL ENTRIES

rForce generates journal entries when you take certain actions, and it's helpful to be aware of the impact of actions taken in rForce. Here are the journal entries that are generated when you close a job, where applicable:

Action Taken	Debit	Credit
Revenue Recognized - Deposit	Consumer Deposits: 41700100	Accounts Receivable: 12000100
Revenue Recognized - Refund Deposit	Accounts Receivable: 12000100	Consumer Deposits: 41700100
Revenue Recognized - Service AR	Accounts Receivable: 12000100	Service Revenue: 88500410

VERSION HISTORY

Version#	Date	Modified By	Update Highlights
v1.0	October 2023	Traci Keskitalo	
v1.1	May 2024	Traci Keskitalo	• Updated Ordering Sales Samples Process (CORO changes) • Added Remote Measure Checkbox information • Added Correct process for Unmatched rSuite Charge/Misc. Line Items • Updated Closing an order if Keeping Deposit • Updated Order Change Form • Added section on Making Changes to a Purchase Order after Ordered • Added Addendum for editing Source of Defect & Defect Codes (for CORO) • Added Addendum with Marlimar texting information • Updated Table of Contents for easier navigation • Added Miscellaneous Notes regarding: - Install Labor/LSWP Labor - Service Surveys - Credit Card Refunds - Payment Methods
V1.2	January 2025	Traci Keskitalo	• Updated TechMapp Uploader information • Updated Remote Measure information • Updated On Hold button process • Added process to update PO cost • Added Addendum of Product Codes and Abbreviations • Added Reorder process for Sales/Showroom Samples • Added Addendum for Reorder Best Practices • Added info about Surveys • Added info about updating Payment Type and Finance Information • Added Miscellaneous Notes regarding: - Check Deposits - NSA Payment Type - Order Change Fees - Service Statuses
V1.3	September 2025	Traci Keskitalo	• Updated On Hold Guide • Updated IQ+ process screenshots • Updated NSPR form information • Added JIP/Recovery Process section • Added Collections Letters section • Added Cancellation for Opportunity vs. Order Level Guidelines • Added Addendums for: - Putting Ensemble on a Separate PO - Ensemble Service Ordering Guidelines - Ensemble Full Unit reorders - LSWP Compliance Program - Recommended Booking Checklist - Manual Check Request Process (for COROs) - Correcting Invoice Discrepancies via Odiss (for COROs) - CORO AR Reason Code Guidelines • Added Miscellaneous Notes regarding: - Remote Tech Unavailable field

			- Requesting Ship Date through IQ+ - Draft Status time recommendation - NOT updating dollars in Enabled+

Marlimar Texting

Marlimar is a platform used to send text messages. Below are some basic steps for using this tool if your location is set up with this platform.

Support Contact: Chris Merrifield – COO – 502-472-0061 - chris@marlimar.com

Email Chris any changes to the wording, new messages, or messages you want deleted/added.

Go to <https://veloce.marlimar.com>

Login with your email and password for Marlimar.

Centers:

- **Message Connection Center:** Home Page you will send/receive messages from
- **Report Center:** Download reports/text logs
- **Scheduling Center:** Overview of all upcoming scheduled text messages
- **Quick Reply Center:** View/Edit Quick Reply options
- **Media Center:** View/Edit Photos you may send to customers
- **Opt Out Center:** Blocked phone numbers (that you block, not those who block us)

Screenshots/Details below

Messaging Options: There are several pre-made options for text messages you may frequently use. If the text you are trying to send does not fit the criteria, please use “Custom”. If you would like to add/edit any of the pre-made options, please contact Chris/Support.

A screenshot of a software interface showing a list of message types. At the top, there is a tab labeled "Pre-Install" with an information icon. Below it, the heading "Message Type:" is followed by a list of options, each with an information icon and a text label: "Order Placed", "Schedule", "Shipped", "Checklist", "Install", "Reminder", "Lead Job", and "Custom". The "Custom" option is highlighted with a blue border.

TECHMAPP UPLOADER ZERO'D LINE ITEMS

Occasionally there's a glitch with the TechMapp Uploader that changes the unit's price to \$0 when it should have been a \$0 Addendum. For these, PLEASE submit a quick Fetch ticket. You can still manually fix it and move the job forward, but just log it for their reference. Feel free to use this as an example of what to say when you log the ticket: *SalesForce Order#04091328(Smith) - the TechMapp Uploader zero'd out some of the line items, though it was a \$0 Addendum. I have already manually added in the dollars, but logging for your reference.*

You can catch and fix these more quickly if you glance at the unit price under the TechMapp Upload Review. If it was supposed to be a \$0 Addendum, but it zero's out the Unit price, when you "Resolve" under the TechMapp Uploader, you can see at the bottom of the Resolve screen what the Retail Price is supposed to be and enter that into Unit Price all in the same screen.

Service Request Best Practices

Managing Service Requests can be a lot of work since so many steps require manual intervention by your team members. We've put together some of our Best Practices to follow during the life of a Service Request. More information and detailed instructions for Services can be found in the Backoffice & rForce Guide located on The Link or rForce Homepage.

Opening Service Requests

- Review Account before creating a new Service Request – check to see if there is one already open
- Search carefully for homeowners - double check for common spelling and address typos
 - Homeowners not in the system need an Account & Contact created before opening a Service Request
 - Submit a FETCH ticket for homeowners with more than one account
- Select the correct Sold Order (Job) so that the correct data is related. If servicing units from multiple jobs, use the most recent Sold Order
- Keep clear notes in the Service Request Description field – opportunity to use a template for consistency
 - Pro Tip: keep the most recent note with a date on top line to make it visible to read in reports

Service Products

- Every Service Request requires at least one Service Product and a Service Request cannot be closed without one
 - Service Product codes are important for identifying the main reason for opening the service, and can feed First Time Through reporting. Reference the Responsibility Matrix (below) as needed.
 - It is recommended to add a Service Product as soon as the issue is identified
- The Sold Order Purchase Order must be received and assets created on the account before you can create a Service Product for them
- Service Products should be built off the Original Variant, not a subsequent service asset
- Legacy Assets may need to be added to an account, be sure to include the original variant number
- Information for Retail Quality regarding reorders should be included in the Notes field on the Service Product
 - The Notes field is also customer facing on any Quotes or Invoices

Purchase Orders

- Confirm Service PO within 3 days of being released
 - Add Estimated Ship Date, Cost & Tax, Confirmation Number (use sales order #) & Variant # on full units
- Review Rejected Service POs within 3 days and update or cancel as needed
- Receive Service POs & Cost POs as product arrives in the warehouse
 - Service Requests cannot be closed without POs being Received or Cancelled

Work Orders

- Always schedule separate Work Orders for each trip to the homeowner, do not re-use the same work order
- Review Work Order Line Items (WOLIs) and determine the next steps required for this service and update the Service Request status
- Complete Mileage Responsibility field to ensure mileage is calculated correctly for Service Reimbursements
- Close Work Orders after appointment and cancel any unnecessary work orders

Closing Service Requests

- Move to Service Complete status when ready for close-out call or Service Reimbursement submission
- Move to Warranty Submitted or Closed within 3 days of last trip to homeowner
 - Service Survey triggers upon Warranty Submitted or Closed status
 - Services outside 30 days from last trip to homeowner are not eligible for Service Reimbursement
- Once a Service Request has been moved to Closed or Warranty Accepted, a new Service Request will need to be opened for any subsequent work

Suggested Booking Checklist

Confirm:

- ☐ eGreement, JSON file and PROJ file are submitted by sales rep
- ☐ Job is on correct Opportunity (and is in New or Sold-Pending status)
- ☐ Job is under Correct Rep on the Opportunity
- ☐ Phone number, email address, and address are correct & under the Contacts
- ☐ Deposit Received/Financing Secured & is correct
- ☐ Contract total matches Salesforce Total matches E+ total
- ☐ Year Built Field is populated on the Account
- ☐ If it was a Remote Tech
- ☐ Discount Audit is completed by SOA
- ☐ All required contract documents are included with SIGNATURES (see below)

Completed eGreement has the following documents (including all applicable signatures):

- Table of Contents page
- Agreement and Payment Terms document
- Signature(s) on Agreement
- Lead Time noted on Agreement
- Itemized Order Receipt
- Payment Authorization Form (*ensure information is accurate*)
- Notice of Cancellation
- RbA Warranty & other applicable warranties
- Go Permit page (if applicable)
- Certificate of Insurance
- Terms and Conditions of Sale
- Project Preparation Expectations
- Electronic Consent Notice
- HOA Approval Not Needed / HOA Approval Needed document (*check association name, phone #, email, etc. is noted when HOA Approval is needed*)
- Price Presentation Discounts sheet
- Release Agreement (not required)
- Floor plan
- Lead-Safe Form if required by your location (if house built prior to 1978 or if homeowner is unsure)
- Addendum and Arbitration Approval/Rejection (if required by your location)
- Consumer Rights form & brochure (if required by your location)
- Project Overview/Detail Summary Review completed and signed (if required by your location)
- Ensemble/ProVia spec sheet when applicable (must have Provia Order Number listed on spec sheet)
- Window color sample initialed by customer, for windows only (if required by your location)
- Specialty Window pictures (if required by your location)
- Itemized Pricing (if required by your location)
- Performance Report (if required by your location)
- Homeowner's Association Verification (if required by your location)
- Tile/Stucco/Plaster Waivers (if required by your location)

Ensemble Training Guide (Updated June 25th, 2025)

Reference the Ensemble Training Guide on The Link or RewewU for instructions and tips with ordering Ensemble Entry Doors. It's an every changing document, so look for the newest version each time you need it.

Ensemble Guidelines – Service Ordering **(Revised April 22, 2025)**

Reminders :

rSuite App – Great asset to have and will help guide you on any changes you would like to request. We suggest working with your sales rep, tech measure or any resource that have access to rSuite before submitting your order.

Cancellation/Change an order: Retailer have 24 hours to cancel/change their service order as these orders batch within 24 hours to give manufacturing as much time as possible for a new product line. As a result, please let us know right away if a change is needed.

Order being return – If any order is being returned to you, please cancel the PO and cancel the service product line you created and begin from scratch to not cause any CPQ errors.

Lead time – Can be found on the link. Currently there is no expedited lead time for new orders. There are however approved expedited lead times for service reorders

Cost PO – Please work with your retailer experience coordinator before submitting a request to ensure we have the quantity needed.

Service Product – Makeability Options

Complete Unit - Retailer can select complete unit.

- If size or configuration changes are required, please follow the “Full Ensemble Reorder as a New Order” PDF document. If you have any questions, please reach out to your locations new order entry team

Frame - Retailer can select frame.

- If the color/jamb depth needs to be changed you can submit the reorder for the frame with the spec change in the PO notes. If the frame has been installed and there is an install kid on the unit, you will need to create one line for the frame, and an additional line for a complete unit with PO notes stating “Install Kit Only Is Needed”

Panel - Retailer can select panel.

Configured Accessories - Retailer can select these products in rForce, see below for configured accessories that are not selectable however showing available in rForce, follow below steps to reorder

- Applied Grilles: Select panel replacement with the grille type needed in notes.
- Direct Set Glass: Select direct set glass for direct set sidelights and transoms where the glass only is needed. If the sidelight is panel set or the glass is in an active panel, you will need to reorder the panel

- Passive Panel Cross-Bored Lock Set: Select hardware replacement, and put 7-digit part number in notes
- Passive Panel Mortised Lock Set: Select hardware replacement, and put 7-digit part number in notes

Hardware - If hardware is needed (static part numbers which mean it not being ordered through the CPQ system)

- Retailer will select hardware and fill out their notes section and provide part number if available, brief explanation of what occurred, and quantity needed. **(This includes peep sites, knockers, dental shelves and kick plates)**
- Hardware shouldn't be ordered through the IQ + ordering system and this applies to both stock parts and non-billable as entry doors follow the same process as windows. If any changes occur Retail Quality will provide the feedback on the service order and inform you to order in IQ+.
- **If ordering new keyed alike cylinders to match existing patio door, please order through iQ+ as a residential remodel order.**

Install Kit – If a stand alone install kit is required for a reorder, please select “Full Unit” and in the product line notes please enter “Install Kit Only”

Joining Kit – If a stand alone joining kit is required for reorder, please submit a full unit reorder through the retail experience team. Then contact retail quality with the sales order number, so they can adjust the order to reflect just the joining kit.

[Creating your service PO:](#)

If you are ordering a unit/ frame/ panel or configured accessories – please ensure the below steps are completed prior

Step 1) Retailer will need the original PO to be in received status or the variant that they are working on to be received if you are ordering unit/ panel/ frame or configured accessory.

RX1804767P	Renewal by Andersen	\$3,831.82	Received	12/14/2023
RX1804768P	Renewal by Andersen	\$5,771.47	Received	12/14/2023
RX1804855P	Renewal by Andersen	\$2,856.52	Received	01/19/2024

Step 2) Retailer will need to refresh the CPQ/Ensemble system under the custom opening product line.

- Under the original order go to the product tabs.
- Click on the arrow.
- Click view.
- Click on view configurations details.
- You are now in the CPQ system.
- Scroll down and click finish on the left side.
- Then your next screen will say “Close Configurations Details or Use page navigation button below “and click close
- You have now refreshed the CPQ system.

What happens is on the Retail Quality side if this step is missed it will cause an error and Retail Quality will not be able to complete the service reorder.

- Your order will be returned to you and we would need for you to CANCEL the service PO and CANCEL the service product lines and begin again following the above steps.

If you are reordering a static hardware part that will not be ordered through the CPQ system, then you can leave your original PO in the status you prefer and don't need to fully receive the PO because static parts are a manual process and follows the same process as windows.

Screen shots to help outline the above steps:

Step 1) Retailer will need the original PO to be in received status or the variant that they are working.

RX1804767P	Renewal by Andersen	\$3,831.82	Received	12/14/2023
RX1804768P	Renewal by Andersen	\$5,771.47	Received	12/14/2023
RX1804855P	Renewal by Andersen	\$2,856.52	Received	01/19/2024

Step 2) Retailer will need to refresh the CPQ/Ensemble system under the custom opening product line.

- Under the original order go to the product tabs.

How to Create a New Order for an Ensemble Full Unit Reorder

When an Ensemble entry door needs a configuration or size change, a new entry door unit must be ordered in an order, instead of via service request.

- If the order you are working in has not been recognized, the entry door can be added to the existing original order (start at step 5 on page 6).
- If the order you are working in has been recognized, you will need to create a new opportunity, and from there a new order.

Step 1: Create a New Opportunity

On the homeowner's Account, create a new opportunity by hovering over "Opportunities," and then "New" in the upper right corner of the Opportunities pop-up.

Account
99951, 10 Daylight Street

Store Location: 0999 - Demo Store | Sales Rep: Daylight TesVO_J | Account Balance | Year Built: 2022

Navigation: Orders (10+) | Work Orders (10+) | Contacts (10+) | **Opportunities (10+)** | Assets (10+) | Surveys (0) | Files (0) | Account History (0)

Opportunities (10+ items • Sorted by Close Date • Updated a few seconds ago)

Opportunity Name	Stage	Amount	Close Date	Owner Full Name

Cancel Save & New Save

Fill out the Opportunity required fields and leave it in "New" Stage. Click "Save," and then click into the new opportunity from the list of opportunities on the Account.

NOTE: You must use the following format for filling in the Opportunity Name:
REORDER full ENSB unit MMDDYY

Step 2: Create a New Order from the Opportunity

Similar to how you hovered over the "Opportunities" link to create a new one, hover over the "Quotes" link and click the "New Quote" button in the top right of the pop-up.

The screenshot shows the Salesforce interface for an Opportunity record titled "Reorder full ENSB unit 081524". The record details include Account Name (99951, 10 Daylight Street), Close Date (8/15/2024), Sales Rep Name (Daylight Test 01), and Stage (New). Below the record details, there is a navigation bar with links for Files (0), Contact Roles (0), Quotes (0), Work Orders (0), and Orders (0). The "Quotes (0)" link is highlighted with a red box. To the right of the navigation bar, there is a "New Quote" button, also highlighted with a red box.

The quote can have the same name as the opportunity (an easy copy-paste), and will need to be dated and marked as "Sold" Via the checkbox. Once this has been filled out, hit "Save."

The screenshot shows the "New Quote: Quote Record Type" form. The form is divided into two columns. The left column contains the following fields: Quote Number, Quote Name (with a red asterisk indicating required information), Opportunity Name, Account Name, and Contact Name. The right column contains the following fields: Date (8/15/2024), Is Sold? (checked), Status (Draft), and Description. A legend at the top right indicates that a red asterisk (*) denotes required information.

Then, to create the order, change the Stage on the opportunity to "Sold." Once you save and your browser refreshes, there will be a new Draft order in the "Orders" list on the opportunity. (Screenshots on next page.)

Step 3: Move Order from "Draft" Status to "Tech Measure Needed" Status

Click on the order number to go into the order, then hover over "Back Office Checks." Click "Update" in the upper right corner of the pop-up. This is also a good time to ensure that the proper homeowner contact shows in the order, and that your name appears under "Order Owner" and "Sales Rep. "

Click on each checkbox under "Completed" (usually there are 5), then hit Save. This will bring you back to the order, and it will be in "Tech Measure Needed" status.

Step 4: Schedule, Move and Complete Tech Measure Appointment

In the order, hover over "Work Orders," and click on the Tech Measure work order number. Once in the Tech Measure work order, click "Time Slots" on the right side, select your territory, and click "Get Time Slots."

Work Order Number	Work Order Record Type	Status	Scheduled Start	Scheduled End	Primary Resource	Total Labor Cost	Created Date	Owner
07412325	Tech Measure	To be Scheduled					8/15/2024 1:56 PM	0999 - Demo Store Queue
	Permit	New					8/19/2024 11:56 AM	0999 - Demo Store Queue

07412325

Back

Select at least 1 resource

Monday, August 19, 2024 at 3:00 PM EDT

☒ Ben App Assist Test
100/100

Schedule

Once the screen refreshes, hover over the "Service Appointments" link and COPY the "SA-" number on the service appointment. This will help you located the appointment on the Gantt schedule.

Appointment Number	Status	Primary Service Resource	Scheduled Start	Scheduled End	Earliest Start Permitted	Due Date	Contact	Total Travel
SA-7136200	Scheduled	Ben App Assist Test	8/19/2024 2:00 PM	8/19/2024 3:00 PM	8/18/2024 7:00 PM	8/23/2024 7:00 PM		2.2

Now we are going to move the Tech Measure work order on the schedule. Right-click on "Field Service" in the top ribbon, and open it in a separate tab.

Once that page loads, PASTE the SA number into the search box, and click "Search All Records." That will bring you to the appointment in the schedule.

The screenshot shows the Field Service interface. On the left, there's a search bar with "SA-7136200" entered. Below it, a table lists work order details:

WORK TYPE ID	STATUS	LAST NAME
Measure	Scheduled	

On the right, the Gantt chart view is active. It shows a resource list on the left and a time grid on the right. The resource list includes:

- Ben App Assist Test
- Ben Holt (Test)
- Ben Stephens
- Bryon Whipple
- Dan Becker
- Eli Biesanz

The time grid shows slots from 12 AM to 5 AM. A utilization bar for "Demo Store (0999)" is shown at 2%.

Then, simply drag and drop the appointment box into the past. This will ensure that your tech measure staff does not see the appointment on their future calendar.

(My example appointment was scheduled on 8/19/24, and I dragged it to 8/16/24.)

The screenshot shows the Gantt chart view with a date range from "Fri, August 16, 2024" to "Sun, August 18, 2024". The resource list on the left is the same as in the previous screenshot. The time grid shows slots from 12 AM to 4 PM. A utilization bar for "Demo Store (0999)" is shown at 15%.

Now you're ready to complete the Tech Measure work order. Go back to your tab with the work order, refresh, and the new date/ time will show. Change the work order status to "Appt Complete / Closed" status, and save. You can close the Field Service tab.

The screenshot shows a dropdown menu for the work order status. The selected status is "Appt Complete / Closed". Below the dropdown, there's a link that says "View all dependencies".

Click back into your order by clicking the link under "Sold Order," and ensure the status has changed to "Ready to Order." It must be in this status to add and release line items.

Step 5: Add Entry Door and Release PO

In your order, go to the Products tab. Click the "Add Entry Door" button, which will open up the CPQ configuration window within rforce. There you can build the replacement entry door that is needed.

NOTE: If you are working in an order that has not been revenue recognized, please add an "R" at the end of your Unit ID for the reorder door.

Once you hit "Finish" when done with the configuration, the line item will show as "Custom Opening" in the Products tab. Let the sublines load (wait for "Loading Product Sublines" to disappear under the Products tab). Then you are good to create a purchase order in the Purchase Orders tab, and release the purchase order.

Please Note

If you are working in an order that has not been recognized yet and you are simply adding an entry door line item, please name it with an "R" at the end (if the original entry door has a floor ID of 101, your reorder unit would be 101R). This ensures that the Retail Quality team will be in the correct configuration.

Follow the standard Service/JIP Process with the exception of where the product is ordered from. If you created a new order to place the Ensemble Reorder, make sure you Recognize Revenue and close the new order after the reordered Ensemble has been received.

New PDF form

- Conga will create a PDF with all the information you input
- Save PDF and send any additional information to a manager for approval
 - AP will no longer require additional support for rForce check refunds
 - Managers may still want receipts/AR \$0 balance to approve request
- Email Check request form and approval to APCS@andersencorp.com

Main Takeaways

- When AP receives a check request and has appropriate approval, the check will be sent
 - Please ensure that all payments have cleared the bank
 - Make best effort to return money to Homeowner in the method they paid us (try to minimize the # of checks sent)
 - Business Adjustments have been made in rForce (AR balance is negative before refund, \$0 after refund)
 - The Refund should be Check and not other methods (ACH/Credit Card)
 - The check request needs to be reviewed and approved before sending to AP
- Email the PDF of the check request and the approval to APCS@andersencorp.com
 - Please stop using the old form and use the rForce generated form
 - Please put CORO REFUND in the subject line when using the new form
 - It takes about 4-5 business days to issue payment
 - Load payment request, create business partner and enter into Baan before getting on the next check run
- Email all AP questions to APCS@andersencorp.com
- Please email Chad.bauman@andersencorp.com on any issues with the generating the new form. We may need to file a fetch ticket to resolve any technical issues

- Each step can take 1-2 days
- We created a Power BI view to give visibility to the check status

- Link to Power BI report

<https://app.powerbi.com/groups/257a584d-2e50-4c94-8d75-8a6399a0bdad/reports/76f1f7ec-7d35-4860-a70f-bc45bfcf4e50/0aa4070530d860078a43?experience=power-bi>

CORO Refund Invoices Data Through 3/10/2025

- This report is intended to give the locations visibility on the check status
 - All payments go through our Odiss system
 - This report will not give you check number, you can assume the check was mailed two days after Archive date
 - This report will only show CORO refunds sent under the new form
 - Any questions, please email APCS@andersencorp.com

Correcting Invoice Discrepancies (in Odiss and Salesforce for CORO locations)

Most discrepancies are from external vendors. If you have any discrepancies, you will get an email daily from the Shared Services Accounts Payable Team. Items most often show up on this list if you didn't receive a PO when AP expected it to be received, there was a typo in Confirming the cost in the PO, or the Vendor changed the cost from the original Invoice they sent you.

From the email, click the link and it will bring you to the Odiss site:

Choose your Location/Group and click Search.

Click the Invoice Number to open the details.

From here you can see the Invoice that Corporate received from the Manufacturer/Vendor. You can also see and add notes here.

- If you **have received the product but haven't received it in Salesforce yet**, Receive the product in Salesforce and add a note in Odiss stating "I just received this PO in Salesforce". Click Save. Then change the Invoice Status to Approved and Save Changes.
- If you have **not physically received the product**, just add a note in Odiss that says "This product has not been physically received yet" then click Save. Don't change Invoice Status to Approved, as Approving it takes it off list.
- If the issue is due to a **cost discrepancy**, and your PO is **NOT yet received** in Salesforce, you can edit the cost on the original PO. Add a note in Odiss that says "Cost has been corrected" and click Save. Change the Invoice Status to Approved and Save Changes.
- If the issue is due to a **cost discrepancy**, but your **PO IS already received**, follow these steps in Salesforce:
 1. Open a Service. (*If there's already a Service Open, you can create a new line and PO from there).
 2. Create a product line on the service. Replicate whatever codes were originally chosen for the line item. Correct coding is very important.
 3. Attach the line to a PO.
 4. Release the PO.
 5. Confirm the PO by using the same Confirmation # and ship date as original PO, and add the cost difference amount. -Attach the Invoice from Odiss to the new PO for reference. When confirming PO, put same Invoice#, put date product should have arrived, everything should reflect the same as original PO that we should have been working with.
 6. Receive the PO.
 7. Then go back to Odiss on the Invoice, type Notes that say "I created a new PO. The new PO# is _____. I added \$___ to make up the difference of the PO". Click Save. Change the Invoice Status to Approved and Save Changes. Then this will go to AP's system, and they will clear it out.

The goal should be to clean these out by next day, after getting the email. If these stay outstanding, you can lose your discounts, so it's important to address timely. You should have at 3+ people per location able to do this process so it doesn't go unaddressed if someone if gone.

Vendor Credits:

In Odiss, if the Invoice Number starts with "R" and the Total Invoice Amount is negative and red, that means you must apply a Vendor Credit to the Service PO (not the original PO) in Salesforce. You may not know about these until they show up in Odiss.

Showing 1 to 5 of 5 records

Invoice Number	Invoice Date	Total Invoice Amount	Supplier Payment Discount	PO Number	Vendor Name	Company	Invoice Status	Assigned User/Group
11563137	21 May	\$73.87	\$7.74	A021801635	PROVIA	Baan ERP	Discrep-	CORG CORO
R0982744	27 Jun 2024	-1,836.47	0.00	A216423685	PROVIA	Baan ERP (104)	Discrep-Record	CORG CORO Roseville

To correct these, you'll need to follow these steps in Salesforce:

1. Click the dropdown on top right and choose Vendor Credit.

2. Make sure the New Value matches what is on the invoice/receipt from the Vendor. Change the amount here if it doesn't. Click Save.

Vendor Credit					
ALL AVAILABLE PRODUCTS ARE CURRENTLY SELECTED TO RECEIVE FULL VENDOR CREDIT					
	Product ▾	Variant... ▾	Total C... ▾	Tax ▾	Vendor... ▾
1	Miscellaneo...		\$468.64	\$36.90	\$505.54

3. Now you can see the Vendor Credit has been applied.

	PD - Panel - Operating	PDS - Damage	for AP only on po# AY16434365		1	07/01/2024		\$505.54	

4. Add a note to Odiss stating "Vendor Credit has been applied to PO#____". Click Save.
5. Change Invoice Status to Approved and click Save Changes.

Vendor Name *	PROVIA
Company *	Baan ERP (104) ▾
Invoice Status *	Approved ▾
Assigned User/Group	*Group: CORO Breauville ▾

6. Clicking "Next" will show that the discrepancy you just Approved has now been removed from the list.

l pads ordered through Provia with Co-op Dollars:

To resolve this, someone with Odiss access will have to go into this line in Odiss, type a note that says "Account String: ____ - ____ - ____ - ____" (find out what your location's is). Then change the status to Approved. This should clear it.

11659675	14 May 2024	-1,367.36	0.00	PROVIA	Baan ERP (104)	Discrep-Receipt	*Group: CORO Detroit

Lead Safe Work Practice Compliance Program

Program Definitions

Standard Operating Procedure (SOP): A written set of instructions that describe how to perform routine tasks. Used to ensure that tasks are completed consistently, and that RbA complies with regulatory standards.

Lead Safe Work Practice (LSWP): Procedures that reduce the risk of exposure to lead dust and debris.

Renovation, Repair, and Painting (RRP): EPA rule that establishes requirements for work that disturbs lead-based paint in homes, schools, and childcare facilities built before 1978. The rule's goal is to reduce exposure to lead-based paint and dust and prevent lead poisoning.

RRP Brochure: Pamphlet from the EPA that provides information about lead-safe practices home renovations. Intended for people who live in homes built before 1978.

RRP Checklist: Form that documents activities and requirements for projects that disturb lead paint. The checklist can be used by renovators to ensure compliance with the RRP rule.

Design Consultant (DC): Creative professional who works with homeowners to create a functional and aesthetically pleasing space with RbA's products. DCs offer expert advice on design, and help clients make informed decisions that meet their needs.

Installation Project Manager (IPM): RbA employee that leads and manages the installation activities from planning through execution, ensuring adherence to Quality, Cost, Delivery, and Installation, alongside compliance with Environmental, Health, and Safety policies.

Installation Manager (IM): Manages the overall installation process and teams, including technical measurement, warehouse, installation and service, to insure Homeowner delight, cost effectiveness on labor and materials, and appropriate resource capacity in a major market CORO.

Purpose

This SOP's purpose is to establish a clear and consistent processing for entering a new LSWP workorder accurately and efficiently. This document aims to ensure that all relevant information is captured, standardized, and communicated effectively, enabling timely execution, resource allocation, and tracking of work activities. By following this SOP, RbA can maintain and enhance compliance with EPA rules and regulations.

Part 1: Creating LSWP Workorder

1. Order Entry creates an order and checks public records/online search for year that home was built.
2. Within order, homeowner address is entered as a new Account.
3. Once age of home is confirmed, the booking agent updates age of home in the "account name" (address data section) in Rforce.
 - a. To access this data section, click on the hyperlink (blue) account name.

Within the Lead-Safe Form, "You" or "I" refers to the Buyer(s) (who may also be referred to herein as the "Customer(s)").

Pamphlet Receipt

I have received a copy of the lead hazard information pamphlet informing me of the potential risk of the lead hazard exposure from renovation activity to be performed in my dwelling. I received this pamphlet before the work began.

Lead Safe Work Practice Process

Renewal by Andersen of Capital Region does not test for lead based paint. All homes built prior to 1978 are presumed Lead positive and therefore will have lead safe work practices performed during the installation as required by EPA's Lead-Based Paint Renovation, Repair, and Painting Rule.

Please Note: There is no additional charge to perform lead safe work practices.

Lead Safe Work Practices Installation Preparation

The following will apply to your installation if your home tests positive for lead based paint:

AC/Furnace - You will need to temporarily turn off your air conditioning or furnace during the portion of installation where Lead Safe Work Practices are being performed.

Preparation - Please remove all bed linens, pillows, and children's toys from the work area(s).

Warning - When a containment area is set up by the installation crew, no one is permitted inside the room/containment area with the exception of the installation crew members.

By signing below, I hereby agree to the terms and conditions above.

245

10. IPM/Tech measures the project.
11. IPM submits their completed TechMapp documents to the ordering department by email.
 - a. If the IPM team has access to SalesForce they can directly upload their TechMapp to the files section of the measure workorder.
12. Ordering team completes the Measure workorder placing the job into RTO.
13. Ordering team then updates the LSWP workorder.

Part 2: Distributing RRP Brochure

1. After the install is scheduled, compliance representatives must check the B07400 Renovate Right Tracking report.
2. Every LSWP job on this report must receive the RRP pamphlet 60 days before the installation date. Written acknowledgement or proof that pamphlet was sent (emails are sufficient for proof) at least 7 days before enovation.

CORO AR Reason Code Guidelines

An accurate AR Reason Code must be chosen in Salesforce on day of Install. AR Reason codes should be updated as they change. See the list of AR Reason Codes and when to use them.

New New List	Who's Managing?	When to Use	Notes
JIP Service – Open	CORO	Project was not completed the first time and CORO has action items, including paint/stain.	Once complete move to Collections – locations <30 Days, Financing - Waiting for COC, Financing - Waiting for Changes, or Financing - Waiting for rFinance.
JIP Service – Waiting on Customer	CORO	Responsive Customer: Seasonal, vacation or personal issues preventing customer from allowing us to complete project. When resolution is outside of branch's control.	
Financing – Waiting for Changes	CORO	Change order needs to be submitted to rFinance or other action needed from branch.	
Financing – Waiting for COC	CORO	Project complete. Install &/or JIP Service complete. Waiting for Certificate of Completion (COC). Also use for customer delays with Greensky.	
Financing – Funding and Delays	rFinance	COC has been received and uploaded. Waiting for transfer of funds, rFinance support issues, tech issues, etc. Action needed by rFinance.	
Collections - Location <30 Days	CORO	Use when not escalated, but didn't follow "happy path". Install &/or JIP Service complete, non-finance, project complete. Check and CC customers.	Make sure you put good notes
Collections - Management	CORO - IOS/Ops Manager	Escalated situation where branch leadership involvement is needed to collect.	
Collections - Shared Service	CORO	CORO uses when they have exhausted all collection efforts. Incl sending demand letters. Should only be used by the Centralized AR team.	Will be reserved at 100% bad debt.
Collections - 3rd Party	AR	Should only be used by the Centralized AR Team.	Will be reserved at 100% bad debt.
Collections - Legal	AR/CORO	Escalated situation where legal is involved to advise. Should only be used by the Centralized AR team.	Use any time you are working with Legal. Anything goes to legal will be reserved at 100% bad debt. Notes will still tell root cause.
Service - Complete	CORO	Not a JIP or under warranty – customer paying for service	

Potential Coding Scenarios

What code should you use when:

- You are waiting for painting/staining to be completed?
 - ✓ JIP Service - Open
- You are waiting for a Change Order for something (like removing paint/stain charge or removing materials and you don't know new total yet)?
 - ✓ If Financing, "Financing – Waiting for Changes"
 - ✓ If cash, Collections – Location <30 days
- The COC was signed at install, you uploaded to portal and requested S2 funds day of Rev Rec and should post within few days
 - ✓ Financing – Funding and Delays
- The homeowner refusing to pay because they want some sort of business adjustment/compensation
 - ✓ Collections - Management
- The homeowner needs to reapply for finance or switch finance programs
 - ✓ Financing – Waiting for Changes
- You get notified of an NSF Check
 - ✓ Collections – Location <30 days
- JIP Seasonal Service
 - ✓ JIP Service – Waiting on Customer

Post Install AR Collection Process

This is the recommended process for all orders, regardless of payment type.

Days/Steps

Day 1 (Day of Install)

Always try to collect. If unable, create/update a Collections task. An accurate AR Reason Code must be chosen on the order. (See AR Reason Code Addendum for guidance)

Day 3

Contact via phone call & preferred method of contact.

Day 5

Call, text & email homeowner. Ask Sales Consultant to follow up. At this point, your message should say *"We're hoping to get this taken care of before it leaves my desk and escalates to a Supervisor."*

Day 7

- Call & text & email customer, adding this verbiage: *"After today, it will be leaving my desk and be escalating to our Supervisor. It may then start a more formal process which may include a lien on the home and possible suspension of your warranty."*
- Create a Collections Work Order and mail **Letter 1** from Salesforce, including a paper COC for rFinance jobs (preferably Certified). (See below section for instructions on sending Letters via Salesforce)
- Continue to follow up every 2-3 days if possible.

Day 14

Supervisor to call and email follow up, using templates on next page. Mention a letter was sent the previous week.

Day 21

Mail Final Attempt letter (include Completion Certificate if applicable). This MUST be sent certified mail. Supervisor leaves message stating letter has been sent and it's our final attempt to contact them before going to external collections (centralized collections if CORO).

Day 28

Move to AR Team/3rd Party Collections. Change status (reason code) to Collections - 3rd Party and email Centralized AR Team/Amanda Fall stating you've exhausted all options. MUST HAVE COMPLETED ABOVE STEPS BEFORE SENDING TO CENTRALIZED AR.

Notes

- Do not do an adjustment for AR Write Office until Amanda/AR Team tell you too.
- If the customer contacts you to pay but you've already emailed AR Team/Amanda, it's okay to take the payment. Notify Centralized AR/Amanda that you collected payment.
- Do not contact the Centralized Accounting team until all steps above have been completed, unless the customer is refusing to pay, threatening legal action, etc.
- It is preferred that all letters mailed to customer are sent Certified mail, but a minimum of ONE letter MUST be sent Certified.
- You must use the letters populated in Salesforce.
- You must send your email communications/letters through Salesforce, and log any calls/attempts made to collect.
- Be mindful of jobs with Services and start the above process on the day the service is complete.

***DAY 7 Email Templates:**

For financing:

We have been trying to reach you by phone and need to make sure you have received the Certificate of Completion for your financing loan. Your project has come across my desk because of the time lapsed. The email from noreply@rfinance.com as well as from DocuSign was resent to you today. Financing has been reaching out to us to verify that you have been installed and your project complete. Please e-sign the Completion Certificate as soon as possible to avoid the financing expiring. If the financing expires, you will receive an invoice for the amount of your project, or it will move to our Collections department. If you have any questions, please call me at (xxx) xxx-xxxx, Option 5.

For cash:

Currently our records indicate that we have not been able to finalize the paperwork for your service. Your balance of \$XXXX is past due.

*I've included a copy of your invoice with the outstanding balance. Please contact me as soon as possible to bring your account current. You can also call or send in payment no later than **date** to avoid moving to our collections department and suspension of your warranty. Please call me at (xxx) xxx-xxxx option 5 if you have any questions.*

How to Modify Purchase Order to put Ensemble on a Separate PO

1. Create Renewal by Andersen PO. This will auto-attach the RbA windows and Ensemble line items on the order.
2. Under Products, find the Ensemble line item(s) and click the drop down arrow on the right. Click View (NOT Edit).
